Within each chapter there is a broad selection of meat, fish and vegetarian dishes and no recipe takes longer than 30 minutes from start to finish. Clear step-by-step instructions leave no room for time-consuming mistakes, and colour photographs illustrate the finished result. As one would expect from this innovative chef, credited with reinventing modern British food, the recipes are temptingly original and always utterly delicious.

Fast food, slow food, organic food Manuel

Handlechner,2008-04-01 Essay from the year 2007 in the subject Hotel Industry / Catering, grade: B-, University of Derby, 30 entries in the bibliography, language: English, abstract: The fast food industry had an incredible upswing in the last 40 years. The upswing in the sixties and seventies was a milestone in the history of the industry. This upswing leads to an incredible increasing number of Fast Food chains and outlets in the whole world. Vignali (2001) argues that the key to the international success of Fast Food chains were mainly the franchise-system. By franchising to local people, the delivery and interpretation of what might be seen as US brand culture are automatically translated by the local people in terms of both product and service. It could be argued that the increased consumption leads to the economical upswing. A number of authors (Ritzer 1999, Pine 2002, Solomon 2006) argue that the growth of consumption can be explained by a number of key factors, including: 1. The economy, 2. The growth of the youth market, 3. Technological change, 4. Social change, 5. The mass media, 6. Facilitating means, 7. Globalisation. A fitting sample for the development of the fast food industry is McDonalds. "McDonald's is one of only a handful of brands that command instant recognition in virtually every country of the world. McDonald's began with one restaurant in the US in 1955 and today there are more than 26,500 restaurants in over 119 countries, serving around 39 million people every day - making McDonald's by far the largest food service company in the world." (McDonalds statement UK)¹ Vignali (2001) argues that the concept of 'think local, act global' became a very often used business phrase of the twentieth century and increasingly topical when looking at globalisation. The concept of 'glocalisation' could be applied to McDonald's. On the one hand the aim of McDonald's is to create a standardised set of items on their menus that tastes the

same in Japan, Italy or even America. On the other hand they try to think local and adapted the original menu to meet customer needs in different countries. [...]

Cranks Fast Food Nadine Abensur,2001-10-01 Eating a variety of vegetables and fruit is vital to good health, but too many people still think of vegetarian cooking as a time-consuming affair of soaked pulses and brown rice. This book will change that perception forever. Nadine Abensur shows how to cook modern food - fast. No apology is necessary for the absence of fish and meat. There are recipes for all occasions, from speedy mid-week suppers to feasts for friends - all focused on vegetables and all achievable in around 15-20 minutes. Cranks Fast Food is full of surprises, with recipes for tarts and pies, fritters and salsas, roasts and casseroles alongside more obvious fast fare such as soups, stir-fries and snack meals. All the recipes are absolutely in tune with today's lighter, healthier style of eating - simply delicious food for vitality and health.

Chew on this Eric Schlosser,Charles Wilson,2006 'Chew On This' reveals the truth about the the fast food industry - how it all began, its success, what fast food actually is, what goes on in the slaughterhouses, meatpacking factories and flavour labs, the exploitation of young workers in the thousands of fast-food outlets throughout the world, and much more.

Fast Food Andrew F. Smith,2016-04-15 The single most influential culinary trend of our time is fast food. It has spawned an industry that has changed eating, the most fundamental of human activities. From the first flipping of burgers in tiny shacks in the

western United States to the forging of neon signs that spell out “Pizza Hut” in Cyrillic or Arabic scripts, the fast food industry has exploded into dominance, becoming one of the leading examples of global corporate success. And with this success it has become one of the largest targets of political criticism, blamed for widespread obesity, cultural erasure, oppressive labor practices, and environmental destruction on massive scales. In this book, expert culinary historian Andrew F. Smith explores why the fast food industry has been so successful and examines the myriad ethical lines it has crossed to become so. As he shows, fast food—plain and simple—devised a perfect retail model, one that works everywhere, providing highly flavored calories with speed, economy, and convenience. But there is no such thing as a free lunch, they say, and the costs with fast food have been enormous: an assault on proper nutrition, a minimum-wage labor standard, and a powerful pressure on farmers and ranchers to deploy some of the worst agricultural practices in history. As Smith shows, we have long known about these problems, and the fast food industry for nearly all of its existence has been beset with scathing exposés, boycotts, protests, and government interventions, which it has sometimes met with real changes but more often with token gestures, blame-passing, and an unrelenting gauntlet of lawyers and lobbyists. *Fast Food* ultimately looks at food as a business, an examination of the industry’s options and those of consumers, and a serious inquiry into what society can do to ameliorate the problems this cheap and tasty product has created.

Fast Food Nation Eric Schlosser, 2012 An exploration of the fast food industry in the United States, from its roots to its long-term consequences.

Franchising Hospitality Services Conrad Lashley, Alison Morrison, 2007-06-07 'Franchising in the Hospitality Industry' provides an overview of the issues, debates and challenges associated with business franchising. In two parts, this text firstly looks at the issues from both an academic and practitioner perspective. The second part looks more closely at service sector

groups in the hospitality industry, such as hotels, leisure and catering using national and international examples and illustrations. These demonstrate how the theories and debates discussed in the first part, are tackled in real life situations. Examples used are from well known companies such as McDonalds, Baskin Robbins, Burger King, Choice Hotels, Holiday Inn, Domino Pizza, Pierre Victoire amongst others.

Fast Food, Fast Talk Robin Leidner, 1993-08-04 Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting I feel happy! I feel terrific! Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

Food Deserts and Food Insecurity in the UK Dianna

Smith, Claire Thompson, 2022-08-09 This book examines the social inequalities relating to food insecurity in the UK, as well as drawing parallels with the US. Access to food in the UK, and especially access to healthy food, is a constant source of worry for many in this wealthy country. Crises, such as the COVID-19 pandemic, have coincided with a steep rise in the cost of living, meaning household food insecurity has become a reality for many more households. This book introduces a new framework to examine the many influences on local-level food inequalities, whether they result from individual circumstances or where a person lives. The framework will allow researchers new to the field to consider the many influences on food security, and to support emerging research around different sub-topics of food access and food security. Providing a thorough background to two key concepts, food deserts and food insecurity, the book documents the transition from area-based framing of food resources, to approaches which focus on household food poverty and the rise of food banks. The book invites researchers to acknowledge and explore the ever changing range of place-based factors that shape experiences of food insecurity: from transport and employment to rural isolation and local politics. By proposing a new framework for food insecurity research and by drawing on real-world examples, this book will support academic and applied researchers as they work to understand and mitigate the impacts of food insecurity in local communities. This book will be of great interest to students and scholars of food and nutrition security, public health, and sociology. It will also appeal to food policy professionals and policymakers who are working to address social inequalities and improve access to healthy and nutritious food for all.

Food Pedagogies Dr Elaine Swan,Dr Rick Flowers,2015-12-28

In recent years everyone from politicians to celebrity chefs has been proselytizing about how we should grow, buy, prepare, present, cook, taste, eat and dispose of food. In light of this, contributors to this book argue that food has become the target of intensified pedagogical activity across a range of domains, including schools, supermarkets, families, advertising and TV media. Illustrated with a range of empirical studies, this edited and interdisciplinary volume - the first book on food pedagogies - develops innovative and theoretical perspectives to problematize the practices of teaching and learning about food. While many different pedagogues - policy makers, churches, activists, health educators, schools, tourist agencies, chefs - think we do not know enough about food and what to do with it, the aims, effects and politics of these pedagogies has been much less studied. Drawing on a range of international studies, diverse contexts, genres and different methods, this book provides new sites of investigation and lines of inquiry. As a result of its broad ranging critical evaluation of 'food as classroom' and 'food as teacher', it provides theoretical resources for opening up the concept of pedagogy, and assessing the moralities and politics of teaching and learning about food in the classroom and beyond.
