Practice-Driven Research on Enterprise Transformation Frank Harmsen,Knut Grahlmann,Erik Proper,2011-09-05 This volume constitutes the proceedings of the Third Working Conference on Practice-Driven Research on Enterprise Transformation (PRET), held in Luxembourg, on September 6, 2010, as the industrial track of the 13th IEEE Conference on Commerce and Enterprise Computing (CEC 2011). The third edition of PRET marks a close collaboration between academia and practice. With the specific purpose of mutual learning and crossfertilization, top practitioners from industry were invited to submit case studies. To give them enough space for presentation, only four academic papers were accepted. These papers were submitted with a length of 25 pages to enable a more detailed coverage of the related research and to stimulate further discussions during the conference. The topics covered are Enterprise Architecture, Business and IT Alignment, and Business Process Management and Evaluation.

Computerworld ,1997-01-13 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Skywriting Jane Pauley,2004-08-24 "Truth arrives in microscopic increments, and when enough has accumulated-in a moment of recognition, you just know. You know because the truth fits. I was the only member of my family to lack the gene for numbers, but I do need things to add up. Approaching midlife, I became aware of a darkening feeling--was it something heavy on my heart, or was something missing? Grateful as I am for the opportunities I've had, and especially for the people who came into my life as a result, I couldn't ignore this feeling. I had the impulse to begin a conversation with myself, through writing, as if to see if my fingers could get to the bottom of it. It was a Saturday morning eight or ten years ago when I began following this impulse to find the answers to unformed questions. Skywriting is what I call my personal process of discovery." And so begins this beautiful and surprising memoir, in which beloved broadcast journalist Jane Pauley tells a remarkable story of self-discovery and an extraordinary life, from her childhood in the American heartland to her three decades in television. Encompassing her beginnings at the local Indianapolis station and her bright debut--at age twenty-five on NBC's Today and later on Dateline--Pauley forthrightly delves into the ups and downs of a fantastic career. But there is much more to Jane Pauley than just the famous face on TVs. In this memoir, she reveals herself to be a brilliant woman with singular insights. She explores her roots growing up in Indiana and discusses the resiliency of the American family, and addresses with humor and depth a subject very close to her heart: discovering yourself and redefining your strengths at midlife. Striking, moving, candid, and unique, Skywriting explores firsthand the difficulty and the rewards of self-reinvention.

Digital Economy: Complexity and Variety vs. Rationality Elena G. Popkova,Bruno S. Sergi,2019-09-14 This proceedings book features selected papers from the 9th National Scientific and Practical Conference "Digital Economy: Complexity and Variety Vs. Rationality," which took place on April 17-18, 2019, in Vladimir (Russian Federation). It presents the latest research in the field of the digital economy, discussing its role in the creation of advantages for the state, entrepreneurship, and society, as well as the emergence of new economic risks. The chapters address the following topics: the importance of economy's digital modernization, tools for the formation of the digital economy in Russia, specific features and perspectives of digital modernization of the regional economy, an overview of the social consequences of transition to the digital economy, financial components of the digital economy, legal challenges regarding the digital reality for society and state, and the main challenges and threats to the profession of jurisprudence in the context of the digitization of the economy. Intended for representatives of the academic community and researchers interested in the formation of the digital economy and digital society as well as undergraduates, postgraduates, and masters of economic specialties, the book is also a valuable resource for companies that use or wishing to implement digital technologies into their economic practices; and public and government employees involved with monitoring, control, and regulation of the digital economy.

Marketing Theory Michael J Baker,Michael Saren,2016-05-16 Marketing Theory introduces and explains the role of theory in marketing by uncovering its histories, disciplinary underpinnings, subfields, discourses and debates. From strategy and ethics to digital marketing and consumer behaviour, leading marketing experts shine a light on what can be a challenging perspective of marketing. In this new Third Edition there are up-to-date examples from global companies such as Pepsi, Amazon and H&M; entirely new chapters on Digital and Social Media Marketing, and Service-Dominant Logic (SD-L) and contributions from Global Specialists including Bob Lusch, Patrick Murphy and Susan Hart. Ideal for Upper level undergraduate and postgraduate marketing students studying marketing theory, critical marketing, and the history of marketing modules.

I Am Restored Lecrae Moore,2020-10-13 When the challenges you've faced threaten to destroy your life, how do you find your way back to the truths you thought you believed? I Am Restored tells the untold story of how Lecrae's past nearly ruined his future--until he learned that the wounds we carry can have the potential to be unlikely guides to healing and freedom for ourselves and others. Throughout I Am Restored, Lecrae documents the shattering yet hopeful story of how he faced the scars of his past--sexual abuse, physical trauma, addiction, and depression--and emerged more fully human than ever before. With remarkable transparency and vulnerability, Lecrae reveals that at the height of his professional success, his life was spinning out of control, driven by a past that he had never confronted and a religious perspective that was incapable of meeting the challenge. I Am Restored takes an unflinching look at the personal and public spaces that are too often at the societal core of our pain and heartache--culture, politics, family, church, and more--and teaches us that forgiveness can be the birthplace of the life that God has created for us. Throughout this powerful, deeply personal account, Lecrae shares the life lessons he's learned about: Confronting the pain and trauma that has shaped your story Breaking the cycle of sin and shame and embracing joy and authenticity Finding hope and healing in the midst of chaos The simple practices that can change your mental, emotional, and spiritual health Leading a life that's bursting with creativity and true freedom I Am Restored is a hopeful, inspiring charge to start your journey to lasting healing today. No matter what your past

has held, God is near you, he hears you, and he's not done writing your story.

Robo-Advisory Peter Scholz,2020-12-28 Robo-Advisory is a field that has gained momentum over recent years, propelled by the increasing digitalization and automation of global financial markets. More and more money has been flowing into automated advisory, raising essential questions regarding the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field.

Transforming Management with AI, Big-Data, and IoT Fadi Al-Turjman,Satya Prakash Yadav,Manoj Kumar,Vibhash Yadav,Thompson Stephan,2022-02-17 This book discusses the effect that artificial intelligence (AI) and Internet of Things (IoT) have on industry. The authors start by showing how the application of these technologies has already stretched across domains such as law, political science, policy, and economics and how it will soon permeate areas of autonomous transportation, education, and space exploration, only to name a few. The authors then discuss applications in a variety of industries. Throughout the volume, the authors provide detailed, well-illustrated treatments of each topic with abundant examples and exercises. This book provides relevant theoretical frameworks and the latest empirical research findings in various applications. The book is written for professionals who want to improve their understanding of the strategic role of trust at different levels of the information and knowledge society, that is, trust at the level of the global economy, of networks and organizations, of teams and work groups, of information systems and, finally, trust at the level of individuals as actors in the networked environments. Presents research in various industries and how artificial intelligence and Internet of Things is changing the landscape of business and management; Includes new and innovative features in artificial intelligence and IoT that can help in raising economic efficiency at both micro and macro levels; Examines case studies with tried and tested approaches to resolution of typical problems in each application of study.
