Steampunk and Nineteenth-Century Digital Humanities Roger Whitson, 2016-12-01 Steampunk is more than a fandom, a literary genre, or an aesthetic. It is a research methodology turning history inside out to search for alternatives to the progressive technological boosterism sold to us by Silicon Valley. This book turns to steampunk's quirky temporalities to embrace diverse genealogies of the digital humanities and to unite their methodologies with nineteenth-century literature and media archaeology. The result is nineteenth-century digital humanities, a retrofuturist approach in which readings of steampunk novels like William Gibson and Bruce Sterling's *The Difference Engine* and Ken Liu's *The Grace of Kings* collide with nineteenth-century technological histories like Charles Babbage's use of the difference engine to enhance worker productivity and Isabella Bird's spirit photography of alternate history China. Along the way, *Steampunk and Nineteenth-Century Digital Humanities* considers steampunk as a public form of digital humanities scholarship and activism, examining projects like Kinetic Steam Works's reconstruction of Henri Giffard's 1852 steam-powered airship, Jake von Slatt's use of James Wimshurst's 1880 designs to create an electric influence machine, and the queer steampunk activism of fans appearing at conventions around the globe. Steampunk as a digital humanities practice of repurposing reacts to the growing sense of multiple non-human temporalities mediating our human histories: microtemporal electricities flowing through our computer circuits, mechanical oscillations marking our work days, geological stratifications and cosmic drifts extending time into the millions and billions of years. Excavating the entangled, anachronistic layers of steampunk practice from video games like *Bioshock Infinite* to marine trash floating off the shore of

Los Angeles and repurposed by media artist Claudio Garzón into steampunk submarines, Steampunk and Nineteenth-Century Digital Humanities uncovers the various technological temporalities and multicultural retrofutures illuminating many alternate histories of the digital humanities.

The Inner Coast: Essays Donovan Hohn, 2020-06-02 Prize-winning essays on our changing place in the natural world by the best-selling author of *Moby-Duck*. Writing in the grand American tradition of Annie Dillard and Barry Lopez, Donovan Hohn is an “adventurous, inquisitive, and brightly illuminating writer” (New York Times). Since the publication of *Moby-Duck* a decade ago, Hohn has been widely hailed for his prize-winning essays on the borderlands between the natural and the human. *The Inner Coast* collects ten of his best, many of them originally published in such magazines as the New York Times Magazine and Harper’s, which feature his physical, historical, and emotional journeys through the American landscape. By turns meditative and comic, adventurous and metaphysical, Hohn writes about the appeal of old tools, the dance between ecology and engineering, the lost art of ice canoeing, and Americans’ complicated love/hate relationship with Thoreau. *The Inner Coast* marks the return of one of our finest young writers and a stylish exploration of what Guy Davenport called “the geography of the imagination.”

Field Notes Sara Jewell, 2016-10-03 Reflections on country life on Canada’s eastern coast: “Gentle humor and prose as clear and lilting as the song of the hermit thrush at dusk.” —Deborah Carr, author of *Sanctuary: The Story of Naturalist Mary Majka* Sara Jewell has lived at eighteen different addresses—but there was one that remained

constant: Pugwash Point Road in rural Nova Scotia. She was nine years old the first time her family vacationed in the small fishing village about an hour from the New Brunswick border, and the red soil stained her heart. Life, as it's wont to do, eventually took Jewell away from the east coast. But when her marriage and big-city life started to crumble, she wanted only one thing: a fresh start in Pugwash. *Field Notes* includes forty-one essays on the differences, both subtle and drastic, between city life and country living. From curious neighbors and unpredictable weather to the reality of roadkill and the wonders of wildlife, award-winning narrative journalist Sara Jewell strikes the perfect balance between honest self-examination and humorous observation—in a delightful memoir accented with original drawings by Joanna Close. "A born storyteller . . . her sharp-witted but kind-hearted portraits of country people, places, and customs make for a remarkable first book."

Vintage and Classic Tractor Restoration Richard Lofting, 2017-02-28 Vintage and Classic Tractor Restoration is a complete guide to the subject, looking at how to initially purchase a tractor, through private means or at auction, and then how to restore it back to its former glory, as it would have looked when it left the factory. It is even possible to preserve a classic tractor in its working condition, which has a unique appeal to some tractor collectors and in some ways is harder than a full restoration to undertake. Practical techniques have been amply illustrated throughout the book, ranging from the simple use of a lathe or milling machine to the making from scratch of various tools useful in restoration work. Rather than just replacing items such as carburettor, starter motor or dynamo, practical advice is given on how to test and rebuild these components back to full operation. Fifty-two practical picture spreads show techniques suitable for restorers of all levels of skill. Contents: Setting up the workshop and making specialist tools; Finding a tractor to restore; Engine and fuel; Electrical systems; Transmission and brakes; Wheels, tyres and steering; Hydraulics and the three-point linkage; Metalwork; Painting and finishing. Aimed at serious tractor enthusiasts and agricultural machinery engineers and fully illustrated with 1100 colour photographs.

Carmel Valley Elizabeth Barratt, 2009-12-01 From the Ventana Wilderness, the Carmel River descends 36 miles through steep canyons into the spreading Carmel Valley. Rain-gorged in spring, it rushes to the Pacific Ocean at Carmel Bay. In summer, shallow riverbanks welcome deer, mountain lions, and waterfowl. For millennia, native tribes fished along the river, which was discovered in 1602 by Sebastian de Vizcaino. He called the waterway El Rio del Carmelo, describing it as lined with black poplars and other trees of Castile. Ranches, dairies, and orchards thrived under Spanish, Mexican, and finally American flags. The Carmel River, like the valley it defines, has accommodated native, farmer, resident, and now the vacationer as it flows along through time. Today vineyards, tasting rooms, boutiques, and resorts decorate the rural landscape, beckoning visitors and locals alike.

Interpreting Agriculture at Museums and Historic Sites Debra A.

Reid,2017-01-23 Interpreting Agriculture in Museums and Historic Sites orients readers to major themes in agriculture and techniques in education and interpretation that can help you develop humanities-based public programming that enhance agricultural literacy. Case studies illustrate the ways that local research can help you link your history organization to compelling local, national (even international) stories focused on the multidisciplinary topic. That ordinary plow, pitch fork, and butter paddle can provide the tangible evidence of the story worth telling, even if the farm land has disappeared into subdivisions and agriculture seems as remote as the nineteenth century. Other topics include discussion of alliances between rural tourism and community-supported agriculture, farmland conservation and stewardship, heritage breed and seed preservation efforts, and antique tractor clubs. Any of these can become indispensable partners to history organizations searching for a new interpretive theme to explore and new partners to engage.

The Future of the Southern Plains Sherry L. Smith,2005-08-01 In The Future of the Southern Plains, scholars bring the region to the forefront by asking important questions about its past and suggesting prospects for its future. The contributors, some of them natives of the region, bring to their work a blend of scholarship and personal experience. They match intellectual sophistication with deep affection for a place defined primarily as western Texas, Oklahoma, and eastern New Mexico. Within this volume is a story about America, a story about limits, and a story about challenging those limits. Seven historians, one geographer, and a paleoclimatologist contribute a wealth of observation, analysis, and commentary on the environmental characteristics and history of the Southern Plains. They address such themes as failing communities, scarce water, endangered species, and disappearing ways of life—and the possible results of these developments not only in the Southern Plains but elsewhere on the globe. Based on presentations at a symposium sponsored by the Clements Center for Southwest Studies at Southern Methodist University, these essays treat the most important aspects of life on the Southern Plains today, from climate, politics, and religion to business and environmental renewal. Contributors and topics include: Sherry L. Smith: Introduction Dan Flores: Environmental destruction and preservation John Miller Morris: Corporations and family farms Diana Davids Olien: Oil production John Opie: Water management Jeff Roche: Political history Yolanda Romero: Political history Elliott West: Exploration Connie Woodhouse: Droughts
