ISA TECH/EXPO Technology ISA,International Society for Measurement and Control,1997-01

Bonding in Microsystem Technology Jan A. Dziuban,2007-01-30 This is the first compendium on silicon/glass microsystems made by deep wet etching and the first book with a detailed description of bonding techniques used in microsystem technology. Technological results presented in the book have been tested experimentally by the author and his team, and can be utilized in day-to-day laboratory practice. Special attention has been paid to the highest level of accessibility of the book by students.

Nor-tec Rifa! Alejandro L. Madrid,2008-03-21 At the dawn of the twenty-first century, the Nor-tec phenomenon emerged from the border city of Tijuana and through the Internet, quickly conquered a global audience. Marketed as a kind of ethnic electronic dance music, Nor-tec samples sounds of traditional music from the north of Mexico, and transforms them through computer technology used in European and American techno music and electronica. Tijuana has media links to both Mexico and the United States, with peoples, currencies, and cultural goods--perhaps especially music--from both sides circulating intensely within the city. Older residents and their more mobile, cosmopolitan-minded children thus engage in a constant struggle with identity and nationality, appropriation and authenticity. Nor-tec music in its very composition encapsulates this city's struggle, resonating with issues felt on the global level, while holding vastly different meanings to the variety of communities that embrace it. With

an impressive hybrid of musicology, ethnomusicology, cultural and performance studies, urbanism, and border studies, Nor-tec Rifa! offers compelling insights into the cultural production of Nor-tec as it stems from nortena, banda, and grupera traditions. The book is also among the first to offer detailed accounts of Nor-tec music's composition process.
