**A Day at the Farmers Market** Luke Kelly,2014-04-21 Bright and compelling illustrations accompany Nanner and his fruit friends as they tour the local farmers market learning about local foods. Kids will be fully engaged in the learning process of the origins of many of their favorite fruits, vegetables, and protein. Character names are derived from something about the character. June the strawberry is named for the variety of strawberries known as June-bearing. Could there be fun at a farmers market? When questions are asked and examples are provided readers will want to elaborate through discussion and activities. Nanner wants to know if you've tried honey on a biscuit and whether you think that the cut flowers are beautiful. Who knows, maybe one of the characters will inspire young food growers everywhere! Locate a farmers market in your area with the United States Department of Agriculture's Farmers Market Locator listed at the end of the book.

*The Chef's Garden* FARMER LEE JONES,2021-04-27 An approachable, comprehensive guide to the modern world of vegetables, from the leading grower of specialty vegetables in the country Near the shores of Lake Erie is a family-owned farm with a humble origin story that has become the most renowned specialty vegetable grower in America. After losing their farm in the early 1980s, a chance encounter with a French-trained chef at their farmers' market stand led the Jones family to remake their business and learn to grow unique ingredients that were considered exotic at the time, like microgreens and squash blossoms. They soon discovered chefs across the country were hungry for these prized ingredients, from Thomas Keller in Napa Valley to Daniel Boulud in New York City. Today, they provide exquisite vegetables for restaurants and home cooks across the country. The Chef's Garden grows and harvests with the notion that every part of the plant offers something unique for the plate. From a perfect-tasting carrot, to a tiny red royal turnip, to a pencil lead-thin cucumber still attached to its blossom, The Chef's Garden is constantly innovating to grow vegetables sustainably and with maximum flavor. It's a Willy Wonka factory for vegetables. In this guide and cookbook, The Chef's Garden, led by Farmer Lee Jones, shares with readers the wealth of knowledge they've amassed on how to select, prepare, and cook vegetables. Featuring more than 500 entries, from herbs, to edible flowers, to varieties of commonly known and not-so-common produce, this book will be a new bible for farmers' market shoppers and home cooks. With 100 recipes created by the head chef at The Chef's Garden Culinary Vegetable Institute, readers will learn innovative techniques to transform vegetables in their kitchens with dishes such as Ramp Top Pasta, Seared Rack of Brussels Sprouts, and Cornbread-Stuffed Zucchini Blossoms, and even sweet concoctions like Onion Caramel and Beet Marshmallows. The future of cuisine is vegetables, and Jones and The Chef's Garden are on the forefront of this revolution.

### **Farmers Markets, Low Income Communities and Government Assistance Programs**

Alysha Brady, 2012 Since the passage in 1976 of the Farmer-to-Consumer Direct Marketing Act, there has been a sharp rise in number of farmers markets in this country, from approximately 600 in the 1970s to over 7,000 today. With this increase, farmers markets began to attract attention not only from farmers and consumers, but also from public policy experts. Some research has suggested that farmers markets may be a way to alleviate the poor access to healthy foods in low-income communities, in areas known as food deserts. The WIC Farmers Market Nutrition Program (FMNP) and the Seniors Farmers Market Nutrition Program (SFMNP) are both efforts to connect low-income individuals with farmers market produce. However, there is little data to suggest that farmers markets are located in food deserts often enough to have an impact. Additionally, previous research has shown that the average farmers market customer is an older, highly educated, middle-to-upper income female suggesting that low-income communities have not embraced farmers markets. This research seeks to shed more light on these issues. By combining data from a database of farmers markets maintained by the USDA's Agricultural Marketing Service, the food desert locator created by the USDA's Economic Research Service and demographic data collected by the 2006-2010 American Community Survey, this study provides a clearer vision of the community that farmers markets serve. The research reveals that farmers markets in a census tract are correlated with percentage of Hispanic population, percentage identifying as Some Other Race, percentage of households living in poverty and the percentage of households receiving SNAP/food stamps. However, there was no correlation between farmers markets and food deserts.

Nina Planck grew up in Virginia, picking tomatoes, corn, beans, melons, and more on the family farm, and selling the fresh produce at farmers' markets. In *The Farmers' Market Cookbook*, Nina explains what the farmer knows about every vegetable from asparagus to zucchini—and what the cook needs to know. In more than thirty chapters, each dedicated to cooking with the freshest fruits and vegetables, Nina offers simple and delicious recipes for beef, pork, chicken, and fish, as well as a passel of ideas for perfect side dishes, soups, and desserts—all with produce in the lead role. Try roasted pork chops with apple and horseradish stuffing, blueberry almond crisp, and risotto with oyster mushrooms. Nina also offers tips only farmers would know, kitchen strategies, options for a surplus, advice on what to buy at the market and when, what to look for in an eggplant or a blueberry, and how to keep it all fresh. *The Farmers' Market Cookbook* is perfect for any cook who has stared helplessly at fresh produce, praying for inspiration. Local Food Systems; Concepts, Impacts, and Issues Steve Martinez, 2010-11 This comprehensive overview of local food systems explores alternative definitions of local food, estimates market size and reach, describes the characteristics of local consumers and producers, and examines early indications of the economic and health impacts of local food systems. Defining ¿local¿ based on marketing arrangements, such as farmers selling directly to consumers at regional farmers¿ markets or to schools, is well recognized. Statistics suggest that local food markets account for a small, but growing, share of U.S. agricultural production. For smaller farms, direct marketing to consumers accounts for a higher percentage of their sales than for larger farms. Charts and tables.

## Comparing the Structure, Size, and Performance of Local and Mainstream Food Supply Chains

Robert P. King, 2010 A series of coordinated case studies compares the structure, size, and performance of local food supply chains with those of mainstream supply chains. Interviews and site visits with farms and businesses, supplemented with secondary data, describe how food moves from farms to consumers in 15 food supply chains. Key comparisons between supply chains include the degree of product differentiation, diversification of marketing outlets, and information conveyed to consumers about product origin. The cases highlight differences in prices and the distribution of revenues among supply chain participants, local retention of wages and proprietor income, transportation fuel use, and social capital creation. Charts and tables.
