Tropical Colors Sakul Intakul, Wongvipa Devahastin Na Ayudhya, 2012-10-30 In this stunning book, renowned Thai floral artist Sakul Intakul combines colorful tropical flowers, exotic foliage and other unusual design materials in refreshingly original floral displays suitable for any occasion and any setting. Photographed in the spectacular, contemporary homes of Thailand's leading artists, designers and professionals, the simple but imaginative floral displays evoke the essence of a modern Asian style. This refreshingly original book goes beyond the everyday—elevating tropical flowers from mere floral arrangements to meditative floral art installations that serve as dramatic design centerpieces in contemporary tropical homes. Created from a combination of exotic and colorful tropical flowers, plant materials—fibers and leaves from the banana and coconut, twigs from the bamboo—and other less orthodox materials like wire netting, the arrangements harmoniously blend a strong, usually three-dimensional structure with the sweet and subtle elements of flowers. Allow *Tropical Colors* to inspire you, adding a gorgeous Asian flair to your home!

Botany, sexuality and women's writing, 1760-1830 Sam George, 2017-10-03 In this fascinating study, Samantha George explores the cultivation of the female mind and the feminised discourse of botanical literature in eighteenth-century Britain. In particular, she discusses British women's engagement with the Swedish botanist, Carl Linnaeus, and his unsettling discovery of plant sexuality. Previously ignored primary texts of an extraordinary nature are rescued from obscurity and assigned a proper place in the histories of science, eighteenth-century literature, and women's writing. The result is groundbreaking: the author explores nationality and sexuality debates in relation to botany and charts the appearance of a new literary stereotype, the sexually precocious female botanist. She uncovers an anonymous poem on Linnaean botany, handwritten in the eighteenth century, and subsequently traces the development of a new genre of women's writing — the botanical poem with scientific notes. The book is indispensable reading for all scholars of the eighteenth century, especially those interested in Romantic women's writing, or the relationship between literature and science.
