Rocket-powered Science Ed Sobey,2005-11 Rocket science is as cool as science gets, and your students get to design, build, and test rockets themselves. Their designs. Their innovations. Not students anymore, they are rocket scientists.

A Smile as Big as the Moon Mike Kersjes,2007-04-01 Besides being a football coach at his Michigan High School, Mike Kersjes taught special education classes, dealing with children whose disabilities included Tourette syndrome, Downs Syndrome, dyslexia, eating disorders and a variety of emotional problems. One autumn Kersjes got the outlandish idea that his students would benefit from going to Space Camp, where, in conjunction with NASA, high school students compete in a variety of activities similar to those experienced by astronauts in training for space shuttle missions. There was only one problem: this program had been specifically designed for gifted and talented students, the best and the brightest from America's most privileged high schools. Kersjes believed that, given a chance, his kids could do as well as anybody, and with remarkable persistence broke down one barrier after another, from his own principal's office to the inner sanctum of NASA, until Space Camp opened its doors, on an experimental basis, to special ed students. After nine months of rigorous preparation, during which the class molded itself into a working team, they arrived at Space Camp, where they turned in a performance so startling, so surprising, that it will leave the reader breathless. A truly triumphant story of the power of the human spirit.

Our Year of War Daniel P. Bolger,2017-11-07 Two brothers--Chuck and Tom Hagel--who went to war in Vietnam, fought in the same unit, and saved each other's life. They disagreed about the war, but they fought it together. 1968. America was divided. Flag-draped caskets came home by the thousands. Riots ravaged our cities. Assassins shot our political leaders. Black fought white, young fought old, fathers fought sons. And it was the year that two brothers from Nebraska went to war. In Vietnam, Chuck and Tom Hagel served side by side in the same rifle platoon. Together they fought in the Mekong Delta, battled snipers in Saigon, chased the enemy through the jungle, and each saved the other's life under fire. But when their one-year tour was over, these two brothers came home side-by-side but no longer in step--one supporting the war, the other hating it. Former Secretary of Defense Chuck Hagel and his brother Tom epitomized the best, and withstood the worst, of the most tumultuous, shocking, and consequential year in the last half-century. Following the brothers' paths from the prairie heartland through a war on the far side of the world and back to a divided America, Our Year of War tells the story of two brothers at war--a gritty, poignant, and resonant story of a family and a nation divided yet still united.

Make: Rockets Mike Westerfield,2014-08-21 This book teaches the reader to build rockets--powered by compressed air, water, and solid propellant--with the maximum possible fun, safety, and educational experience. Make: Rockets is for all the science geeks who look at the moon and try to figure out where Neil Armstrong walked, watch in awe as rockets lift off, and want to fly their own model rockets. Starting with the basics of rocket propulsion, readers will start out making rockets made from stuff lying around the house, and then move on up to air-, water-, and solid propellant-powered rockets. Most of the rockets in the book can be built from parts in the Estes Designer Special kit.

Red Moon Kim Stanley Robinson,2018-10-23 Red Moon is a magnificent novel of space exploration and political revolution from New York Times bestselling author Kim Stanley Robinson. It is thirty years from now, and we have colonized the moon. American Fred Fredericks is making his first trip, his purpose to install a communications system for China's Lunar Science Foundation. But hours after his arrival he witnesses a murder and is forced into hiding. It is also the first visit for celebrity travel reporter Ta Shu. He has contacts and influence, but he too will find that the moon can be a perilous place for any traveler. Finally, there is Chan Qi. She is the daughter of the Minister of Finance, and without doubt a person of interest to those in power. She is on the moon for reasons of her own, but when she attempts to return to China, in secret, the events that unfold will change everything -- on the moon, and on Earth.

Hell on Earth Dafydd ab Hugh,2016-06-21 Go beyond the classic game Doom in this second book in a terrifying space epic... They were creatures seemingly spawned straight from the pits of Hell—demons, zombies, fire-breathing imps—all too horrifically close to the stuff of nightmare to be real. But they were. And on the inhospitable moons of Mars, Corporal Flynn Fly Taggart, Earth's last line of defense against a seemingly inexhaustible supply of alien warriors, beat them back almost single-handedly. But Taggart discovers that the war had barely begun...for while he was fighting them on Mars, the hellish creatures had established a beachhead on Earth itself. Now, with the aid of a fourteen-year-old female computer genius, an unrepentantly Mormon sniper, and the best soldier in this woman's army, Fly Taggart must defeat the invaders—and their treacherous human allies—yet again...

The Astounding, the Amazing, and the Unknown Paul Malmont,2011-07-05 Based on an incredible true episode of World War II history, Paul Malmont's new novel is a rollicking blend of fact and fiction about the men and women who were recruited to defeat the Nazis and ended up creating the future. In 1943, when the United States learns that Germany is on the verge of a deadly innovation that could tip the balance of the war, the government turns to an unlikely source for help: the nation's top science fiction writers. Installed at a covert military lab within the Philadelphia Naval Yard are the most brilliant of these young visionaries. The unruly band is led by Robert Heinlein, the dashing and complicated master of the genre. His "Kamikaze Group," which includes the ambitious genius Isaac Asimov, is tasked with transforming the wonders of science fiction into science fact and unlocking the secrets to invisibility, death rays, force fields, weather control, and other astounding phenomena—and finding it harder than they ever imagined. When a German spy washes ashore near the abandoned Long Island ruins of a mysterious energy facility, the military begins to fear that the Nazis are a step ahead of Heinlein's group. Now the oddball team, joined by old friends from the Pulp Era including L. Ron Hubbard (court-martialed for attacking Mexico), must race to catch up. The answers they seek may be locked in the legendary War of Currents, which was fought decades earlier between Nikola Tesla and Thomas Edison. As the threat of an imminent Nazi invasion of America grows more and more possible, events are set in motion that just may revolutionize the future—or destroy it—while forcing the writers to challenge the limits of talent, imagination, love, destiny, and even reality itself. Blazing at breathtaking speed from forgotten tunnels deep beneath Manhattan to top-secret battles in the North Pacific, and careening from truth to pulp and back again, The Astounding, the Amazing, and the Unknown is a sweeping, romantic epic—a page-turning rocket ship ride through the history of the future.
