The Essential James Garner Stephen H. Ryan, Paul J. Ryan, 2018-06-07 Since his television debut in the mid-1950s, James Garner entertained millions of fans on screens both big and small. From supporting roles in memorable films like *Sayonara* and *The Notebook* to leading roles in box office hits including *The Great Escape*, *Victor / Victoria*, and the feature film version of *Maverick*, the actor appeared in some of the most entertaining movies of all time. In *The Essential James Garner*, Stephen H. Ryan and Paul J. Ryan consider the prolific output of one of America's most beloved actors. This book looks at the key feature films, made-for-television movies, and television episodes of Garner's career. The authors discuss each of the actor's most well-known films—*The Great Escape*, *The Americanization of Emily*, *Support Your Local Sheriff!* and *Murphy's Romance*, among others—as well as critically acclaimed television movies including *Barbarians at the Gate*, *Breathing Lessons*, *Decoration Day*, *Heartsounds*, *My Name Is Bill W.*, and *Promise*. Each entry provides details about the film's production, critical reception, and commercial success. The best episodes of Garner's two iconic television series, *Maverick* and *The Rockford Files*—as well as his highly regarded but little seen series *Nichols*—are also identified. The authors make clear why these choices are indispensable viewings, not only for those already familiar with Garner, but also for those who have yet to enjoy the work of this Oscar nominee and multiple Emmy winner. A tribute to the career of a Hollywood legend, *The Essential James Garner* will appeal to anyone wanting to know more about the actor's best films and programs.

**High Frequency Electromagnetic Dosimetry** David A. Sánchez-Hernández, 2009 Along with the growth of RF and microwave technology applications, there is a mounting concern about the possible adverse effects over human health from electromagnetic radiation. Addressing this issue and putting it into perspective, this groundbreaking resource provides critical details on the latest advances in high frequency electromagnetic dosimetry. The book takes a scientific and rigorous engineering point of view, helping you achieve highly accurate exposure assessments.

**Hybrid Renewable Energy Systems for Remote Telecommunication Stations** Adel A. Elbaset, Salah Ata, 2021-03-21 This book looks at the challenge of providing reliable and cost-effective power solutions to expanding communications networks in remote and rural areas where grid electricity is limited or not available. It examines the use of renewable energy systems to provide off-grid remote electrification from a variety of resources, including regenerative fuel cells, ultracapacitors, wind energy, and photovoltaic power systems, and proposes a powerful hybrid system that can replace the need and high operation costs of batteries and diesel powered electric generators. Analyzes types of communications stations and their rate of consumption of electrical power; Presents brief descriptions of various types of renewable energy; Investigates renewable energy systems as a source for powering

communication stations.

*Weight Filtrations on Log Crystalline Cohomologies of Families of Open Smooth Varieties* Yuki Yoshi Nakkajima, Atsushi Shiho, 2008-09-15 In this volume, the authors construct a theory of weights on the log crystalline cohomologies of families of open smooth varieties in characteristic  $p > 0$ , by defining and constructing four filtered complexes. Fundamental properties of these filtered complexes are proved, in particular the  $p$ -adic purity, the functionality of three filtered complexes, the weight-filtered base change formula, the weight-filtered Künneth formula, the weight-filtered Poincaré duality, and the E2-degeneration of  $p$ -adic weight spectral sequences. In addition, the authors state some theorems on the weight filtration and the slope filtration on the rigid cohomology of a separated scheme of finite type over a perfect field of characteristic  $p > 0$ .
