The Loan Officer's Practical Guide to Residential Finance Thomas A.

Morgan, 2003 Published since 1992, and updated annually, this 148 page textbook was written as an answer to the sink-or-swim training methods of many mortgage firms. The format is designed to give the newly initiated loan officer/agent, lender, processor, or other initiate the practical information they need to do the loan officer's job. The reader learns how to understand rate and point quotes, how to use a financial calculator, how to make basic computations customers require, how to understand loan programs and compare product features. The student progresses through understanding loan specifications - Conventional Conforming/Jumbo/FHA/VA and Sub-Prime program guidelines - to a practical understanding of ratios, income, assets and closing costs, debts and credit history. This is then placed in the context of the loan application - how to collect all the required documents and disclosures and supervise a loan from application to closing. Beyond the basics, students learn how to finance various property types; condos, PUDs, new construction and investment property. A detailed chapter on refinancing addresses the issues which most often confront the loan officer in a period of heavy refinancing - 10 reasons to refinance. Finally, understanding how loans are made in the secondary market and the basics of interest rate quoting and behavior are covered.
