International Migration, Social Demotion, and Imagined Advancement Erind

Pajo, 2007-10-23 This book represents one of the first studies to look at the negative results of migration. Based on an ethnographic study focusing on Albanian migrants in Greece and Italy, the book discusses the reasons people leave their homeland for a better life - especially if that does not happen. It finds that imaginaries of the world as a social hierarchy might lie at the root of much of the contemporary international migration.

Navigating Your Way to Startup Success Harlan Beverly, 2017-12-18 Startups, like sailing vessels, do not travel in straight lines. The wind and the waves of the real world move the ship, and your startup, in unpredictable ways. This book is designed to give you an analytical set of tools to help you navigate your startup or corporate innovation through the murky waters of real life. Every business has failures. No business succeeds without some change of plan. *Navigating Your Way to Startup Success* will show you how to create a startup designed to test its assumptions so those that are not worthy fail—often and fast. This book builds on modern startup management techniques like Agile and Lean to bring an analytical and quantitative framework to the most common startup failures. Navigating through those failures means finding your way to startup success. Harlan T Beverly, PhD holds a BS in Electrical and Computer Engineering, an MBA from UT Austin, and a PhD in Business from Oklahoma State University. Harlan teaches entrepreneurship at the University of Texas at Austin. He is also Assistant Director of the Jon Brumley Texas Venture

Labs at UT Austin, the world's first university business accelerator. Harlan has successfully launched five hardware and 15 software products including the Killer NIC, 2007 Network Product of the Year (CPU Magazine). He has raised over \$30 million in venture financing in the challenging intersection of entertainment and technology.

Strong Brands, Strong Relationships Susan Fournier, Michael Breazeale, Jill Avery, 2015-06-12 From the editor team of the ground-breaking Consumer-Brand Relationships: Theory and Practice comes this new volume. Strong Brands, Strong Relationships is a collection of innovative research and management insights that build upon the foundations of the first book, but takes the study of brand relationships outside of traditional realms by applying new theoretical frameworks and considering new contexts. The result is an expanded and better-informed account of people's relationships with brands and a demonstration of the important and timely implications of this evolving sub-discipline. A range of different brand relationship environments are explored in the collection, including: online digital spaces, consumer collectives, global brands, luxury brands, branding in terrorist organizations, and the brand relationships of men and transient consumers. This book attends to relationship endings as well as their beginnings, providing a full life-cycle perspective. While the first volume focused on positive relationship benefits, this collection explores dysfunctional dynamics, adversarial and

politically-charged relationships, and those that are harmful to well-being. Evocative constructs are leveraged, including secrets, betrayals, anthropomorphism, lying, infidelity, retaliation, and bereavement. The curated collection provides both a deeper theoretical understanding of brand relationship phenomena and ideas for practical application from experiments and execution in commercial practice. Strong Brands, Strong Relationships will be the perfect read for marketing faculty and graduate students interested in branding dynamics, as well as managers responsible for stewarding brands.

Keep It Social Savvy Melissa Balin,2019-03-10 In 2019 and beyond, if you start any kind of endeavor without giving thought to how people can find you online and off, as well as how you can monetize whatever your social media strategy may be... then you are not monetizing whatever your social media strategy may be. Equally important to making money is not losing money. Some people underestimate how lack of SocialSavvy-ness can actually cost them, when it comes to what type of social media content they are sharing

and where. How can you use social media to find common ground and strategic partnerships in alignment with your own messaging? How can you get loyal supporters and avoid boycotts & cancel elations and what are the best ways to avoid or stir up controversy? What can you share daily, weekly and monthly with consistency that will add value and enjoyment without creating (too much) additional work or stress to your existing workflow? Do you use social media to keep in touch with friends and family and/or to promote and conduct business online? If you are attempting to make even one dollar in any way through the internet, there are ethics that go along with posts, regardless of how regulated or unregulated the platform itself may be. We are self-governing and should use our best judgement with regards to content on each platform. Are you sharing content for your brand across various platforms and with relevant groups in a way that feels authentic and meaningful rather than spammy? Do you have a way to accept donations or payments, a kickstarter or indie-go-go or patreon or simply a venmo or paypal? How can people best contribute to you? Is there a good or service people can purchase? A website to visit? A Call-To-Action you would like to share? Books, e-books, songs or podcasts to download? Favorite causes you are helping to raise awareness for? Does this change over time? Do you have a way to give contributors and followers updates on your progress and successes? Some brands are built around a competitive or clapback energy and even they can approach social media with a #DoNoHarm credo. Is the content you are sharing useful? Does it improve the quality of life as we know it? Does it entertain and uplift? Check in with yourself and your team every season and every year to evaluate what strategies worked and what didn't and if any technologies have changed to make it worth considering

implementing and adapting older strategies (both successful AND previously unsuccessful) for newer environments and platform evolutions. Can you honor the existing loyalties of early subscribers, followers, and circle of friends, while attracting new and diverse subsets of awareness for your awesome sauce both figuratively and LITerally (#NowTHASSHottt?!). Remember that becoming an expert is not just about attaining successful results, but also understanding the hows and whys of achieving those results, whether they were successful or not. Ultimately, Be Kind to yourself as you try new things or things that are supposed to be tried and tested but may not be yielding the results you are looking for and #GiFitForward (Get it?!
