Print Culture in Early Modern France Carl Goldstein,2012-02-13 In this book, Carl Goldstein examines the print culture of seventeenth-century France through a study of the career of Abraham Bosse, a well-known printmaker, book illustrator, and author of books and pamphlets on a variety of technical subjects. The consummate print professional, Bosse persistently explored the endless possibilities of print – single-sheet prints combining text and image, book illustration, broadsides, placards, almanacs, theses, and pamphlets. Bosse had a profound understanding of print technology as a fundamental agent of change. Unlike previous studies, which have largely focused on the printed word, this book demonstrates the extent to which the contributions of an individual printmaker and the visual image are fundamental to understanding the nature and development of early modern print culture.

Concepts of Biology Samantha Fowler,Rebecca Roush,James Wise,2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

CURRIER & IVES Bryan F. LeBeau,2001-09-17 When Nathaniel Currier started his publishing business in 1834, the mass production of visual images was almost unknown. Currier and his partner, James Ives, literally changed the American landscape by mass-producing inexpensive lithographs and selling millions of copies that adorned countless homes, businesses, and even barns. The Currier and Ives catalog included some 7,000 works by dozens of artists, accounting for 95 percent of all lithographs purchased nationwide. Bryan F. Le Beau provides the first in-depth study of the sweeping range of Currier and Ives images produced until the end of the century, placing them in historical context as meaningful representations and reflections of American values, beliefs, hopes, and dreams.--Jacket.
