The World's Most Difficult Quiz Pat Cullen, 2011-01-01
Which US president did Washington Irving once unflatteringly refer to as a “withered little apple-john?” What reduplicative word refers to a Siamese three-wheeled taxi? In which city is Charlemagne's octagon? These and other fiendishly difficult questions have stumped pupils at King William's College as part of its annual General Knowledge Papers for more than a century—along with Guardian readers, for whom the test has been reprinted in its entirety since 1951. Here, for the first time, is a compendium of the wonderfully obscure questions—and their often unexpected answers—that have appeared on the test over the past thirty years. Guaranteed to challenge even the most ardent trivia enthusiast, this exhaustive compilation is organized thematically and chronologically and includes a set of previously unpublished questions by current quizmaster Pat Cullen. For history hotshots, fountains of fact, and perennial powerhouses of pub trivia, *The World's Most Difficult Quiz* lives every bit up to its superlative name, offering an addictive assortment of intriguing questions.

Clinical Nuclear Medicine Neuroimaging Dafang Wu, 2020-04-24 This book serves as a casebook for clinical nuclear medicine neuroimaging. Clinical interpretation of nuclear medicine neuroimaging studies is often challenging, mainly due to the complexity of neuroanatomy and a lack of supportive reference books. This is an unmet need in many teaching hospitals. Utilizing a hands-on, case-based approach, this textbook guides readers through

clinical nuclear medicine neuroimaging of major neurological diseases and conditions, including dementia, epilepsy, and brain death. Included here are basic guidelines and techniques for nuclear medicine neuroimaging practices, set alongside case examples that include standardized imaging display and detailed interpretation. Each chapter begins with examples of normal brain imaging as a reference point for the remainder of the chapter, which then presents detailed case examples of these diseases through various imaging techniques. Each of the cases highlights clinical and imaging key findings and precise impressions. This is an ideal guide for residents, fellows, and even practicing nuclear medicine physicians as a reference and teaching tool for neuroimaging in clinical nuclear medicine. It will be of significant value to residents, trainees, and young physicians in preparation for their in-service tests and board examinations.

Diary of a Service Dog (Dropout) Kristen An

Horton, Heidi Anne Horton Pittman, 2020-01-14 My name is Granger. I am a Labrador Retriever. I want to be a service dog. It is not always easy. This is my story. (Human's note: The most important take away is that the public, children and adults, need to learn how to not interact with service dogs. As Granger says, I'm cute. I'm working. Please ignore me.)
