Technology, Industry and Trade Eliyahu Ashtor,1992 This is the fifth collection of articles by Eliyahu Ashtor to be published by Variorum and focuses on the fundamental question of why, during the later Middle Ages, technology and industry declined, even collapsed, in the Muslim Levant, while simultaneously making enormous progress in the Christian West. An indefatigable researcher in archives all over the Mediterranean, Ashtor amassed quantities of data on this subject, and began to propose causal links between, on the one hand, demographic trends, types of political regime, economic policies and attitudes towards innovation, and on the other, the progress or decline of technology and industry. Although his work was cut short by his death in 1984, the information that Ashtor has made available, for instance on the sugar and the alkali industries, and the questions and hypotheses he has suggested will provide a vital basis for continuing research. The final article, dealing more specifically with the history of commerce, represents in effect a summation of the author's views on the role of the Jews in the trade of the Mediterranean.La cinquième collection d'articles d'Eliyahu Ashtor à être publiée par Variorum (pour les deux volumes encore disponibles, voir p.00) se concentre sur la raison fondamentale pour laquelle, durant le Bas Moyen Age, la technologie et l'industrie dans le Levant musulman étaient en déclin, voire même en plein effondrement, alors qu'elles faisaient simultanément d'énormes progrès dans l'Ouest chrétien. Cherchiste infatigable des archives méditerranéennes, Ashtor a amassé quantité d'informations à ce sujet et a commencé à suggérer l'existence de lien de cause entre: d'une part, les tendances démographiques, les types de régimes politiques, la politique économique et les attitudes vis-à-vis du changement et, d'autre part, le progrès ou le déclin de la technologie et de l'industrie. Bien que son travail ait été interrompu par sa mort en 1984, l'information découverte par Ashtor, ainsi que les questions et hypothèses qu'il a suggéré forment une base essentielle à la continuation de la recherche. Le dernier article, qui traite plus spécifiquement de l'histoire du commerce, fait effet de récapitulatif quant aux opinions de l'auteur sur le rôle des juifs dans le commerce méditerranéen.

The Perfect Heresy Stephen O'Shea,2001 A shattering chronicle of the life and death of the Cathar movement -- one of Western civilization's great tragedies. At the beginning of the 13th century, the Cathars, a group of heretical Christians, thrived across what is now southern France, but was then a patchwork of city states and principalities beholden to neither king nor bishop. The Cathars held revolutionary beliefs that threatened the authority of the Catholic Church as well as the legitimacy of feudal law: they thought the idea of Hell, indeed the entire metaphysic constructed by the Church, to be a sham; they rejected all sacraments, including marriage; they thought private property an absurd notion and that all things worldly were corrupt; they gave women religious status equal to men. Though they lived peacefully, the Cathars growing influence enraged a Catholic Church that was flexing its muscle after decades of weakness, and its powerful Pope, Innocent III. The Church recruited the forces of France, eager to expand her territory to the south, and systematically attacked the Cathars in crusades between 1209 and 1229. By the time the wars were over, the map of Europe had been rearranged, and the Inquisition -- unleashed. Full of colourful and passionate personalities, The Perfect Heresy sheds new light on the 13th century and on the timelessness of religious intolerance.

Sea of Faith Stephen O'Shea,2009-05-26 In Sea of Faith, O'Shea chronicles both the meeting of minds and the collisions of armies that marked the interaction of Cross and Crescent in the Middle Ages-the better to understand their apparently intractable conflict today. For all the great and everlasting moments of cultural interchange and tolerance-in Cordoba, Palermo, Constantinople-the ultimate geography of belief was decided on the battlefield. O'Shea vividly recounts seven pivotal battles between the forces of Christianity and Islam that shaped the Mediterranean world-from the loss of the Christian Middle East to the Muslims at Yarmuk (Turkey) in 636 to the stemming of the seemingly unstoppable Ottoman tide at Malta in 1565. In between, the battles raged round the Mediterranean, from Poitiers in France and Hattin in the Holy Land during the height of the Crusades, to the famed contest for Constantinople in 1453 that signaled the end of Byzantium. As much as the armies were motivated by belief, their exploits were inspired by leaders such as Charles Martel, Saladin, and Mehmet II, whose stirring feats were sometimes accompanied by unexpected changes of heart.

22 Britannia Road Amanda Hodgkinson,2011-04-28 A tour de force that echoes modern classics like Suite Francaise and The Postmistress. Housekeeper or housewife? the soldier asks Silvana as she and eight- year-old Aurek board the ship that will take them from Poland to England at the end of World War II. There her husband, Janusz, is already waiting for them at the little house at 22 Britannia Road. But the war has changed them all so utterly that they'll barely recognize one another when they are reunited. Survivor, she answers. Silvana and Aurek spent the war hiding in the forests of Poland. Wild, almost feral Aurek doesn't know how to tie his own shoes

or sleep in a bed. Janusz is an Englishman now-determined to forget Poland, forget his own ghosts from the way, and begin a new life as a proper English family. But for Silvana, who cannot escape the painful memory of a shattering wartime act, forgetting is not a possibility. One of the most searing debuts to come along in years, 22 Britannia Road. is the wrenching chronicle of how these damaged people try to become, once again, a true family. An unforgettable novel that cries out for discussion, it is a powerful story of primal maternal love, overcoming hardship, and, ultimately, acceptance-one that will pierce your heart.

The Meskhetian Turks at a Crossroads Tom Trier, Andrei Khanzhin, 2007 This book is the result of a comprehensive and pioneering research project, and offers innovative insights into the life of the Meskhetian Turks - an ethnic group collectively deported from Georgia by Stalin during World War II. The volume examines their integration in the countries where they now live, their understanding of home and belonging and their desire to return to Georgia. Apart from thoroughly documenting the current life of Meskhetian Turks, the research also identifies new approaches in finding solutions to the issue of Meskhetian Turk displacement.

The Two Deaths of Daniel Hayes Marcus Sakey, 2011-06-09 "A brainy, twisty, sometimes twisted mystery."--Gillian Flynn, author of *Gone Girl* A man wakes up naked and cold, half-drowned on an abandoned beach... The only sign of life for miles is an empty BMW. Inside the expensive car he finds clothes that fit perfectly, shoes for his tattered feet, a Rolex, and an auto registration in the name of Daniel Hayes, resident of Malibu, California. None of it is familiar. How did he get here? Who is he? While he searches for answers, the world searches for him--beginning with the cops who kick in the door of his dingy motel with drawn guns. All he remembers is a woman's face, so he leaves town in search of her in hopes of uncovering his true identity. But that raises the most chilling question of all... What will he find when he gets there? Praise for Marcus Sakey Truly excellent. The Spirit of Mediterranean Places Michel Butor, 1997 This book gathers French writer Michel Butor's essays on his travels in the Mediterranean. Included are pieces on Cordova, Istanbul, Salonica, Delphi, Mallia in Crete, and Ferrara and Mantua in northern Italy. There is an extended essay on Egypt, where, when Butor was twenty-four, he spent a year teaching French in a secondary school in a provincial city. Far from the bland comments on the landscapes by an enchanted walker, inspired by memories, Butor digresses on the history and the literature of the places that he visits. He raises what he calls geographical criticism to the rank of art, never forgetting that cities are not miracles of nature but the masterpieces of men. Emperors built palaces where conquerors had previously destroyed them. Sculptors erected statues and writers wrote books. Michel Butor registers these as a part of the memory of place. Butor went on to become one of the leading exponents of the avant-garde writing that emerged in France in the 1950s.

Rebirth of an Eagle Mustafa Çay, 2019-02-28 "Stand up, old man!", Agon said to himself. "Go to your grave for you are not dead yet... You have lived like an eagle, so die like an eagle! Don't let those coward sparrows make fun of you..." The Old Agon's wings were weaker, feathers shed and talons blunted. He could neither fly nor eat. He was either going to die or be reborn out of the ashes. It wouldn't be appropriate for the lord of the sky to cry in despair. Even his death should have been legendary. Because an eagle would never hunt flies! Agon neither let sparrows make fun of him nor hunted flies...

Antimatter Frank Close, 2018-10-25 Antimatter explores a strange mirror world, where particles have identical yet opposite properties to those that make up the familiar matter we encounter everyday; where left becomes right, positive becomes negative; and where, should matter and antimatter meet, the two annihilate in a blinding flash of energy that makes even thermonuclear explosions look feeble by comparison. It is an idea long beloved of science-fiction stories--but here, renowned science writer Frank Close shows that the reality of antimatter is even more fascinating than the fiction itself. We know that once, antimatter and matter existed in perfect counterbalance, and that antimatter then perpetrated a vanishing act on a cosmic scale that remains one of the greatest mysteries of the universe. Today, antimatter does not exist normally, at least on Earth, but we know that it is real for scientists are now able to make small pieces of it in particle accelerators, such as that at CERN in Geneva. Looking at the remarkable prediction of antimatter and how it grew from the meeting point of relativity and quantum theory in the early 20th century, at the discovery of the first antiparticles, at cosmic rays, annihilation, antimatter bombs, and antiworlds, Close separates the facts from the fiction about antimatter, and explains how its existence can give us profound clues about the origins and structure of the universe. Oxford Landmark Science books are 'must-read' classics of modern science writing which have crystallized big ideas, and shaped the way we think.
