Eye Color Morgan Worthy,1999 Morgan Worthy, a research psychologist, presents a comprehensive picture of how eye color is related to the behavior of humans and animals. In humans, he used archival records of athletic performance to show the theoretical pattern which has light-eyed athletes performing at their best on self-paced tasks and dark-eyed athletes, on average, performing at their best on reactive tasks. This same general pattern is shown to hold true in animal behaviors such as hunting tactics of predators and escape tactics of prey. Whereas dark-eyed predators tend to rely on immediate, quick, reactions to catch prey, light-eyed predators tend to rely more on their ability to lie-in-wait or stalk prey. Various other behaviors such as perception and social interaction are discussed in the same theoretical framework.

Naptime with Theo and Beau Jessica Shyba,2015-12-29 The only thing better than naptime is naptime with a friend. Theo the puppy (part-Boxer, part-Shepherd, part-Labrador, part-Sharpei) was rescued by Beau, a twenty-three-month-old toddler, and his family from an animal shelter in Santa Cruz. The two of them instantly became best friends. And every day at naptime, Theo waits for Beau to fall asleep, then curls up next to him. Theo and Beau were already a viral sensation thanks to the unbearably adorable, utterly charming photos that author (Beau's mother) Jessica Shyba has been posting on her popular blogMomma's Gone City. And now, she's matched the very sweetest of them to a charming bedtime text to make a board book that is (as Alyssa Milano said of the blog) so cute it hurts.
