Constructions in Contact Hans C. Boas,Steffen Höder,2018-12-15 The last three decades have seen the emergence of Construction Grammar as a major research paradigm in linguistics. At the same time, very few researchers have taken a constructionist perspective on language contact phenomena. This volume brings together, for the first time, a broad range of original contributions providing insights into language contact phenomena from a constructionist perspective. Focusing primarily on Germanic languages, the papers in this volume demonstrate how the notion of construction can be fruitfully applied to investigate how a range of different language contact phenomena can be systematically analyzed from the perspectives of both form and meaning.
