Allison Morehead

**The Experience of Nature** Rachel Kaplan, Stephen

Kaplan, 1989-07-28

**Experience and Nature** John Dewey, 2012-04-18 Analysis and evaluation of problem of knowledge, other systems, formulation of law, role of language, social factors.

**Managing Visitor Experiences in Nature-based Tourism** Julia N. Albrecht, 2021-03-19 This book focuses on the experiences of tourists visiting nature-based destinations, exploring current knowledge and providing insights into conceptual issues through the use of empirical evidence from five continents. Presented as three topics, the contents discuss tourism and naturebased experiences by looking at the role and relevance of nature and the uniqueness of such experiences. The book identifies visitor management challenges and provides explanations for the solutions reached. The final section takes a more overarching destination management perspective that transcends the tourism product or business level and focuses on destination and generic issues like indicators or marketing implications. The book also includes research-based case studies which contribute to an overall understanding of the core issues involved in managing visitor experiences in nature-based tourism.

Consciousness Inside and Out: Phenomenology, Neuroscience, and the Nature of Experience Richard Brown, 2013-08-23 This volume is product of the third online consciousness conference, held at <http://consciousnessonline.com> in February and March 2011. Chapters range over epistemological issues in the science and philosophy of perception, what neuroscience can do to help us solve philosophical issues in the philosophy of mind, what the true nature of black and white vision, pain, auditory, olfactory, or multi-modal experiences are,

to higher-order theories of consciousness, synesthesia, among others. Each chapter includes a target article, commentaries, and in most cases, a final response from the author. Though wide-ranging all of the papers aim to understand consciousness both from the inside, as we experience it, and from the outside as we encounter it in our science. The Online Consciousness Conference, founded and organized by Richard Brown, is dedicated to the rigorous study of consciousness and mind. The goal is to bring philosophers, scientists, and interested lay persons together in an online venue to promote high-level discussion and exchanging of views, ideas and data related to the scientific and philosophical study of consciousness.

**Nature and Experience** Bryan Bannon, 2016-05-18 This volume presents essays assessing the contributions phenomenology has to make to environmental studies.

John Dewey's Theory of Art, Experience, and Nature Thomas M. Alexander, 2012-02-16 Thomas Alexander shows that the primary, guiding concern of Dewey's philosophy is his theory of aesthetic experience. He directly challenges those critics, most notably Stephen Pepper and Benedetto Croce, who argued that this area is the least consistent part of Dewey's thought. The author demonstrates that the fundamental concept in Dewey's system is that of experience and that paradigmatic treatment of experience is to be found in Dewey's analysis of aesthetics and art. The confusions resulting from the neglect of this orientation have led to prolonged misunderstandings, eventual neglect, and unwarranted popularity for ideas at odds with the genuine thrust of Dewey's philosophical concerns. By exposing the underlying aesthetic foundations of Dewey's philosophy, Alexander aims to rectify many of these errors, generating a fruitful new interest in Dewey.

*My Various Nature Experiences* John T. Rogers, 2023-11-29 About the Book *My Various Nature Experiences* is a compilation of autobiographical short stories that detail John Rogers' experiences over the years with the flora and fauna that Mother Nature has allowed him to be a part of. It is Rogers' deepest wish that readers will relate to the animals and actions that are involved and that they are inspired to remember their own involvement with nature. For those who have not witnessed what nature has to offer firsthand, challenge yourself to frequent not just your local parks and zoos, but to travel to new places where nature can be seen and enjoyed in-person. About the Author John T. Rogers is very fortunate to have been raised in northern Wyoming and to teach school in North Dakota and Montana. These areas have allowed him to live in sparsely populated regions where he was able to observe and be a part of the actions of animals as they lived and competed with each other in Mother Nature's land. He is delighted to share these experiences with readers. With his ongoing love for nature and his hobbies of fishing and prospecting, he's sure that many more exciting stories will find their way into his life.

### ***Nature and Experience in the Culture of Delusion* D.**

Kidner, 2012-03-06 While the historical development of symbolic power has benefitted humanity enormously, there is an insidious and seldom recognised price that goes beyond environmental degradation and cultural disintegration. With insights from both social and natural sciences, this book explores the changing character of subjectivity in contemporary life.

### **Nature Experiences Around the World Alleyn**

Plowright, 2021-11-22 This book shares a broad variety of nature adventures and experiences from across the globe in the form of short accounts, ranging from polar bears and orcas in the Arctic, to pangolins

in Africa and jaguars and quetzals in South America, whilst either hiking, from a vehicle, cycling or in water. Many colour photographs are included to display the scenes. The experiences have been both emotional and inspirational, such as witnessing peregrine falcon chicks grow and fledge, observing great white sharks in their natural habitat, being snuck up on by a young gorilla and checked out by curious penguins. There is so much to explore, observe and learn with opportunities for natural experiences and inspiration all around. This book aims at providing knowledge, entertainment, sharing the beauty, and giving inspiration for the planet where we all live.

**From Nature to Experience** Roger Lundin, 2007 This is Volume Two, the second of two volumes which describe techniques for the inspection of railroad track in the United States. Track inspection is described from the personal perspective of a retired railroad and Federal Railroad Administration track inspector. This volume covers rail flaws, crossties, continuous welded rail, and other structural conditions. Volume Two ends with a chapter on new automated inspection systems. The book is recommended for new and experienced railroad track inspectors and anyone interested in railroad track safety.

*Place, Nature and Spirit - A Lake District Experience* Nigel Hammett, 2012-05-01 This book uses some of the poetry of William Wordsworth to examine the changed aesthetic of landscape at the heart of the Romantic Era. Wordsworth was the greatest figure of the English Lake District and his work looked forward to the conservationist and environmental movement of the modern era.

On King Lear, The Confessions, and Human Experience and Nature Kim Paffenroth, 2021-05-20 Augustine's Confessions and Shakespeare's King Lear are two of the most influential and enduring

works of the Western canon or world literature. But what does Stratford-upon-Avon have to do with Hippo, or the ascetical heretic-fighting polemicist with the author of some of the world's most beautiful love poetry? To answer these questions, Kim Paffenroth analyses the similarities and differences between the thinking of these two figures on the themes of love, language, nature and reason. Pairing and connecting the insights of Shakespeare's most nihilist tragedy with those of Augustine's most personal and sometimes self-condemnatory, sometimes triumphal work, challenges us to see their worldviews as more similar than they first seem, and as more relevant to our own fragmented and disillusioned world.

*Handbook of Environmental Psychology and Quality of Life*

Research Ghazlane Fleury-Bahi, Enric Pol, Oscar Navarro, 2016-08-12

This Handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces, and shows how this original analytical framework can be used to understand different environmental and societal issues. Adopting an original approach, this Handbook focuses on the links with other specialties in psychology, especially social and health psychology, together with other disciplines such as geography, architecture, sociology, anthropology, urbanism and engineering. Faced with the problems of society which involve the quality of life of individuals and communities, it is fundamental to consider the relationships an individual has with his different living spaces. This issue of the links between quality of life and environment is becoming increasingly significant with, at a local level, problems resulting from different types of annoyances, such as pollution and noise, while, at a global level, there is the central question of climate change with its harmful consequences for humans

and the planet. How can the impact on well-being of environmental nuisances and threats (for example, natural risks, pollution, and noise) be reduced? How can the quality of life within daily living spaces (home, cities, work environments) be improved? Why is it important to understand the psychological issues of our relationship with the global environment (climatic warming, ecological behaviours)? This Handbook is intended not only for students of various disciplines (geography, architecture, psychology, town planning, etc.) but also for social decision-makers and players who will find in it both theoretical and methodological perspectives, so that psychological and environmental dimensions can be better taken into account in their working practices.

**Nature's Comedian** William Edward Norris, 1904

Experiencing Nature P. Theerman, Karen Hunger

Parshall, 1997-04-30 This volume, honoring the renowned historian of science, Allen G Debus, explores ideas of science - 'experiences of nature' - from within a historiographical tradition that Debus has done much to define. As his work shows, the sciences do not develop exclusively as a result of a progressive and inexorable logic of discovery. A wide variety of extra-scientific factors, deriving from changing intellectual contexts and differing social milieus, play crucial roles in the overall development of scientific thought. These essays represent case studies in a broad range of scientific settings - from sixteenth-century astronomy and medicine, through nineteenth-century biology and mathematics, to the social sciences in the twentieth-century - that show the impact of both social settings and the cross-fertilization of ideas on the formation of science. Aimed at a general audience interested in the history of science, this book closes with Debus's personal perspective on the development of the field.

Audience: This book will appeal especially to historians of science, of chemistry, and of medicine.

**A Treatise on Religious Experience: in which Its Nature, Evidences, and Advantages are Considered** Rev. Charles BUCK, 1820

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth-century modernist practices. Looking at avant-garde figures such as Maurice Denis, Édouard Vuillard, August Strindberg, and Edvard Munch, Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes. She shows how the concept of “nature’s experiments”—the belief that the study of pathologies led to an understanding of scientific truths, above all about the human mind and body—extended from the scientific realm into the world of art, underpinned artists’ solutions to the problem of symbolist form, and provided a ready-made methodology for fin-de-siècle truth seekers. By using experimental methods to transform symbolist theories into visual form, these artists broke from naturalist modes and interrogated concepts such as deformation, automatism, the arabesque, and madness to create modern works that were radically and usefully strange. Focusing on the scientific, psychological, and experimental tactics of symbolism, *Nature’s Experiments and the Search for Symbolist Form* demystifies the avant-garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism.

*The Varieties of Religious Experience: A Study in Human Nature*

William James, 2015-09-04 The Best Nonfiction Masterpiece of the 20th Century? "There are two lives, the natural and the spiritual, and we must lose the one before we can participate in the other." -

William James, *The Varieties of Religious Experience: A Study in Human Nature* The Varieties of Religious Experience: A Study in Human Nature is not a book about a specific religion. The author, psychologist William James does not try to convince the reader one religion is better than the other. He doesn't even make a case for atheism and the scientific approach. The book is in fact about human nature and how we experience religion at a psychological level. Xist Publishing is a digital-first publisher.
