## **Funding International Development Organizations**

, 2022-12-19 Financing development requires access to financial resources. The AIIB Yearbook of International Law Volume 4 explores the role of international organizations in the development of local capital markets, their legal status under public international law and selected domestic jurisdictions, as well as innovations in resource mobilization and organizational structures. The volume collects insights from distinguished professionals who shed new light on the question of how international development organizations can raise the funds they need to tackle global challenges like the climate crisis, digitalization, or sustainable development. Only by addressing

these challenges will international development organizations be able to fully deliver on their development mandate.

### **Guyana's Great Economic Downswing, 1977-1990**

Ramesh Gampat, 2020-10-19 Much of Guyana's 20th century history was defined by the PNC dictatorship and the political and economic wreckage it left behind. In Guyana's Great Economic Downswing, 1977 to 1990, Dr Ramesh Gampat presents a comprehensive study of these specific years when the national economy contracted by 2.7 percent annually. He explores the multiple facets of the country's political tribalism which does not value freedom, liberty and the flourishing of all people; it values only freedom, liberty and flourishing of tribes. The study reinforces the widely held belief that until and unless these adversarial groups subsume their respective selfish interests and commit to the common cause of national peace and development, the great downswing might not rest as a historical event but could well re-emerge with further economic devastation if the lessons go unheeded. Dr Gampat makes a strong case for federalism as a solution to Guyana's ethnic politics. Federalism, he posits, would ensure that all Guyanese have equal access to opportunities and resources since a system of provincial governance would be better placed to address discriminatory policies and practices at a localised level. With the country sitting on the cusp of transformative development to be propelled by new-found oil wealth, there is an urgency to settle the divisive politics if every Guyanese is to benefit fairly and equitably from the economic boom. Guyana's Great Economic Downswing, 1977 to 1990 offers up a studied and comprehensive analysis that should be part of that bipartisan discourse going forward. --- Ryhaan Shah, Novelist, Social Activist A few piecemeal academic articles analyzing Guyana's economic evolution over the period 1977 to 1990 were written, but they are scattered and lost away in various journals. What was missing is a comprehensive and rigorous exploration of the era of Cooperative Socialism. Dr.

Ramesh Gampat's book fills this gap. It is a superb synthesis of historical, theoretical and econometric exploration of the Great Downswing. The book not only provides estimates of important macroeconomic concepts such as Guyana's total factor productivity and long-term growth, but also produces the useful statistics and reviews of poverty, inequality, life expectancy, education outcomes as well as a detailed analysis of the rice sector. As if these are not enough, Gampat sets the tone by situating the exploration in the country's long standing and debilitating ethno-political dynamics. This self-contained book will be of tremendous use to policy makers, journalists and students interested in the historical context of present-day outcomes. I highly recommend this book to public libraries and home reference libraries. ---Tarron Khemraj, William and Marie Selby Professor of Economics and International Studies, New College of Florida

Social analysis for inclusive agrifood investments Christensen, I., Romano, M., 2023-12-12 More than a decade has passed since the publication of the series entitled Social Analysis of Agriculture and Rural Investment Projects, which comprises three complementary manuals - the Manager's, Practitioner's and Field guides. During this time, conflict, climate change and economic downturns have been driving up poverty, hunger, and socioeconomic inequalities, reducing the resilience of agrifood systems. In response, the FAO Investment Centre has updated the Social Analysis guides to address the evolving and volatile rural transformation context, providing programme managers, practitioners and field workers with a set of enhanced tools for the design, implementation and evaluation of inclusive investments in agrifood systems. Today's investments must prioritize more demand-driven, people-centred, culturally sensitive and locally owned sustainable approaches, with increased attention to reducing gender and other inequalities. Operationalizing these principles contributes to FAO's and

financing agencies' objectives of ending poverty, improving food security and nutrition, and reducing inequalities. The goal of the updated guides is to support investments that contribute to inclusive, resilient and sustainable agrifood systems, aligned with the outcomes of the UN Food Systems Summit, the Sustainable Development Goals (SDGs), and the core principle of leaving no one behind. This publication is part of the Investment Toolkits series under the FAO Investment Centre's Knowledge for Investment (K4I) series. The contents of this publication have been developed into three e-learning courses, which are accessible for free through the FAO E-learning Academy.

**COVID in the Islands: A comparative perspective on the Caribbean and the Pacific** Yonique Campbell, John Connell, 2021-10-29 This book provides the first wide-ranging account of the impact of the COVID-19 pandemic in two contrasting island regions - the Caribbean and the Pacific - and in several islands and island states. It traces the complexity of effects and responses, at different scales, through the first critical year. Written by a range of scholars and practitioners working in the region the book focuses on six key themes: public health; the economies (notably the collapse of tourism, the revival of local agriculture and fishing, and the rebirth of self-reliance, and even barter); the rescue by remittances; social tensions and responses; public policy; and future 'bubbles' and regional connections. Even with marine borders that excluded the virus all island states were affected by COVID-19 because of a considerable dependence on tourism - prompting urgent challenges for governance, economic management and development, as small states sought to balance lives against livelihoods in search of revitalisation or even a 'new normal'.

*Políticas de formação técnica e tecnológica no contexto da internacionalização da educação* Sueli Soares dos Santos Batista, Luis Enrique Aguilar, Emerson Freire, 2022-07-18 Políticas

de formação técnica e tecnológica no contexto da internacionalização da educação é consequência de uma trajetória de pesquisa que se deteve na importância das instituições para a configuração da política educacional, mais especificamente a voltada à EPT frente aos desafios da internacionalização da educação. Propõe a apresentação dos debates e resultados obtidos a partir do projeto de pesquisa apoiado pela FAPESP, de título homônimo, realizado entre 2018 e 2020, em que foram estudadas três instituições de ensino: CEETEPS (São Paulo), IFSULDEMINAS (Minas Gerais) e IFSP (São Paulo), considerando sobretudo o período de expansão destas redes a partir dos anos 2000.

**Age with Care** Gianluca Cafagna, Natalia Aranco, Pablo Ibarrarán, María Laura Oliveri, Nadin Medellín, Marco Stampini, 2019-10-29 In Latin America and the Caribbean, more than 8 million older people are unable to independently complete at least one basic activity of daily living, such as eating, bathing or showering, or getting in and out of bed. This situation, called care dependence, affects 12% of people over age 60 and nearly 27% of people over age 80 in the region. The demand for long-term care services will more than triple in the next 30 years, due primarily to population aging and the epidemiological transition. The region will also see a drop in the traditional supply of long-term care services, which are based mainly on the unpaid work of women in families. Given this outlook, societies and governments must ready themselves to support care-dependent people and their caregivers, while at the same time advancing gender equity. Countries need to design long-term care systems, and they need to do so now. This publication addresses five key questions for countries in the region that wish to start this process: 1) Why is long-term care an issue that cannot wait?; 2) How do countries design a long-term care system?; 3) What are the countries in the region doing?; 4) How much would a long-term care system cost?; 5) Where should we start? This is the first IDB publication that is

interactive and accessible to as many people as possible.

*Determinantes en la ejecución de la cartera de préstamos de inversión* Guillermo Lagarda,Arnoldo Lopez,Patricia Nalvarte,Gabriel Castillo,Jennifer Linares,Reinaldo Cerdeira,Osmel Manzano,2018-08-31 Con el objetivo de identificar brechas de eficiencia operativa tanto del Banco como de los prestatarios y presentar posibles mitigantes, se lleva a cabo un análisis integral que combina las experiencias operativas con la formalidad estadística para fundamentar sus recomendaciones. En concreto, las preguntas que se plantean para guiar este análisis pueden resumirse en: ¿Cuáles son las causas de los retrasos en la ejecución? ¿En qué medida el tiempo para desembolsar de un proyecto se atribuye a condicionantes externas (capacidades de los países)? y ¿Cuáles son atribuibles a condiciones internas (procesos y capacidades del BID)? Los retrasos en la ejecución se estiman contra los plazos originales de los proyectos, planeados al momento de su aprobación por el Banco.

### **Better Spending for Better Lives** Alejandro

Izquierdo,Carola Pessino,Guillermo Vuletin,Inter American Development Bank,2018-09-16 How can this puzzle of larger demands and fiscal strengthening be solved? This edition of the development in the Americas (DIA) report focuses precisely on this question. The book suggests that the answer is about fiscal efficiency and smart spending rather than the standard solution of across-the-board spending cuts to achieve fiscal sustainability— sometimes at great cost for society. It is about doing more with less. · Analysis of government spending in Latin America and the Caribbean reveals widespread waste and inefficiencies that could be as large as 4.4 percent of the region's GDP, showing there is ample room to improve basic services without necessarily spending more resources. · The publication argues against across-the-board cuts. It looks at whether

countries spend too much or too little on different priorities, whether they invest enough to ensure a better future, and whether those expenditures make inequality better or worse. Along with the diagnosis, the report offers several policy recommendations on how to improve the efficiency of government spending.

iPhone for Work Ryan Faas, 2011-02-03 The iPhone is cool, and the iPhone is fun, but the iPhone also means serious business. For those of you who bought your iPhones to help get your lives organized and free yourselves from the ball and chain of desktop computing, *iPhone at Work: Productivity for Professionals* is the book to show you how. There are plenty of general-purpose iPhone guides, but *iPhone at Work: Productivity for Professionals* shows you how to complete all the traditional smartphone tasks, like to-do lists, calendars, and e-mail, and become much more efficient and productive at work. You'll learn mechanisms for developing effective workflows specific to the features of the iPhone and also efficient strategies for dealing with the specialized aspects of business and professional lifestyles. From the introduction and throughout the book, author Ryan Faas targets professional users of the iPhone. You'll tour the built-in applications and configuration options, always with work and productivity in mind, and discover all of the enterprise features of the iPhone, learning how to configure and use each one. Then discover the App Store: source of all third-party software. There's something a bit daunting about the dominance of games and frivolous apps on the best-seller lists, but there are serious business and vertical applications also available, and you'll learn about some of the best and how to take advantage of this wealth of add-on and very professional functionality. And for those administrators with the special job of deploying lots of new iPhones across the enterprise, this book concludes with two appendixes that provide information and resources for companies. The first is intended for organizations looking to

perform larger-scale iPhone or iPod touch deployments complete with device management. The second is geared for those companies that wish to develop an iPhone platform-oriented infrastructure through the use of customized in-house applications and iPhone/iPod touch-specific web services.

**Improving the EPA Multi-Sector General Permit for Industrial Stormwater Discharges** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Improving the Next-Generation EPA Multi-Sector General Permit for Industrial Stormwater Discharges, 2019-09-11 Industrial stormwater is derived from precipitation and/or runoff that comes in contact with industrial manufacturing, processing, storage, or material overburden and then runs offsite and enters drainage systems or receiving waters. In 1987, Congress significantly expanded the National Pollutant Discharge Elimination System (NPDES) program through amendments to the Clean Water Act to include industrial stormwater runoff conveyed through outfalls directly to receiving waters or indirectly through municipal separate storm sewer systems. The added regulation of stormwater in the NPDES program has been challenging. Stormwater is produced throughout a developed landscape, and its production and delivery are episodic. In 2009, the National Research Council released a comprehensive report on the Environmental Protection Agency's Stormwater Program that covered all sectors of the program. This study builds on that report, with a focus on industrial stormwater monitoring and management.

Underbelly Rachel Hall-Clifford, 2024-05-14 An unsettling exploration of the hidden power dynamics of global health, seen through the lens of childhood diarrhea and its treatment within the Guatemalan context. Deaths from childhood diarrhea seem preposterous in high-income countries. Yet, for children under five years old in the rest of the world, diarrhea is the third highest

cause of mortality. Despite a glut of prevention and treatment programming spanning more than forty years, this least glamorous of global health ills remains a critical problem. In *Underbelly*, Rachel Hall-Clifford takes a hard look at the pathways of global health funding and development policies and the outcomes they deliver for recipient individuals and communities. Drawing on fifteen years of ethnographic research in highland Guatemala, Hall-Clifford focuses on the provision of primary health care services as a critical exemplar of how global health and development programs fall short. Guatemala has a fragmented health system, the author explains, that guarantees health as a human right but also suffers from systemic racism, inadequate health services and access to those services, community distrust from a legacy of harm and violence, and a demeaning paternalism. Bringing together the discourses of global health and medical anthropology, *Underbelly* explores the ways in which global health—its actors, structures, and systems—perpetuates the challenges it purports to fix: this is the underbelly. Hall-Clifford argues that global health programs, conceived in offices distant from the places in which they are delivered, often have unintended consequences and contribute to pluralistic and exclusionary health systems that mirror neoliberal economies. She argues that if we are to fix this entrenched crisis of health inequity, we must use the immense resources of global health to center local communities as drivers of change. With a foreword written by Waleska López Canu, an Indigenous Maya medical director, and an afterword by Arthur Kleinman, renowned expert in global health, this book underscores the importance of looking deeper into what seems on its surface incontrovertibly “good” to understand the more complex realities on the ground and in people’s lives.

**Economics and Climate Emergency** Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms

of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed. Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change (UNFCCC) and the beginning of policy on climate change. Thirty wasted years. To most politicians, long-term collective interest has been denominated in meaningless units of time, a never and forever that has continually delayed action. From complacency has come potential disaster, and we are now living in a time of climate emergency and ecological breakdown. The next decade is a pivotal period requiring fundamental change. But numerous impediments remain. Continual material, energy and economic growth on a planetary scale are manifestly impossible, and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality. Instead, they offer a series of implausible commitments and pledges rooted in technofixes, without addressing the fundamental drivers of the problems the world faces. The edited volume explores the issues and offers a variety of ways to think through the problems at hand, from postgrowth, degrowth and social ecological economics to policy assemblage and transversalism. The chapters in this book were originally published in the journal *Globalizations*.

**Trade Protectionism in an Uncertain and Interconnected Global Economy** Nicolás Albertoni, 2023-09-29  
Trade Protectionism in an Uncertain and Interconnected Global Economy presents the results of almost five years of research on the political economy of trade policy. It argues that in a global context dominated by economic uncertainty and interdependencies, the mechanisms that have fueled the diffusion of trade liberalization under the World Trade Organization (preferential trade agreements and global value chains) can also become channels for protectionism (based on less observable non-tariff or murkier measures). Countries have changed the way they respond to protectionism, which impacts bilateral relations. The author explores why and how increased global trade interconnectivity has also become a channel for new forms of trade protectionism, and especially how this impacts the developing world. These counterintuitive dynamics constitute the newest wave in the literature on trade interdependence. Previous

research on trade policy has often concentrated on just one aspect of the effects of an interconnected global economy: the more political and economic linkages countries build among themselves, the fewer tensions they will generate across borders. From a trade policy perspective, this causal claim has held steady for many decades. This book bridges academic analysis with trade policymaking and offers a road map for the kinds of commercial policy reforms that will be essential for the successful revival of world markets after global economic crises as it was the COVID-19 pandemic. This book will appeal to postgraduates, researchers, and academics interested in international political economy, comparative political economy, development, business, and all those with a particular interest in Latin American trade policy dynamics. It will also be of interest to trade policy scholars, practitioners, and readers with an interest in how governments, firms, and regions around the developing world transition into more knowledge-intensive activities.

Contemporary Issues Within Caribbean Economies Colin Cannonier, Monica Galloway Burke, 2022-06-08 The Caribbean economy remains a region with many paradoxes. Despite a relative abundance of natural and valuable resources, including its people, large segments of the region still grapple with significant levels of debt, environmental degradation, high unemployment in the formal sector, climate change, limited progress in technological innovation, increasing energy costs, remittance dependency, tourism dependency, loss of correspondent banking relations, exchange rate, noncommunicable diseases, and domestic politics to name more than a few. The poorest countries still lag and remain far more vulnerable to external factors related to trade and global financial sector issues. This edited volume takes a closer look at the contemporary issues related to the economies of the Caribbean. The book provides an added dimension in that each of the chapters includes the contributions of a scholar with lived

experiences in and knowledge of the region. Indeed, the book underscores the detailed evidence-based research and perspectives on topics providing insights into the current landscape of the Caribbean. Ultimately, understanding the Caribbean in its varied contexts is an important milestone in pursuing policies that will contribute to flourishing economies replete with sustained growth and development.
