Cycling and Cinema Bruce Bennett, 2019-04-30 A unique exploration of the history of the bicycle in cinema, from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films. *Cycling and Cinema* explores the history of the bicycle in cinema from the late nineteenth century through to the present day. In this new book from Goldsmiths

Press, Bruce Bennett examines a wide variety of films from around the world, ranging from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films, to consider the complex, shifting cultural significance of the bicycle. The bicycle is an everyday technology, but in examining the ways in which bicycles are used in films, Bennett reveals the rich social and cultural importance of this apparently unremarkable machine. The cinematic bicycles discussed in this book have various functions. They are the source of absurd comedy in silent films, and the vehicles that allow their owners to work in sports films and social realist cinema. They are a means of independence and escape for children in melodramas and kids' films, and the tools that offer political agency and freedom to women, as depicted in films from around the world. In recounting the cinematic history of the bicycle, Bennett reminds us that this machine is not just a practical means of transport or a child's toy, but the vehicle for a wide range of meanings concerning individual identity, social class, nationhood and belonging, family, gender, and sexuality and pleasure. As this book shows, two hundred years on from its invention, the bicycle is a revolutionary technology that retains the power to transform the world.

Fresh Fruit, Broken Bodies Seth M. Holmes, 2013-06-19 An intimate examination of the everyday lives and suffering of Mexican migrants and indigenous people in our contemporary food system. An anthropologist and MD in the mold of Paul Farmer and Didier Fassin, Seth Holmes shows how market forces, anti-immigrant sentiment, and racism undermine health and healthcare. Holmes's material is visceral and powerful. He trekked with his companions illegally through the desert into Arizona and was jailed with them before they were deported. He lived with indigenous families in the mountains of Oaxaca and in farm labor camps in the U.S., planted and harvested corn, picked strawberries, and accompanied sick workers to clinics and hospitals. This "embodied anthropology" deepens our theoretical understanding of how health equity is undermined by a normalization of migrant suffering, the natural endpoint of systemic dehumanization, exploitation, and oppression that clouds any sense of empathy for "invisible workers." *Fresh Fruit, Broken Bodies* is far more than an ethnography or supplementary labor studies text; Holmes tells the stories of food production workers from as close to the ground as possible, revealing often theoretically-discussed social inequalities as irreparable bodily damage done. This book substantiates the

suffering of those facing the danger of crossing the border, threatened with deportation, or otherwise caught up in the structural violence of a system promising work but endangering or ignoring the human rights and health of its workers. All of the book award money and royalties from the sales of this book have been donated to farm worker unions, farm worker organizations and farm worker projects in consultation with farm workers who appear in the book.

Archigram Simon Sadler, 2005-06-24 The first book-length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional

architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In *Archigram: Architecture without Architecture*, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. *Archigram: Architecture*

without Architecture—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the disappearance of architecture.

The Art of Thinking Clearly Rolf Dobelli, 2014-05-06 A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these “thinking errors” to make better decisions and have a better life Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as “cognitive errors.” Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to

keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The “behavioral turn” in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don’t. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors—offering guidance and insight into everything why you shouldn’t accept a free drink to why you SHOULD walk out of a movie you don’t like it to why it’s so hard to predict the future to why shouldn’t watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve

the puzzle of human reasoning.

Harmattan, A Wind of Change Carolyn Johnston, 2010-03-30

The end of empire, a romantic story and the social life and culture of an elite British colony - these are the fascinating themes to emerge from this unique collection of letters and diary entries. It is an inside story of Northern Nigeria's independence and of a clash of cultures. Tim Johnston's family was rich in patrician imperial tradition; his father and two uncles were in the 'heaven-born' Indian Civil Service and Tim spent his early years in the Punjab. After his degree at Oxford and the Oxford Colonial Administrative Service course he joined the British Colonial Service in Northern Nigeria. Berrice came from a very different background - a broken home and work in a dress-shop at the age of 14. War service provided a powerful and romantic link: Tim became a war hero and decorated fighter pilot, Berrice joined the ATS and they were married in 1942. Tim returned to Northern Nigeria after the war and was marked as a high flyer. He served a successful apprenticeship as cadet, District Officer and Permanent Secretary to the first Premier of Northern Nigeria, the redoubtable Ahmadu Bello, ultimately becoming Deputy Governor - vital roles in the path to independence. But Berrice could never adjust to the role of 'senior

wife' in the social life of the colony. Her inner feelings of self-doubt could lead to aloofness, even a 'froitness'. She confessed to Lady Sharwood-Smith, the Governor's wife, 'I am not naturally a very social person'. Carolyn Johnston has woven together a series of delightful and revealing letters and diary entries from her parents which show both the social tensions of colonial life and illuminate Northern Nigeria on the brink of independence. 'Harmattan, A Wind of Change' is a rich treasure-house for scholars studying the end of empire and for readers who want to know about the personal impact of empire.

Sociology Beyond Societies John Urry, 2012-11-12 In this ground-breaking contribution to social theory, John Urry argues that the traditional basis of sociology - the study of society - is outmoded in an increasingly borderless world. If sociology is to make a pertinent contribution to the post societal era it must forget the social rigidities of the pre-global order and, instead, switch its focus to the study of both physical and virtual movement. In considering this sociology of mobilities, the book concerns itself with the travels of people, ideas, images, messages, waste products and money across international borders, and the implications these mobilities have to our experiences of time,

space, dwelling and citizenship. *Sociology Beyond Society* extends recent debate about globalisation both by providing an analysis of how mobilities reconstitute social life in uneven and complex ways, and by arguing for the significance of objects, senses, and time and space in the theorising of contemporary life. This book will be essential reading for undergraduates and graduates studying sociology and cultural geography.
