Tell El-Hesi Jeffrey A. Blakely,Lawrence E. Toombs,W. J. Bennett,1980 The Tell el-Hesi site comprises a 25-acre walled city from the Early Bronze III period. It is located on the southeastern edge of the Mediterranean coastal plain, 26 km northeast of Gaza in Israel. Tell el-Hesi was the first Palestinian site at which the principles of ceramic chronology and of stratigraphic excavation were applied and at which the relationship between pottery and stratigraphy was shown to be significant. In 1890 W.M. Flinders Petrie excavated at Hesi and produced a general picture of its occupational history. In 1891-92, F.J. Bliss excavated stratigraphically through each successive level of the mound and identified eleven occupational levels which he grouped into eight strata or cities. In 1970, The Joint Archaeological Expedition to Tell el-Hesi, sponsored by the American Schools of Oriental Research and a consortium of educational institutions, entered the site with the objectives of investigating in greater

detail and with more refined methods the stratigraphic divisions identified by Petrie and Bliss. This book appears as the third volume in the Joint Expedition's series of final publications regarding their field experience and findings. The Joint Expedition completed excavation of four distinct Persian Period occupation sequences from the acropolis area (Field I) of tell el-Hesi. This volume presents and attempts to interpret all of the stratigraphic and artifactual material associated with the Stratum V occupation at the site. It is a significant addition to the limited body of literature on Persian-Period remains in the Levant.
