Standardization of Financial Reporting and Accounting in Latin American Countries Lourenço, Isabel, 2015-07-01 Accounting has often been described as the language of business. As the increasing competition of overseas markets begins to affect even the smallest local companies, many more business professionals must become fluent in accounting principles and practice. Standardization of Financial Reporting and Accounting in Latin American Countries highlights the recent move to International Financial Reporting Standards (IFRS) and addresses some of the concerns raised due to cultural differences and the level of enforcement of these standards in separate countries. Describing the evolution of both financial and managerial accounting due to the adoption of IFRS, this book is an essential reference source for both students and seasoned professionals in the fields of accounting, finance, and related management fields, especially those with an international emphasis.

The conference was jointly organized by the German speaking OR societies from Austria (ÖGOR), Germany (GOR) and Switzerland (SVOR) under the patronage of SVOR. More than 840 scientists and students from over 50 countries attended OR 2011 and presented 620 papers in 16 parallel topical streams, as well as special award sessions.
