Taxation and State-Building in Developing Countries Deborah Brautigam, Odd-Helge Fjeldstad, Mick Moore, 2008-01-10 There is a widespread concern that, in some parts of the world, governments are unable to exercise effective authority. When governments fail, more sinister forces thrive: warlords, arms smugglers, narcotics enterprises, kidnap gangs, terrorist networks, armed militias. Why do governments fail? This book explores an old idea that has returned to prominence: that authority, effectiveness, accountability and responsiveness is closely related to the ways in which governments are financed. It matters that governments tax their citizens rather than live from oil revenues and foreign aid, and it matters how they tax them. Taxation stimulates demands for representation, and an effective revenue authority is the central pillar of state capacity. Using case studies from Africa, Asia, Eastern Europe and Latin America, this book presents and evaluates these arguments, updates theories derived from European history in the light of conditions in

contemporary poorer countries, and draws conclusions for policy-makers.

Macroeconomic Effects of VAT in Nigeria David Olusanya Ishola Ajakaiye, 1999

Economic and Financial Crime Monica Violeta Achim, Sorin Nicolae Borlea, 2020-08-29 This book deals with the widespread economic and financial crime issues of corruption, the shadow economy and money laundering. It investigates both the theoretical and practical aspects of these crimes, identifying their effects on economic, social and political life. This book presents these causes and effects with a state of the art review and with recent empirical research. It compares the international and transnational aspects of these economic and financial crimes through discussion and critical analysis. This volume will be of interest to researchers and policy makers working to study and prevent economic and financial crime, white collar crime, and organized crime.

Fiscal Decentralization and Local Finance in Developing Countries Roy Bahl, Richard M. Bird, 2018-03-30 This book draws on experiences in developing countries to bridge the gap between the conventional textbook treatment of fiscal decentralization and the actual practice of subnational government finance. The extensive literature about the theory and practice is surveyed and longstanding problems and new questions are addressed. It focuses on the key choices that must be made in decentralizing, on how economic and political factors shape the choices that countries make, and on how, by paying more attention to the need for a more comprehensive approach and the critical connections between different components of decentralization reform, everyone involved might get more for their money.

Tax Systems Joel Slemrod, Christian Gillitzer, 2013-12-13 An approach to taxation that goes beyond an emphasis on tax rates to consider such aspects as administration, compliance, and remittance. Despite its theoretical elegance, the standard optimal tax model has significant

limitations. In this book, Joel Slemrod and Christian Gillitzer argue that tax analysis must move beyond the emphasis on optimal tax rates and bases to consider such aspects of taxation as administration, compliance, and remittance. Slemrod and Gillitzer explore what they term a tax-systems approach, which takes tax evasion seriously; revisits the issue of remittance, or who writes the check to cover tax liability (employer or employee, retailer or consumer); incorporates administrative and compliance costs; recognizes a range of behavioral responses to tax rates; considers nonstandard instruments, including tax base breadth and enforcement effort; and acknowledges that tighter enforcement is sometimes a more socially desirable way to raise revenue than an increase in statutory tax rates. Policy makers, Slemrod and Gillitzer argue, would be well advised to recognize the interrelationship of tax rates, bases, enforcement, and administration, and acknowledge that tax policy is really tax-systems policy.
