Tuttle Learning Chinese Characters Alison Matthews, Laurence Matthews, 2011-12-20 This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. Key principles include the use of visual imagery, the visualization of short stories, and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

The Ivory Tower and the Marble Citadel Thomas A Metzger, 2012-11-19 The Ivory Tower and the Marble Citadel opens up a new way of pursuing the critical development of political philosophy in today's intercultural intellectual arena. Metzger holds that political philosophies are linguistically unavoidable efforts to infer the principles of morally legitimate government from a maximally enlightened conceptualization of the universal human condition. Because these efforts depend on a vocabulary embodying culturally inherited premises, textual analysis uncovering these premises and debate about how they should be revised are crucial for the improvement of political philosophy.

Chinese Rhetoric and Writing Andy Kirkpatrick, Zhichang Xu, 2012-03-07 Andy Kirkpatrick and Zhichang Xu offer a response to the argument that Chinese students' academic writing in English is influenced by "culturally nuanced rhetorical baggage that is uniquely Chinese and hard to eradicate." Noting that this argument draws from "an essentially monolingual and Anglo-centric view of writing," they point out that the rapid growth in the use of English worldwide calls for "a radical reassessment of what English is in today's world." The result is a book that provides teachers of writing, and in particular those involved in the teaching of English academic writing to Chinese students, an introduction to key stages in the development of Chinese rhetoric, a wide-ranging field with a history of several thousand years. Understanding this important rhetorical tradition provides a strong foundation for assessing and responding to the writing of this growing group of students.

Grammaticalization and Language Change in Chinese Xiu-Zhi Zoe Wu, 2004-08-02 This innovative study on the phenomenon of 'grammaticalization' and its manifestation in Chinese provides new insights into language change in Chinese and a large number of grammatical topics. Grammaticalization occurs in all of the world's languages. Xiu-Zhi Zoe Wu demonstrates general linguistic principles present and active in the phenomenon of grammaticalization whilst also describing the modelling of language in formal theoretical approaches to syntax; so this book fills two major gaps in the current study of linguistics. Grammaticalization and Language Change in Chinese illuminates how studies of language development and change provide special insights into the understanding of current, synchronic systems of language. Using patterns from Chinese, the author establishes cross-linguistic generalizations about language change and grammaticalization. This book should be of great interest to Chinese linguists and readers interested in language change in different languages.

Chinese Archery Stephen Selby, 2000-01-01 Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century. The book is written around parallel text translations of classical Chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist. Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.

A Treatise on Efficacy François Jullien, 2004-04-30 In this highly insightful analysis of Western and Chinese concepts of efficacy, François Jullien subtly delves into the metaphysical preconceptions of the two civilizations to account for diverging patterns of action in warfare, politics, and diplomacy. He shows how Western and Chinese strategies work in several domains (the battlefield, for example) and analyzes two resulting acts of war. The Chinese strategist manipulates his own troops and the enemy to win a battle without waging war and to bring about victory effortlessly. Efficacy in China is thus conceived of in terms of transformation (as opposed to action) and manipulation, making it closer to what is understood as efficacy in the West. Jullien's brilliant interpretations of an array of recondite texts are key to understanding our own conceptions of action, time, and reality in this foray into the world of Chinese thought. In its clear and penetrating characterization of two contrasting views of reality from a heretofore unexplored perspective, *A Treatise on Efficacy* will be of central importance in the intellectual debate between East and West.

The Complete Works of Zhuangzi, 2013-11-26 Only by inhabiting Dao (the Way of Nature) and dwelling in its unity can humankind achieve true happiness and freedom, in both life and death. This is Daoist philosophy's central tenet, espoused by the person—or group of people—known as Zhuangzi (369?-286? B.C.E.) in a text by the same name. To be free, individuals must discard rigid distinctions between good and bad, right and wrong, and follow a course of action not motivated by gain or striving. When one ceases to judge events as good or bad, man-made suffering disappears and natural suffering is embraced as part of life. Zhuangzi elucidates this mystical philosophy through humor, parable, and anecdote, deploying non sequitur and even nonsense to illuminate a truth beyond the boundaries of ordinary logic. Boldly imaginative and inventively worded, the *Zhuangzi* floats free of its historical period and society, addressing the spiritual nourishment of all people across time. One of the most justly celebrated texts of the Chinese tradition, the *Zhuangzi* is read by thousands of English-language scholars each year, yet only in the Wade-Giles romanization. Burton Watson's pinyin romanization brings the text in line with how Chinese scholars, and an increasing number of other scholars, read it.

Religious Faith of the Chinese Xinping Zhuo, 2017-12-26 This book comprehensively examines religious faith in China from the perspective of cultural philosophy and cultural history. It explores the social, political, cultural and spiritual meanings of religions, tracing their historical development and related paradigm shifts. It also analyzes the characteristics of the country's local religions and the process of indigenization of world religions, and describes the peaceful co-existence and harmonious confluence of multiple religions in Chinese spiritual life, revealing the vibrant and diverse colors of its religious culture. Examining these religions' social and cultural functions in contemporary Chinese society, the book demonstrates the rich and complex intertwinement of religious faith, cultural spirit and national disposition among the Chinese people.

The Chinese Language John DeFrancis, 1986-03-01 DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone. --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted. --William S.Y. Wang, professor of linguistics, University of California at Berkeley

Changing Media, Changing China Susan L. Shirk, 2011-01-27 Thirty years ago, the Chinese Communist Party (CCP) made a fateful decision: to allow newspapers, magazines, television, and radio stations to compete in the marketplace instead of being financed exclusively by the government. The political and social implications of that decision are still unfolding as the Chinese government, media, and public adapt to the new information environment. Edited by Susan Shirk, one of America's leading experts on contemporary China, this collection of essays brings together a who's who of experts--Chinese and American--writing about all aspects of the changing media landscape in China. In detailed case studies, the authors describe how the media is reshaping itself from a propaganda mouthpiece into an agent of watchdog journalism, how politicians are reacting to increased scrutiny from the media, and how television, newspapers, magazines, and Web-based news sites navigate the cross-currents between the open marketplace and the CCP censors. China has over 360 million Internet users, more than any other country, and an astounding 162 million bloggers. The growth of Internet access has dramatically increased the information available, the variety and timeliness of the news, and its national and international reach. But China is still far from having a free press. As of 2008, the international NGO Freedom House ranked China 181 worst out of 195 countries in terms of press restrictions, and Chinese journalists have been aptly described as dancing in shackles. The recent controversy over China's censorship of Google highlights the CCP's deep ambivalence toward information freedom. Covering everything from the rise of business media and online public opinion polling to environmental journalism and the effect of media on foreign policy, *Changing Media, Changing China* reveals how the most populous nation on the planet is reacting to demands for real news.

The Chinese Gazette in European Sources Nicolas Standaert, 2022-01-31 By looking at China from the periphery, this study shows how European sources offer a unique way of expanding the knowledge about the gazette of the seventeenth and eighteenth centuries. Its interconnected history illustrates how the Chinese gazette, as translated by European missionaries, became a major source for reflections on state and society by Enlightenment thinkers.
