International Financial Statistics, March 2018
International Monetary Fund. Statistics
Dept., 2018-03-01 This paper discusses that for
countries that have introduced new currencies, the
rates shown in International Financial Statistics
(IFS) for the period before the introduction of
the most recent currency may be used as conversion
factors—they may be used to convert national
currency in IFS to US dollar or SDR. In such
cases, the factors are constructed by chain
linking the exchange rates of the old and the new
currencies. The basis used is the value of the new
currency relative to the old currency, as
established by the issuing agency at the time the
new currency was introduced. Notes on the
introduction of new currencies can be found in the
Country Notes or in IFS print publication (if
recent). Data on members' IMF accounts are
presented in the Fund Position section in the
country tables and in four world tables. Terms and
concepts of IMF accounts and the time series in
the country and world tables are explained below.
