*Cell Signaling in Host-Pathogen Interactions: The Host Point of View* Diana Bahia, Abhay Satoskar, Olivier Dussurget, 2018-03-23 The ability of pathogens, such as parasites, bacteria, fungi and viruses to invade, persist and adapt in both invertebrate and vertebrate hosts is multifactorial and depends on both pathogen and host fitness. Communication between a pathogen and its host relies on a wide and dynamic array of molecular interactions. Through this constant communication most pathogens evolved to be relatively benign, whereas killing of its host by a pathogen represents a failure to adapt. Pathogens are lethal to their host when their interaction has not been long enough for adaptation. Evolution has selected conserved immune receptors that recognize signature patterns of pathogens as non-self elements and initiate host innate responses aimed at eradicating infection. Conversely, pathogens evolved mechanisms to evade immune recognition and subvert cytokine secretion in order to survive, replicate and cause disease. The cell signaling machinery is a critical component of the immune system that relays information from the receptors to the nucleus where transcription of key immune genes is activated. Host cells have developed signal transduction systems to maintain homeostasis with pathogens. Most cellular processes and cell signaling pathways are tightly regulated by protein phosphorylation in which protein kinases are key protagonists. Pathogens have developed multiple mechanisms to subvert important signal transduction pathways such as the mitogen activated protein kinase (MAPK) and the nuclear factor  $\kappa$ B (NF- $\kappa$ B) pathways. Pathogens also secrete effectors that manipulate actin cytoskeleton and its regulators, hijack cell cycle machinery and alter vesicular trafficking. This research topic focuses on the cellular signaling mechanisms that are essential for host immunity and their subversion by pathogens.

**Diasporic Hallyu** Kyong Yoon, 2022-04-02 This open access book examines the lived experiences of diasporic Korean youth in light of the transnational flows of South Korean popular culture, known as the Korean Wave, or Hallyu. Drawing on an ethnographic study of Korean Canadian youth and their engagement with the Korean Wave, the book proposes a critical understanding of the interactions between diasporic youth audiences and popular culture. By examining the Korean Wave as diasporic cultural

practices rather than the diffusion of national cultural products, the book reveals the diversified ways in which cultural flows are negotiated by audiences who take up relatively ambivalent reception positions between two or more national and cultural contexts. This book expands the scope of transnational audience studies and youth cultural studies by focusing attention on the diasporic media practices of young people.

India and Nuclear Asia Yogesh Joshi, Frank O'Donnell, 2018-11-01 India's nuclear profile, doctrine, and practices have evolved rapidly since the country's nuclear breakout in 1998. However, the outside world's understanding of India's doctrinal debates, forward-looking strategy, and technical developments are still two decades behind the present. *India and Nuclear Asia* will fill that gap in our knowledge by focusing on the post-1998 evolution of Indian nuclear thought, its arsenal, the triangular rivalry with Pakistan and China, and New Delhi's nonproliferation policy approaches. Yogesh Joshi and Frank O'Donnell show how India's nuclear trajectory has evolved in response to domestic, regional, and global drivers. The authors argue that emerging trends in all three states are elevating risks of regional inadvertent and accidental escalation. These include the forthcoming launch of naval nuclear forces within an environment of contested maritime boundaries; the growing employment of dual-use delivery vehicles; and the emerging preferences of all three states to employ missiles early in a conflict. These dangers are amplified by the near-absence of substantive nuclear dialogue between these states, and the growing ambiguity of regional strategic intentions. Based on primary-source research and interviews, this book will be important reading for scholars and students of nuclear deterrence and India's international relations, as well as for military, defense contractor, and policy audiences both within and outside South Asia.

Transnational Hallyu Dal Yong Jin, Kyong Yoon, Wonjung Min, 2021-06-29 While the influence of Western, Anglophone popular culture has continued in the global cultural market, the Korean cultural industry has substantially developed and globally exported its various cultural products, such as television programs, pop music, video games and films. The global circulation of Korean popular culture is known as the Korean wave, or Hallyu. Given its empirical scope and theoretical contributions, this book will be highly appealing to any scholar or student interested in media globalization and contemporary Asia popular culture. These chapters present the evolution of Hallyu as a transnational process and addresses two distinctive aspects of the recent Hallyu phenomenon - digital technology integration and global reach. This book will be the first monograph to comprehensively and comparatively examine the translational flows of Hallyu through extensive field studies conducted in the US, Canada, Chile, Spain and Germany.

**Phylogenomic Data Acquisition** W. Bryan Jennings,2016-12-12 Phylogenomics is a rapidly growing field of study concerned with using genome-wide data—usually in the form of DNA sequence loci—to infer the evolution of genes, genomes, and the Tree of Life. Accordingly, this discipline connects many areas in biology including molecular and genomic evolution, systems biology, molecular systematics, phylogeography, conservation genetics, DNA barcoding, and others. With the advent of Next Generation Sequencing in addition to advances in computer hardware and software over the past decade, researchers can now generate unparalleled phylogenomic datasets that are helping to illuminate many areas in the life sciences. This book is an introduction to the principles and practices of gathering these data. *Phylogenomic Data Acquisition: Principles and Practice* is intended for a broad cross-section of biologists and anyone else interested in learning how to obtain phylogenomic data using the latest methods.

**New Media Spectacles and Multimodal Creativity in a Globalised Asia** Sunny Sui-kwong Lam,2020-11-20 This edited volume aims to unpack the digitisation of art and media within the dynamics of participatory culture, and how these changes affect the power relations between the production and consumption of these new forms in a globalised Asia. This follows the rise of new art forms and social media platforms in wake of rapid and ongoing digitisation, which has, in turn, produced far-reaching implications for changing media ownership and its role in social, cultural, economic, as well as political activities. New challenges arise every day in relation to digital art and design practices and social media communications, and their respective impact on identity politics. This book showcases a diverse range of interdisciplinary research on these concomitant changes and challenges associated with digital media and technologies within the context of a globalised Asia. The case studies included present perspectives on Asia's evolving digital humanities landscape from Hong Kong, China, India, Korea and from across Southeast Asia, with topics that tackle organisational digital marketing, brand advertising and design, mobile gaming, interactive art, and the cultural activities of ethnic and sexual minority communities in the region. This book will of interest to scholars in digital humanities focused on new media and cultural studies.
