Corona, False Alarm? Karina Reiss, Sucharit Bhakdi, 2020-09-16 Does the race for vaccine development make sense? What are the chances of success? Will the vaccine be safe? Will people accept it?? In June 2020, *Corona, False Alarm?* exploded into the German market, selling 200,000 copies and 75,000 e-books in the first six weeks. No other topic dominates our attention as much as coronavirus and COVID-19, the infectious disease it triggers. There's been a global deluge of contradictory opinions, fake news, and politically controlled information. Differing views on the dangers posed by the pandemic have led to deep division and confusion, within governments, society, and even among friends and family. In *Corona, False Alarm?*, award-winning researchers Dr. Sucharit Bhakdi and Dr. Karina Reiss give clarity to these confusing and stressful times. They offer analysis of whether radical protective measures—including lockdown, social distancing, and mandatory masking—have been justified, and what the ramifications have been for society, the economy, and public health. Dr. Bhakdi and Dr. Reiss provide dates, facts, and background information, including: How Covid-19 compares with previous coronaviruses and the flu virus What infection numbers and the death rate really tell us The challenges around lockdown: Were the protective measures justified? Mandatory mask-wearing: Does the science support it? Vaccines: What are the chances of success? What are the risks? *Corona, False Alarm?* provides you with sound information and substantiated facts—and encourages you to form your own opinion on the corona crisis.

International Handbook of Research on Conceptual Change Stella Vosniadou, 2013-07-18 Conceptual change research investigates the processes through which learners substantially revise prior knowledge and acquire new concepts. Tracing its heritage to paradigms and paradigm shifts made famous by Thomas Kuhn, conceptual change research focuses on understanding and explaining learning of the most the most difficult and counter-intuitive concepts. Now in its second edition, the *International Handbook of Research on Conceptual Change* provides a comprehensive review of the conceptual change movement and of the impressive research it has spawned on students' difficulties in learning. In thirty-one new and updated chapters, organized thematically and introduced by Stella Vosniadou, this volume brings together detailed discussions of key theoretical and methodological issues, the roots of conceptual change research, and mechanisms of conceptual change and learner characteristics. Combined with chapters that describe conceptual change research in the fields of physics, astronomy, biology, medicine and health, and history, this handbook presents writings on interdisciplinary topics written for researchers and students across fields.

Sold into Marriage Sean Boyne, 2012-08-29 In 1973 a sixteen-year-old Irish schoolgirl was sold into marriage by her father. Her groom was a farmer almost four times her age. Despite a pre-nuptial agreement guaranteeing that there would be no sex, her husband raped her repeatedly. He also beat her. Although she made desperate pleas for help, the legal system, the police and the clergy failed to come to her aid. *Sold into Marriage* is the story of that girl's loveless marriage, as told to journalist Sean Boyne, her rape, subsequent pregnancy and suicide attempt and her eventual escape to London and freedom.

Were They Pushed Or Did They Jump? Diego Gambetta, 1987-04-23 This book explores the factors which govern the range of educational decisions confronting individuals between compulsory school education and university. The data on which it draws come from two surveys conducted in north-west Italy, one of unemployed young people and one of high-school pupils. The author is in effect testing the two fundamental and opposed paradigms of explanation which are generally applied in the sociology of education; one which holds that the individual agents are essentially passive, being either constrained by lack of alternatives or pushed by causal factors of which they are unaware; and the other in which they are regarded as capable of purposive action, of weighing the available alternatives with respect to some future rewards.

Democratic inclusion Rainer Bauböck, 2017-12-22 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Rainer Bauböck is the world's leading theorist of transnational citizenship. He opens this volume with a question that is crucial to our thinking on citizenship in the twenty-first century: who has a claim to be included in a democratic political community? Bauböck's answer addresses the major theoretical and practical issues of the forms of citizenship and access to citizenship in different types of polity, the specification and justification of rights of non-citizen immigrants as well as non-resident citizens, and the conditions under which norms governing citizenship can legitimately vary. This argument is challenged and developed in responses by Joseph Carens, David Miller, Iseult Honohan, Will Kymlicka and Sue Donaldson, David Owen and Peter J. Spiro. In the concluding chapter, Bauböck replies to his critics.

Gorsky Vesna Goldsworthy, 2015-10-20 "An impressively accomplished retelling of the Gatsby story," in which a Russian businessman engages an

impoverished bookseller's help pursuing a lover. (Los Angeles Review of Books) On a rainy afternoon in London's old Chelsea, a charming multi-billionaire Russian oligarch, Gorsky, walks into an ailing bookshop and writes the first of several quarter-of-a-million pound checks. With that money, Gorsky has tasked Nikola, the store's bored and brilliant clerk, with sourcing books for a massive personal library, which will be housed in the magnificent, palatial home Gorsky happens to be building immediately next to Nikola's own modest dwelling. Gorsky needs a tasteful collection of Russian literature to woo a long-lost love—no matter that she happens to be married to an Englishman. His passion for her surpasses even his immeasurable wealth, and Nikola will be drawn into a world of opulence, greed, capitalism, sex, and beauty as he helps Gorsky pursue this doomed love. "An accomplished retelling of an American classic." —Tablet "It's a very clever idea: to update *The Great Gatsby*" by making the bootlegger into a Russian arms-dealing billionaire and transplanting the action from Jazz Age New York to 21st-century London, a city increasingly shaped by global wealth." —The New York Times Book Review "A tense, witty page-turner." —The Spectator "Entertaining." —New York Journal of Books "[A] kind of novel-length love letter to the written word." —Jewish Book Council

The Politics of Sexuality Barry Barry Michael Dank, Roberto Refinetti, Ph. D., Sexuality and Culture serves as a compelling forum for the analysis of ethical, cultural, psychological, social, and political issues related to sexual relationships and sexual behavior. These issues include, but are not limited to: sexual consent and sexual responsibility; sexual harassment and freedom of speech and association; sexual privacy; censorship and pornography; impact of film/literature on sexual relationships; and university and governmental regulation of intimate relationships. The central theme of this volume is the politics of sexuality. Theoretical essays, research reports, and book reviews examine the topics of sexual harassment law as a sexual control mechanism, censorship of sexual materials, and criminalization of commercialized sexuality. A special section focuses on the Clinton-Lewinsky affair with contributions by David Steinberg, John Furedy, and Joseph Fulda. Other articles include: Trends Towards Increased Sexual Repression in the Final Two Decades of the Twentieth Century by Elizabeth Allgeier; Naked but Unseen: Sex and labor conflict in San Francisco's Adult Entertainment Theaters by Kerwin Kay; A test of the Biopolitics Hypothesis by Kenneth Westhues; Scientific and Fictive Sociology: The Viability of Research by Edwina Taborsky and Reena Sommer; and Sex Entertainment for Women on the Web by Marjorie Kibby. Also included are reviews of books, including Faculty-Student Sexual Involvement: Issues and Interventions, by Virginia Stamler and Gerald Stone; Heterophobia: Sexual Harassment and the Future of Feminism, by Daphne Patai; Sex among Allies: Military Prostitution in US-Korea Relations, by Katharine H. Moon; and American Homo by Jeffrey Escoffier. The Politics of Sexuality will be of interest to general readers as well as to scholars (sociologists, psychologists, legal analysts), policymakers, and members of the sex work and sex entertainment communities.

The Middle East Conflict Alan Axelrod, Ph.D., 2014-11-04 The Middle East is often a pressure cooker of upheaval and the threat of war. Complex dynamics are at work, both culturally and politically, and understanding conflict in this region starts with understanding both recent and ancient events. Noted history writer, Alan Axelrod, PhD, breaks down the stereotypes and biases and helps readers not only understand what has been happening during the last 100 years, but why it has happened, who was involved, and what might happen in the future. Supplemental maps are also included.

Chongqing Ferit Kuyas, Diana Edkins, Bill Kouwenhoven, 2009 The Chinese city of Chongqing is little known in the West. Yet with its 32 million inhabitants, the city is twice as big as the Netherlands. Located on the Yangtze river in the province of Sichuan in southwestern China, it is one of China's most rapidly growing cities. Ferit Kuyas stayed in Chongqing on dozens of occasions for long periods and became totally fascinated by the megalomaniacal construction fervour he witnessed there, as well as its beauty. The almost ubiquitous haze naturally present in this region but intensified by large-scale pollution gave his work almost automatically an added layer of mystery. Kuyas focussed predominantly on the periphery of the city, where the enormity of it cannot be directly seen, but rather felt. The result is a stifling and exceptional book that displays all the superlatives that describe China: huge, unstoppable, terrifying, incomprehensible, fascinating, beautiful...

Actuarial Mathematics Harry H. Panjer, American Mathematical Society, 1986 These lecture notes from the 1985 AMS Short Course examine a variety of topics from the contemporary theory of actuarial mathematics. Recent clarification in the concepts of probability and statistics has laid a much richer foundation for this theory. Other factors that have shaped the theory include the continuing advances in computer science, the flourishing mathematical theory of risk, developments in stochastic processes, and recent growth in the theory of finance. In turn, actuarial concepts have been applied to other areas such as biostatistics, demography, economic, and reliability engineering.

The Developmental Social Psychology of Gender Thomas Eckes, Hanns M. Trautner, 2012-12-06 Numerous publications have addressed gender issues from a social or a developmental psychological perspective. This volume breaks new ground in advancing a genuine synthesis of theory and research from these two disciplines. Building on the premise that a full understanding of the multifaceted nature of gender can be achieved only through a wider focus on processes of development and social influence, the contributors examine theoretical approaches to gender development and

socialization, gender categorization and interpersonal behavior, and group-level and cultural forces that affect gender socialization and behavior. The book will be of interest to students and professionals in social psychology, developmental psychology, gender studies, sociology, anthropology, and educational psychology.

Social Communication Klaus Fiedler, 2011-03-15 This volume is devoted to the fascinating topic of social communication - fascinating because communication is ubiquitous, in that one cannot not communicate. And yet, the art of effective communication can be extremely demanding and elusive, because a tricky trade-off problem has to be solved. For communication to be successful, it must be at once informative - somehow indicating an intended direction of thought or action - as well as subtle - somehow concealing intentions and instrumental goals. Failure to meet the former criterion renders communication uncontrolled and haphazard; failure to meet the latter raises suspicion and reactance. The chapters in this volume focus on the tools and repertoires evolved by social communication in order to deal with this demanding trade-off. They represent prominent paradigms of current research at the interface of communication and social psychology, presented by leading scholars who have played crucial roles in the development of those paradigms. The sixteen chapters are grouped into four major sections: communication within and between groups and cultures; strategic communication; social communication, affect, and behaviour regulation; and social communication and adaptive behaviour regulation. Individual chapters are devoted to such intriguing topics as stereotypes and intergroup affairs, language and culture, deception and lie detection, persuasion, discussions in groups, logic of conversation, nonverbal cues, conversational implicatures, the impact of conversation situations and social distance, and the evolution of verbal communication. The volume is framed by an introduction and an epilog. Social Communication is essential reading for senior undergraduates, graduates, and researchers working in the field of social communication, language and social psychology, and related areas in social science such as communication science, linguistics, and gender studies.

The Dismantling of Historic Hungary Ignác Romsics, 2002 The controversial Treaty of Trianon of 1920 whereby Hungary lost one-third of its territory and population to Romania, Czechoslovakia, and Yugoslavia has been the focal point of Hungarian revisionism ever since its inception. This study clarifies both the character of the treaty and the bases of the controversy by reexamining the nationalities, conflicts of the Austro-Hungarian Monarchy, the war aims of World War I, the goals and decision of the Paris Peace Conference, the terms of the Treaty and its execution.

Creo Simulate 3.0 Tutorial Roger Toogood, 2015 Creo Simulate 3.0 Tutorial introduces new users to finite element analysis using Creo Simulate and how it can be used to analyze a variety of problems. The tutorial lessons cover the major concepts and frequently used commands required to progress from a novice to an intermediate user level. The commands are presented in a click-by-click manner using simple examples and exercises that illustrate a broad range of the analysis types that can be performed. In addition to showing the command usage, the text will explain why certain commands are being used and, where appropriate, the relation of commands to the overall Finite Element Analysis (FEA) philosophy are explained. Moreover, since error analysis is an important skill, considerable time is spent exploring the created models so that users will become comfortable with the "debugging" phase of modeling. This textbook is written for first-time FEA users in general and Creo Simulate users in particular. After a brief introduction to finite element modeling, the tutorial introduces the major concepts behind the use of Creo Simulate to perform Finite Element Analysis of parts. These include: modes of operation, element types, design studies (analysis, sensitivity studies, organization), and the major steps for setting up a model (materials, loads, constraints, analysis type), studying convergence of the solution, and viewing the results. Both 2D and 3D problems are treated. This tutorial deals exclusively with operation in integrated mode with Creo Parametric. It is suitable for use with both Releases 3.0 of Creo Simulate.

Textbook Jaan Mikk, 2000 The book has a twofold goal: to give an overview of the research in the area of textbook and to supply textbook authors and editors with the concrete suggestions for composing an effective textbook. The conclusions and suggestions are based on an overview of more than 500 sources of literature and many experimental studies of the author. The first part of the book investigates the methods for textbook evaluation: experiments, expert opinions, and textbook analysis. Special attention is given to the analysis of textbook feasibility before printing and to the exact criteria of appropriateness of textbooks for students of different grades and ability levels. Readability formulae and their use via computer are thoroughly discussed. The second part of the book begins with the rules of clear writing: their basis, the examples of application and efficiency. Beside that, some other important topics are examined: the possibilities of motivating students and arousing their interest in textbooks; the characteristics of influential illustrations and their relations to the text; the value forming aspects of textbooks. Textbooks form students' attitudes to other people, form their goals and self-esteem. This way the textbooks influence the fate of our youth. Textbooks deserve keen attention of society.
