Solve for Happy Mo Gawdat,2017-03-21 In this “powerful personal story woven with a rich analysis of what we all seek” (Sergey Brin, cofounder of Google), Mo Gawdat, Chief Business Officer at Google’s [X], applies his superior logic and problem solving skills to understand how the brain processes joy and sadness—and then he solves for happy. In 2001 Mo Gawdat realized that despite his incredible success, he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would: examining all the provable facts and scrupulously applying logic. Eventually, his countless hours of research and science proved successful, and he discovered the equation for permanent happiness. Thirteen years later, Mo’s algorithm would be put to the ultimate test. After the sudden death of his son, Ali, Mo and his family turned to his equation—and it saved them from despair. In dealing with the horrible loss, Mo found his mission: he would pull off the type of “moonshot” goal that he and his colleagues were always aiming for—he would share his equation with the world and help as many people as possible become happier. In Solve for Happy Mo questions some of the most fundamental aspects of our existence, shares the underlying reasons for suffering, and plots out a step-by-step process for achieving lifelong happiness and enduring contentment. He shows us how to view life through a clear lens, teaching us how to dispel the illusions that cloud our thinking; overcome the brain’s blind spots; and embrace five ultimate truths. No matter what obstacles we face, what burdens we bear, what trials we’ve experienced, we can all be content with our present situation and optimistic about the future.

One Hundred Years of Solitude Gabriel García Márquez,2022-10-11 One of the twentieth century’s enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world and the ultimate achievement in a Nobel Prize–winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendía family. Rich and brilliant, it is a chronicle of life, death, and the tragicomedy of humankind. In the beautiful, ridiculous, and tawdry story of the Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility, the variety of life, the endlessness of death, the search for peace and truth—these universal themes dominate the novel. Alternately reverential and comical, One Hundred Years of Solitude weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an account of the history of the human race.

The Politics Industry Katherine M. Gehl,Michael E. Porter,2020-06-23 Leading political innovation activist Katherine Gehl and world-renowned business strategist Michael Porter bring fresh perspective, deep scholarship, and a real and actionable solution, Final Five Voting, to the grand challenge of our broken political and democratic system. Final Five Voting has already been adopted in Alaska and is being advanced in states across the country. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In The Politics Industry, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. The Politics Industry is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

The Effective Executive Peter Drucker,2018-03-09 The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness, and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and seemingly trite situations.

Designing for Emotion Aarron Walter,2020 Inspiring guidance for the principles of designing for humans.

The Sports Gene David Epstein,2014-04-29 The New York Times bestseller – with a new afterword about early specialization in youth sports – from the author of *Range: Why Generalists Triumph in a Specialized World*. The debate is as old as physical competition. Are stars like Usain Bolt, Michael Phelps, and Serena Williams genetic freaks put on Earth to dominate their respective sports? Or are they simply normal people who overcame their biological limits through sheer force of will and obsessive training? In this controversial and engaging exploration of athletic success and the so-called 10,000-hour rule, David Epstein tackles the great nature vs. nurture debate and traces how far science has come in solving it. Through on-the-ground reporting from below the equator and above the Arctic Circle, revealing conversations with leading scientists and Olympic champions, and interviews with athletes who have rare genetic mutations or physical traits, Epstein forces us to rethink the very nature of athleticism.

Loving Bravely Alexandra H. Solomon,2017-02-02 As seen on The TODAY Show! “A godsend to anyone searching for, but struggling to find, true love in their lives.” —Kristin Neff, PhD, author of *Self-Compassion Empowering and compassionate*, and its lessons are universal. —Publishers Weekly Real love starts with you. In order to attract a life partner and build a healthy intimate relationship, you must first become a good partner to yourself. This book offers twenty invaluable lessons that will help you explore and commit to your own emotional and psychological well-being so you can be ready, resilient, and confident in love. Many of us enter into romantic relationships full of expectation and hope, only to be sorely disappointed by the realization that the partner we’ve selected is a flawed human being with their own neuroses, history, and desires. Most relationships end because one or both people haven’t done the internal work necessary to develop self-awareness and take responsibility for their own experiences. We’ve all heard “You can’t love anyone unless you love yourself,” but amid life’s distractions and the myth of perfect, romantic love, how exactly do you do that? In *Loving Bravely*, psychologist, professor and relationship expert Alexandra H. Solomon introduces the idea of relational self-awareness, encouraging you to explore your personal history to gain an understanding of your own relational patterns, as well as your strengths and weaknesses in relationships. By doing so, you’ll learn what relationships actually require, beyond the fairytale notions of romance. And by maintaining a steady but gentle focus on yourself, you’ll build the best possible foundation for making a loving connection. By understanding your past relationship experiences, cultivating a strong sense of self-awareness, and determining what it is you really want in a romantic partner—you’ll be ready to find the healthy, lasting love your heart desires.

Social Matthew D. Lieberman,2013-10-08 We are profoundly social creatures--more than we know. In *Social*, renowned psychologist Matthew Lieberman explores groundbreaking research in social neuroscience revealing that our need to connect with other people is even more fundamental, more basic, than our need for food or shelter. Because of this, our brain uses its spare time to learn about the social world--other people and our relation to them. It is believed that we must commit 10,000 hours to master a skill. According to Lieberman, each of us has spent 10,000 hours learning to make sense of people and groups by the time we are ten. *Social* argues that our need to reach out to and connect with others is a primary driver behind our behavior. We believe that pain and pleasure alone guide our actions. Yet, new research using fMRI--including a great deal of original research conducted by Lieberman and his UCLA lab--shows that our brains react to social pain and pleasure in much the same way as they do to physical pain and pleasure. Fortunately, the brain has evolved sophisticated mechanisms for securing our place in the social world. We have a unique ability to read other people’s minds, to figure out their hopes, fears, and motivations, allowing us to effectively coordinate our lives with one another. And our most private sense of who we are is intimately linked to the important people and groups in our lives. This wiring often leads us to restrain our selfish impulses for the greater good. These mechanisms lead to behavior that might seem irrational, but is really just the result of our deep social wiring and necessary for our success as a species. Based on the latest cutting edge research, the findings in *Social* have important real-world implications. Our schools and businesses, for example, attempt to minimize social distractions. But this is exactly the wrong thing to do to encourage engagement and learning, and literally shuts down the social brain, leaving powerful neuro-cognitive resources untapped. The insights revealed in this pioneering book suggest ways to improve learning in schools, make the workplace more productive, and improve our overall well-being.

Connecting Curriculum, Linking Learning Deborah Fraser,Viv Aitken,Barbara Whyte,2013 Teachers and principals know that students learn best when involved, challenged and inspired. An integrated curriculum offers teachers the tools to engage, extend and enthuse students. Yet today's curriculum seems to be narrowing and becoming restrictive. Assessment-driven teaching, reporting to standards and a pronounced emphasis on individual learning in numeracy and literacy now hold sway. Is it possible to balance standards with innovation? What scope is there for teachers and principals to use their initiative? And what of children's learning as they engage in a curriculum that matters to them? Here, an integrated curriculum - negotiated, issues driven, focused on relevant learning areas, with teachers scaffolding learning - offers exciting potential while still enabling the learning of important skills in literacy and numeracy. But there is a chasm in the literature on curriculum integration. Connecting Curriculum, Linking Learning bridges that chasm. Based on current New Zealand classroom research, this book provides vivid portraits of teachers' practice, and reveals the strengths and weaknesses of an integrated approach. Featuring drama as inquiry alongside other arts-inspired approaches to integration, Connecting Curriculum, Linking Learning reflects the ethos of the New Zealand curriculum--Publisher's description.
