Extreme Ultraviolet Astronomy Roger F. Malina,2013-10-22 The field of extreme ultraviolet astronomy will see two major satellite observatories to be launched in 1991, one by ESA (ROSAT mission), one by NASA (EUVE mission). These Proceedings discuss the potential for EUV Astronomy, results from recent missions, approved and possible future missions and new developments in EUV technology.

Gamma-Ray Bursts Gilbert Vedrenne,Jean-Luc Atteia,2009-03-20 Since their discovery was first announced in 1973, gamma-ray bursts (GRBs) have been among the most fascination objects in the universe. While the initial mystery has gone, the fascination continues, sustained by the close connection linking GRBs with some of the most fundamental topics in modern astrophysics and cosmology. Both authors have been active in GRB observations for over two decades and have produced an outstanding account on both the history and the perspectives of GRB research.

The Fast and the Furious Helen Wells,2012 The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society offers an explanation for the continued debate about one road safety intervention - the speed camera - by situating that debate within contemporary literature about the 'risk society' (Beck, 1992) and more broadly understood experiences of risk faced on a daily basis by drivers. Rather than a focus on risk as something that can be objectively assessed, measured and managed separately from the social context in which it is encountered, it suggests that 'risk' is something that permeates this particular debate from every angle.

District Nutrition Profiles: A quick guide George, Nitya Rachel,Vaid, Abhilasha,Nguyen, Phuong Hong,Avula, Rasmi,Menon, Purnima,2018-02-27 India is home to millions of undernourished children; however, little is known about the extent of undernutrition and its multiple determinants at the district level. POSHAN has generated District Nutrition Profiles (DNPs) for the 640 districts of India, with the aim of creating awareness, facilitating evidence-based discussions, and mobilizing action for nutrition at the district level. These 4 page profiles present a snapshot of the state of nutrition and its multiple determinants in each district. They were conceptualized to enable local leaders and civil society to understand what it takes to effectively tackle undernutrition in their communities. Data on the nutritional status of children in India is often only available at the national and state levels, with very little data present at the district level. So, this series is a step towards bridging this knowledge gap.
