Foundations of Taxation Law 2022 Stephen Barkoczy,2022-01-25 Foundations of Taxation Law provides a clear and comprehensive introduction to the policy, principles and practice underpinning the Australian taxation system. Designed as an introductory guide for law and business students as well as tax practitioners, the text focuses on general principles, blending policy issues, taxation theory, technical 'black letter law' and commercial practice into a succinct, principled text. Topics have been developed in a logical, structured order and are cross-referenced to specific provisions in the legislation and relevant cases so that readers can easily find the source of the law. The text includes approximately 400 examples and dozens of diagrams and tables that condense the law and clarify difficult concepts. This fourteenth edition has been substantially revised and restructured to take account of many important legislative reforms, case law developments, administrative changes and policy announcements. It is designed to be used in conjunction with the Core Tax Legislation and Study Guide 2022.

Events in the City Andrew Smith,2015-11-19 Cities are staging more events than ever. Within this macro-trend, there is another less acknowledged trend: more events are being staged in public spaces. Some events have always been staged in parks, streets and squares, but in recent years events have been taken out of traditional venues and staged in prominent urban spaces. This is favoured by organisers seeking more memorable and more spectacular events, but also by authorities who want to animate urban space and make it more visible. This book explains these trends and outlines the implications for public spaces. Events play a positive role in our cities, but turning public spaces into venues is often controversial. Events can denigrate as well as animate city space; they are part of the commercialisation, privatisation and securitisation of public space noted by commentators in recent years. The book focuses on examples from London in particular, but it also covers a range of other cities from the developed world. Events at different scales are addressed and, there is dedicated coverage of sports events and cultural events. This topical and timely volume provides valuable material for higher level students, researchers and academics from events studies, urban studies and development studies.

Data Monitoring Committees (DMCs) Nand Kishore Rawat,David Kerr,2023-06-08

This book provides an overview of Data Monitoring Committees(DMC) - what was done in the past, what is currently being done, and thoughts on improvements for the future. Previous works focused primarily on large cardiovascular studies (where DMCs originated more than 30 years ago) but updated references are needed that discuss smaller, more flexible studies in areas such as oncology. The authors have attended ~800 DMC meetings from ~200 distinct studies across all areas of clinical studies (oncology, rheumatology, rare diseases, cardiology, immunology, etc.) This wide range of expertise will be used, as well as the expertise that comes from working with virtually every large biotechnology and pharmaceutical company and CRO for DMC work. The reader of the book will know when DMCs are needed or helpful, how to form the DMC, how to work with external CROs and with sponsor teams and the DMC to create needed DMC outputs, how the DMC meetings are conducted, and - especially for DMC members - what are considerations within the Closed Session to review safety/efficacy outputs to assess risk/benefit to make appropriate recommendations that protect the patient safety and trial integrity. This is a practical hands-on book on how to decide if a DMC is necessary, how to form the DMC, how to expertly create the necessary materials for the DMC and have smooth running DMC meetings. There is no specialized training in school about how DMCs work - frequently people may have been in industry for many years without ever needing to work with a DMC. This book is the helpful reference for those new to these DMCs. The DMC work is critical to be correctly implemented as the impact of DMC activity on safeguarding the trial is so important. This book provides the following: Provides thorough instructions on the steps needed to form and implement a

Data Monitoring Committee for clinical trial evaluation; Includes practical and hands-on information on DMC implementation; Discusses a wide range of clinical trial – by phase and therapeutic area.

The Great Ordovician Biodiversification Event B. D. Webby,2004 Two of the greatest evolutionary events in the history of life on Earth occurred during Early Paleozoic time. The first was the Cambrian explosion of skeletonized marine animals about 540 million years ago. The second was the Great Ordovician Biodiversification Event, which is the focus of this book. This is the first book devoted specifically to establishing the global patterns of differentiation of Ordovician biotas through time and space. It provides extensive genus- and species-level diversity data for the many Ordovician fossil groups and presents an evaluation of how each group diversified, with assessments of patterns of change, and rates of origination and extinction.
