Fula spoken in the City of Maroua (Northern Cameroon)

Jean Pierre Boutché, Zusammenfassung This book investigates the speech of non-ethnic Fulfulde speakers in Maroua, Northern Cameroon, focussed on the Christian community, where the language is adopted as evangelistic instrument beside French. Three key reasons motivate our investigation. First: Context - Fulfulde is embedded in a multilingual contact situation with Indo-European languages (French, English) and many other local languages belonging to Afro-Asiatic, Nilo-Saharan and Niger-Congo phyla. Second: Fulfulde as lingua franca in the region. This status is unique compared to the situation in other countries such as Senegal, Chad or Sudan where it is mainly an intraethnic medium of communication. Third: In contrast to the common perception of Fulfulde as the language of a Muslim community - here we are targeting the Christian Fulfulde speakers who share the language as well as the Bible (translated into Fulfulde) as common goods for interethnic communication in their religious activities.

Evolvements of Early American Foot Ball Melvin I.

Smith, 2008 This book is a revision/extension to the author's first book. With the recent availability of digitized old newspapers and magazines, much more foot ball data have been found for the 1800s. The games are again divided into three basic forms of foot ball; but now are listed under the actual style names used at the

times played. They are the Kicking Game/Association Football (now soccer), Carrying Game/Boston Rules Game/American Rugby Game/ English Rugby Union (now rugby) and the Ball-Control Game/American Collegiate Game/American Rugby Football (now football). Within these basic forms, the games are listed under colleges, independent clubs and high schools. There is a chapter on leagues/conferences and the appendices contain team histories with the types of foot ball played.

Mechanics of Structure (For Polytechnic Students)

Bhavikatti S.S., For students of civil engineering, the basic course on Strength of Materials is not enough to start their engineering career. They need an advanced course like Mechanics of Structures to understand strength and stability of several components of civil engineering structures. Hence, Mechanics of Structure is taught to all polytechnic students of civil engineering. It is written in SI units. Notations used are as per Indian standard codes. Apart from West Bengal Polytechnic students of civil engineering branch, it is hoped that the students of other states with similar syllabus may also find this book useful. KEY FEATURES • 100 per cent coverage of new syllabus • Emphasis on practice of numericals for guaranteed success in exams • Lucidity and simplicity maintained throughout • Nationally acclaimed author of over 40 books

Contextual Missiology of the Spirit Wessly

Lukose, 2013-01-01 This book explores the identity, context and features of Pentecostalism in Rajasthan, India as well as the

internal and external issues facing Pentecostals. It argues for an indigenous origin of Pentecostalism in Rajasthan, as it is a product of local Spirit revivals in the existing churches and the missionary activities of Indian Pentecostals. It also reveals that both the intra-church as well as extra-church issues place Pentecostals in a 'missio-ethical dilemma.' The book aims to suggest 'a contextual missiology of the Spirit,' as a new model of contextual missiology from a Pentecostal perspective. It is presented as a glocal, ecumenical, transformational, and public missiology.

Introduction to Surgery for Students Rebecca A.

Fisher, Kamran Ahmed, Prokar Dasgupta, 2017-08-03 Introduction to surgery aims to provide a one-stop guide to the basics of surgery for surgical rotations, as well as providing information for aspiring surgeons on how to explore a surgical career and build your CV for surgical applications. It aims to be the go-to companion for any student shadowing in theatres, and a thorough guide for students wishing to spend more time in a specific specialty, conduct research and plan careers. Introduction to Surgery for Students is an edited collection of 31 chapters from a group of 80 medical students, junior doctors and consultant surgeons. Each chapter has been written by a team made up of at

least one student and one senior, and has then been edited and reviewed by a medical student with a special interest in the topic. This near-peer style of writing allows our content to cater to a student’s needs at the right level, whilst having the expert input of surgeons who are leaders in their field.
