Smart Card Research and Advanced Applications VI Jean-Jacques Quisquater, Pierre Paradinas, Yves Deswarte, Anas Abou El Kalam, 2006-04-11 In the Information Society, the smart card, or smart device with its processing power and link to its owner, will be the potential human representation or delegate in Ambient Intelligence (Pervasive Computing), where every appliance or computer will be connected, and where control and trust of the personal environment will be the next decade challenge. Smart card research is of increasing importance as the need for information security grows rapidly. Smart cards will play a very large role in ID management in secure systems. In many computer science areas, smart cards introduce new dimensions and opportunities. Disciplines like hardware design, operating systems, modeling systems, cryptography and distributed systems find new areas of applications or issues; smart cards also create new challenges for these domains. CARDIS, the IFIP Conference on Smart Card Research and Advanced Applications, gathers researchers and technologists who are focused in all aspects of the design, development, deployment, validation and application of smart cards or smart personal devices. This volume contains the 20 papers that have been selected by the CARDIS Program Committee for presentation at the 6th International Conference on Smart Card Research and Advanced Applications (CARDIS 2004), which was held in conjunction with the IFIP 18th World Computer Congress in Toulouse, France in August 2004 and sponsored by the International Federation for Information Processing (IFIP). With 20% of the papers coming from Asia, 20% from America, and 60% from Europe, the competition was particularly severe this year, with only 20 papers selected out of 45 very good submissions. Smart Card Research and Advanced Applications VI presents the latest advances in smart card research and applications, and will be essential reading for developers of smart cards and smart card applications, as well as for computer science researchers in computer architecture, computer security, and cryptography.

The Business Year: Spain 2020, 2020-03-12 In this challenging time for Spain and the world at large, we want to remind readers of the fundamental economic dynamics of the country in order to better assess its business environment. This publication is unique in that it provides a holistic and multisectoral view of development at a point of much political uncertainty, all amidst notable efforts to become a leader of Industry 4.0 in the European bloc. With information straight from the mouths of leaders and decision makers across the economy, it is a comprehensive guide to investment throughout the diverse and industrially-rich regions of Spain. The Business Year's country-specific publications, sometimes featuring over 150 face-to-face interviews, are among the most comprehensive annual economic publications available internationally. This 179-page publication covers finance, green economy, energy, industry, IT and telecoms, transport, real estate, construction, agriculture, education, health, tourism, and retail.

Towards the E-Society Beat Schmid, Katarina Stanoevska, Volker Tschammer, 2006-04-11 I3E 2001 is the first in a series of conferences on e-commerce, e-business, and- government organised by the three IFIP committees TC6, TC8, and TC11. It provides a forum, where users, engineers, and scientists from academia, industry, and government can present their latest findings in e-commerce, e-business, and- government applications and the underlying technology to support those applications. The conference comprises a main track and mini tracks dedicated to special topics. The papers presented in the main track were rigorously refereed and selected by the International Programme Committee of the conference. Thematically they were grouped in the following sessions: – Sessions on security and trust, comprising nine papers referring to both trust and security in general as well as presenting specific concepts for enhancing trust in the digital society. – Session on inter-organisational transactions, covering papers related to auditing of inter-organizational trade procedures, cross-organizational workflow and transactions in Business to Business platforms. – Session on virtual enterprises, encompassing papers describing innovative approaches for creating virtual enterprises as well as describing examples of virtual enterprises in specific industries. – Session on online communities containing three papers, which provide case studies of specific online communities and various concepts on how companies can build and harness the potential of online communities. – Sessions on strategies and business models with papers describing specific business models as well as general overviews of specific approaches for E- Strategy formulation.

China, during December 7–10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and usersinGridcomputing,Webservicesandcooperativecomputing,includingtheoryand applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, signi?cance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The or- nizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers).The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Aust- lia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.

Secure Multi-Party E-Commerce Protocols Cătălin V. Bîrjoveanu,Mirela Bîrjoveanu,2022-06-30 This book presents the state of the art for multi-party fair exchange protocols and provides insight details regarding multi-party applications for buying physical products. The authors tackle the fairness problem in e-commerce protocols for buying physical products in scenarios involving complex and chained transactions and provide use cases of these protocols for B2C and B2B scenarios. The book also includes the formal verification of the fair multi-party exchange e-commerce protocols using the Constraint-Logic-based Attack Searcher from AVISPA, a tool for the Automated Validation of Internet Security Protocols and Applications. This book is mainly targeted to researchers in e-commerce security, yet it shall be interesting as well for professional developers in e-commerce. They all are provided with an understanding of and a starting point for designing secure multi-party e-commerce protocols.

European Fair Trading Law Geraint Howells,Hans-W. Micklitz,Thomas Wilhelmsson,2016-04-22 The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level. It is an umbrella provision, which uses general clauses to protect consumers. How effective this approach is and how it relates the existing acquis are fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing acquis. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.
