Multi - Girl - Culture Linda Duits, 2008 In this highly readable book, Linda Duits investigates girl culture in the Dutch multicultural society. Her ethnographic account provides a thick description of life at school, still the most prominent setting for today's youth. She followed young girls of diverse ethnic backgrounds in their transition from primary to secondary school, focusing on the ways they use the body, clothing and media in their performance of identity. Countering several media hypes, including the internet generation, the headscarf debate and the sexualisation of society, Duits shows how contemporary girl culture is a mundane culture that is reflexively negotiated in an everyday setting.

Data Model Scorecard Steve Hoberman, 2015-11-01 Data models are the main medium used to communicate data

requirements from business to IT, and within IT from analysts, modelers, and architects, to database designers and developers. Therefore it's essential to get the data model right. But how do you determine right? That's where the Data Model Scorecard® comes in. The Data Model Scorecard is a data model quality scoring tool containing ten categories aimed at improving the quality of your organization's data models. Many of my consulting assignments are dedicated to applying the Data Model Scorecard to my client's data models - I will show you how to apply the Scorecard in this book. This book, written for people who build, use, or review data models, contains the Data Model Scorecard template and an explanation along with many examples of each of the ten Scorecard categories. There are three sections: In Section I, Data Modeling and the Need for Validation, receive a short data modeling primer in Chapter 1, understand why it is important to get the data model right in Chapter 2, and learn about the Data Model Scorecard in Chapter 3. In Section II, Data Model Scorecard Categories, we will explain each of the ten categories of the Data Model Scorecard. There are ten chapters in this section, each chapter dedicated to a specific Scorecard category: · Chapter 4: Correctness · Chapter 5: Completeness · Chapter 6: Scheme · Chapter 7: Structure · Chapter 8: Abstraction · Chapter 9: Standards · Chapter 10: Readability · Chapter 11: Definitions · Chapter 12: Consistency · Chapter 13: Data In Section III, Validating Data Models, we will prepare for the model review (Chapter 14), cover tips to help during the model review (Chapter 15), and then review a data model based upon an actual project (Chapter 16).

Love and Hate in Jamestown David A. Price, 2007-12-18 A New York Times Notable Book and a San Jose Mercury News Top 20 Nonfiction Book of 2003 In 1606, approximately 105 British colonists sailed to America, seeking gold and a trade route to the Pacific. Instead, they found disease, hunger, and hostile natives. Ill prepared for such hardship, the men responded with incompetence and infighting; only the leadership of Captain John Smith averted doom for the first permanent English settlement in the New World. The Jamestown colony is one of the great survival stories of American history, and this book brings it fully to life for the first time. Drawing on extensive original documents, David A. Price paints intimate portraits of the major figures from the formidable monarch Chief Powhatan, to the resourceful but unpopular leader John Smith, to the spirited Pocahontas, who twice saved Smith's life. He also gives a rare balanced view of relations between the settlers and the natives and debunks popular myths about the colony. This is a superb work of history, reminding us of the horrors and heroism that marked the dawning of our nation.

Data Quality Management with Semantic Technologies Christian Fürber, 2015-12-11 Christian Fürber investigates the useful application of semantic technologies for the area of data quality management. Based on a literature analysis of typical data quality problems and typical activities of data quality management processes, he develops the Semantic Data Quality Management framework as the major contribution of this thesis. The SDQM framework consists of three components that are evaluated in two different use cases. Moreover, this thesis compares the framework to conventional data quality software. Besides the framework, this thesis delivers important theoretical findings, namely a comprehensive typology of data quality problems, ten generic data requirement types, a requirement-centric data quality management process, and an analysis of related work.

From Idea to Web Start-up in 21 Days Jason Glaspey, Scott Kveton, 2010-09-29 Once upon a time, starting a business meant months of researching, refining business goals and writing business plans, talking to investors and banks, negotiating for loans, and raising money. But today, agile web development practices mean that you can almost launch on an idea and figure it out as you go. At least that's what authors Jason Glaspey and Scott Kveton and their colleague Michael Richardson did when starting bacn.com, an online bacon retailer. In this mouth-watering tale, they describe their process of starting a business on a shoestring, including the things they did right and the things they did wrong. Bacn.com didn't make them millionaires – not even close! But the lessons they learned have led to comfortable success on their follow-up ventures. And whether it's choosing a domain name or selecting the right content management systems, buying and storing inventory or figuring out fulfillment, using social media

for marketing or finding a location to host an “epic” party, their stories will help you jumpstart your own web business.

Feminism for Girls (RLE Feminist Theory) Angela McRobbie, Trisha McCabe, 2012-11-12 Feminism for Girls presents feminist perspectives on aspects of adolescence which have been chosen for their special relevance to the lives and experiences of girls and young women today. Illustrated throughout, chapters cover themes and topics which include romance and sexuality, girls' magazines, careers and the reality of being a black girl in society today. Housewives look back at their youth and a sixteen-year-old girl writes vividly about what it's like trying to break out of the mould that parents and others so often expect for girls. This book is written for girls and young women themselves and for people who are, like the contributors, currently teaching or working with girls.
