Expressing Emotion Eileen Kennedy-Moore, Jeanne C. Watson, 2001-03-01 This volume examines expressions of such feelings as love, anger, and sadness, and highlights the individual and interpersonal processes that shape emotional behavior. It offers a lively and comprehensive discussion of the role of emotional expression and nonexpression in individual adaptation, social interaction, and therapeutic process. Drawing upon extensive theory and research, the authors provide coherent guidelines to

help clinicians, researchers, and students identify, conceptualize, and treat problems in emotional behavior. This guide is an important resource for teachers, students, and researchers of clinical, counseling, social, personality, and health psychology, as well as practicing counselors and psychotherapists. It will also serve as a text in advanced undergraduate and graduate-level courses on emotion and interpersonal communication, and in graduate-level counseling and psychotherapy seminars.

The Language of Emotions ... Niemeier-Dirven, René
Dirven, 1997-01-01 Since the celebration of the 100th anniversary of Darwin's *The Language of the Emotions in Man and Animals* (1872), emotionology has become a respectable and even thriving research domain again. The domain of human emotions is most important for mankind, emotions being right in the center of our daily lives and interests. A key-role in the interdisciplinary scientific debate about emotions has now been accorded to the study of the language of emotions. The present volume offers a new approach to the study of the language of emotions insofar as it presents theories from very different perspectives. It encompasses studies by scholars from diverse disciplines such as linguistics, sociology, and psychology. The topics of the contributions also cover a range of special fields of interest in four major sections. In a first section, a discussion of theoretical issues in the analysis of emotions is presented. The conceptualization of emotions in specific cultures is analyzed in section 2. Section 3 takes a different inroad into the language of emotions by looking at developmental approaches giving evidence of the fact that the acquisition of the language of emotions is a social achievement that simultaneously determines our experience of these emotions. Section 4 is devoted to emotional language in action, that is, the

contributions focus upon different types of texts and analyze how emotions are referred to and expressed in discourse.

Living with Feeling Lucia Capacchione, 2001 An outline and instructional guide explains how to use artistic expression to achieve emotional equilibrium and start on the road to self-discovery.

Interpreting the Personal Susan Leslie Campbell, Sue Campbell, 1997 The author reinstates the personal as an important dimension in analytic philosophy of mind. She argues that the category of feelings has a unique role in psychological explanation: the expression of feelings is the attempt to communicate personal significance. To develop a model for affective meaning, the author moves attention away from the classic emotions to feelings which are more personal, inchoate and idiosyncratic.

The Social Nature of Emotion Expression Ursula Hess, Shlomo Hareli, 2019-12-12 This book provides an overview of theoretical thinking about the communicative scope of emotional expressions as well as an overview of the state of the art research in emotional psychology. For many years, research in emotional psychology has been primarily concerned with the labeling of emotion expressions and the link between emotion expressions and the expresser's internal state. Following recent trends in research devoting specific attention to the social signal value of emotions, contributors emphasize the nature of emotion expressions as information about the person and the situation, including the social norms and standards relevant to the situation. Focusing on the role of emotion expressions as communicative acts, this timely book seeks to advance a line of theoretical thinking that goes beyond the view of emotion expressions as symptoms of an

intrapersonal phenomenon to focus on their interpersonal function. The Social Nature of Emotion Expression will be of interest to researchers in emotional psychology, as well as specialists in nonverbal behavior, communication, linguistics, ethology and ethnography.

The (non)expression of Emotions in Health and Disease

A. J. J. M. Vingerhoets, Frans van Bussel, Jan

Boelhouwer, 1997 The (Non)Expression of Emotions in Health Disease contains the texts of contributions to the international conference on the (non)expression of emotions in health and disease, held at Tilburg University on August 28 - 30, 1996. Emotions are important for people in daily life. Their relevance is linked to their communicational aspects and their function to motivate, fuel, and guide our efforts to cope with the world around us. But emotions can also seriously interfere with people's ability to function adequately and can thus impede adaptation. In addition, both (quasi)experimental and correlational studies have yielded support for the hypothesis that the nonexpression of emotions may be an important factor for health status. However, it is not entirely clear how the different constructs and findings obtained with different methodologies relate to one another. Also, little is known about possible aetiological factors associated with nonexpression. Why are some individuals more expressive than others? What are the basic functions of emotional expressiveness and why and how could nonexpressiveness be associated with poor health status? Topics like alexi-thymia, emotions and disease, and the clinical aspects are addressed in this publication. Finally, there are contributions focusing on adult crying. The book is intended for both researchers and clinicians in the behavioral sciences and in medicine.

I Want To Tell You How I Feel Ron Johnson, Deb Brock, 2020-09-18 In their book, *I Want to Tell You How I Feel*, husband and wife psychologists, Deb Brock and Ron Johnson, provide a paradigm for understanding what may be the most important element of human psychology. They suggest that people's feelings can be understood, valued, and utilized in order to enliven them personally and enhance them interpersonally to such a degree that they can find true contentment, meaning, and satisfaction in life. They have dared to unpack the murky waters of feelings with precision without falling prey to simplistic ideas of feelings nor complex neurological assessment of feelings. The authors propose that if people grasp how they feel, they will subsequently grasp how other people feel, and in this interchange of feelings, they will profoundly enhance communication and ultimately relationships. Johnson and Brock propose a unique paradigm for understanding feelings by first suggesting that feelings, while undefined, are the most basic experience and expression of one's core self, sometimes called soul or spirit. The authors immediately admit to the undefined nature of such words as feelings, core self, soul, or spirit but note that such elements of humanity can be understood and utilized just as the equally undefined words love, time, and distance are undefined. While undefined, feelings can be observed in their experience and expression which comes sequentially physically, emotionally, cognitively, and actively. Thus, an important concept that Johnson and Brock propose is that emotion is the second experience one has when experiencing or expressing feelings but not the entirety of one's feelings, and for many people not the most

important. They suggest that some people are inclined to express or experience their feelings emotionally while others may be more inclined to physical manifestations, cognition, or activity in experience and expression of feelings. The authors suggest a commensurate four-part paradigm of personality temperament that often reflects one's preference for experiencing and expressing feelings. They further delineate the four basic emotions suggesting that are love-based emotions of joy and sadness and two defense-based emotions of fear and anger. With the groundwork of the book in this depth understanding of feelings, emotions, and personality temperament, Brock and Johnson present a myriad of scenarios between people demonstrating how to use their basic understanding of feelings. In these later chapters the authors focus on practical, down-to-earth examples of how people fail to communicate their feelings and examples of how they can succeed in feeling communication. They suggest rules for engagement in one chapter. They devote another chapter to the concept of emotional hurt which, they suggest, is often at the heart of miscommunication, and suggest ways of understanding, managing, and communicating hurt before it turns to defensive-based emotions of anger or fear. Drs. Johnson and Brock have compiled a valuable book that is grounded in equal measures of science, theory, and their 100 years of experience in the field of psychology. Read this book and you will be compelled to think deeper, feel deeper, and communicate better.

Linguistics, grade: 2+, University of Cologne, language: English, abstract: 1. Introduction There is no better way to explore different cultures than through analysing the languages spoken by members of ethnical communities. Indeed, the best evidence for differences and similarities between people, as bearers and products of cultures, comes from languages. Besides body language and facial mimics, speech is essential for expression of thoughts or feelings and emotions for every human being. However, the way of expressing emotions differs from culture to culture and from continent to continent according to the indigenous values and norms of the persons concerned. Anna Wierzbicka together with Cliff Goddard and their colleagues did linguistic research on many European and exotic languages, comparing them in order to find differences and similarities. They gained many interesting insights about the language as an “indicator” of culture, as it necessarily reflects on it. The Russians and the Anglo seem to be very different from each other as to expression of emotions due to their general attitude to having them and above all, to expressing them. In order to provide an objective analysis for all languages which can be understood by everybody, a Natural Semantic Metalanguage based on semantic primitives, has been developed. This new mean allowed to produce cultural scripts and to develop “models of a person”, representing the culture-specific norms and values. Further, in this work, the Natural Semantic Metalanguage and the Russian and Anglo models of a person are explained in greater detail. Finally, it concentrates on the linguistic evidence pertaining to expression of emotions in English and Russian. [...]

The Oxford Handbook of Affective Computing Rafael A. Calvo, Sidney D'Mello, Jonathan Matthew Gratch, Arvid

Kappas, 2015 The Oxford Handbook of Affective Computing is a definitive reference in the burgeoning field of affective computing (AC), a multidisciplinary field encompassing computer science, engineering, psychology, education, neuroscience, and other disciplines. AC research explores how affective factors influence interactions between humans and technology, how affect sensing and affect generation techniques can inform our understanding of human affect, and on the design, implementation, and evaluation of systems involving affect at their core. The volume features 41 chapters and is divided into five sections: history and theory, detection, generation, methodologies, and applications. Section 1 begins with the making of AC and a historical review of the science of emotion. The following chapters discuss the theoretical underpinnings of AC from an interdisciplinary viewpoint. Section 2 examines affect detection or recognition, a commonly investigated area. Section 3 focuses on aspects of affect generation, including the synthesis of emotion and its expression via facial features, speech, postures, and gestures. Cultural issues are also discussed. Section 4 focuses on methodological issues in AC research, including data collection techniques, multimodal affect databases, formats for the representation of emotion, crowdsourcing techniques, machine learning approaches, affect elicitation techniques, useful AC tools, and ethical issues. Finally, Section 5 highlights applications of AC in such domains as formal and informal learning, games, robotics, virtual reality, autism research, health care, cyberpsychology, music, deception, reflective writing, and cyberpsychology. This compendium will prove suitable for use as a textbook and serve as a valuable resource for everyone with an interest in AC.--
