*Fair Value Measurement* Mark L. Zyla, 2012-10-23 FAIR VALUE MEASUREMENT Practical Guidance and Implementation Writing Fair Value Measurement was a monumental task fraught with controversy not only in the U.S., but also abroad. Having coauthored a book with Mark as well as written one myself, I was even more impressed that Mark was able to navigate these fair value minefields and produce a work that will be a tremendous help to accountants and non-accountants alike. If you are looking for a 'one-stop' book on fair value measurement, this is it! Neil J. Beaton, CPA/ABV, CFA, ASA, Managing Director, Valuation Services, Alvarez & Marsal In recent years, the FASB and the IASB have added many requirements for various assets and liabilities to be measured at fair value. In this book, Zyla clearly describes how to implement fair value measurement and how investors and creditors should interpret it. The crisp writing and illuminating analysis will help readers to grasp the essence of fair value accounting and to apply it wisely. J. Edward Ketzel, Associate Professor of Accounting, Pennsylvania State University The focus of the book is on fair value measurement based on level 3 inputs. This is a critical area of valuations for financial reporting due to a false comfort given by routine application of evaluating models and assumptions without real possibilities of calibration. Mark Zyla offers an extraordinary help in understanding the reliability of the inputs and the outputs of the different methodologies and the inherent biases in each of them. The book is a precious support for better valuation both in U.S. GAAP and in IFRS fair value reporting. Mauro Bini, Full Professor of Corporate Finance, Bocconi University; Chairman, Management Board OIV (Organismo Italiano di Valutazione) Essential guidance on the fair value measurement process Now in a second edition, Fair Value Measurement: Practical Guidance and Implementation helps you succeed in understanding the fair value accounting rules that entities must follow. The result is a resource that you can rely on to understand the importance of valuation and the concepts that define it. In basic, nontechnical language, author Mark Zyla presents practical direction for best practices of financial valuation as well as for understanding the many FASB pronouncements involving fair value. An essential guide for auditors and valuation specialists, Fair Value Measurement: Practical Guidance and Implementation, Second Edition brings you up to speed on what fair value really means.

*The Routledge Companion to Fair Value in Accounting* Gilad Livne, Garen Markarian, 2018-06-13 The concept of fair value marked a major departure from traditional cost accounting. In theory, under this approach a balance sheet that better reflects the current value of assets and liabilities. Critics of fair value argue that it is less useful over longer time frames and prone to distortion by market inefficiencies resulting in procyclicality in the financial system by exacerbating market swings. *Private Equity Accounting, Investor Reporting, and Beyond* Mariya Stefanova, 2015 Private Equity Accounting, Investor Reporting and Beyond takes the discussion around private equity accounting to the next level beyond the basic private equity accounting principles identifying areas of importance where things can go wrong and delving into the intimate details of the different sub-asset classes such as real estate funds, infrastructure funds, debt funds, mezzanine funds, fund-of-funds (FoF) and other Limited Partners (large institutional investors, pension funds, university endowments, etc). The book also adds a new perspective - the perspective of the Limited Partners (LPs) investing in private equity allowing the LPs to have a peek at the private equity kitchen and its processes where all the General Partner (GP) accounts, investor reports and capital statements are forged and provides them with essential tips on what to check in GP reports and what the pitfalls of LP accounting for PE investments are. Starting with the main changes in the private equity landscape, the impact of private equity structures on the accounting and reporting, the importance of allocations and allocation rules, the reasons of their existence and the impact on investor reports of getting them wrong, highlighting some neglected processes (e.g. rebalancing, partner transfers) and common mistakes to some essential guidance and best practice of carried interest modelling, The Advanced Guide reveals intimate secrets of these processes previously available only by learning from peers. The Advanced Guide also elaborates on various reporting frameworks (ILPA Quarterly Reporting Best Practice, IPEV Investor Reporting Guidelines) and additional layers of reporting (ESG Reporting) and their specifics. The chapter on private equity valuations provides some invaluable guidance on valuations for different types of instruments such as non-controlling interest, fund interests (for LPs), private loans, not-traded debt and other debt instruments and provides an update on some current discussions such as the unit of account and the use of mathematical models (e.g. Option Pricing Models, Probability-expected Weighted Return Models) in private equity. Performance measurement is also taken to a whole new level discussing not only traditional performance metrics such as IRR and multiples and revealing some major flaws in the IRR as a traditional metric used by private equity, but also suggesting some new advanced performance metrics used by the most sophisticated GPs and LPs. Drawing on extensive experience as a practitioner and instructor, Mariya Stefanova reviews all the details and processes that private equity firms and fund accountants should follow, identifying both current best practices and costly pitfalls to avoid. Replete with up-to-date, user-friendly examples from all main jurisdictions, this guide explains the precise workings and lifecycles of private equity funds; reviews commercial terms; compares structures and their current tax treatments; shows how to read Limited Partnership Agreements; and much more.
