**The Ninth Century and the Holy Grail** W. J. Stein,2009-09-15 One of the most valuable and original works on the Grail yet to appear in any language. --John Matthews, author of *The Mystic Grail* The definitive work on the historical background to the Grail Romances of the mediaeval age. --Trevor Ravenscroft, author of *The Spear of Destiny* Much plagiarized and its contents distorted over the years, Stein's seminal work is a classic of original scholarly and spiritual research. In studying the central Grail narrative of Wolfram von Eschenbach's *Parzival*, Stein takes a twofold approach. On the one hand, he searches historical records for the identity of actual people and events concealed behind the Grail epic's veil of romance. On the other hand, Stein deciphers Eschenbach's hidden spiritual messages, showing *Parzival* to be an esoteric document containing powerful pictures of the human being's inner path of development. Stein reveals the period of the ninth century to be far deeper and more important than to be of mere historical and academic interest. It is the karmic ground from which grows the very destiny of our modern era--the grand battle that must take place between the powers of the Grail and the hindrance of sinister anti-Grail forces at large today.

**The Long-Winded Lady** Maeve Brennan,2015-04-15 From 1954 to 1981, Maeve Brennan wrote for *The New Yorker's* Talk of the Town department under the pen name The Long-Winded Lady. Her unforgettable sketches—prose snapshots of life in small restaurants, cheap hotels, and crowded streets of Times Square and the Village—together form a timeless, bittersweet tribute to what she called the most reckless, most ambitious, most confused, most comical, the saddest and coldest and most human of cities. First published in 1969, *The Long-Winded Lady* is a celebration of one of *The New Yorker's* finest writers.

**Marsilius of Inghen: Treatises on the Properties of Terms** E.P. Bos,2012-12-06 occurred in the textbooks of medieval logicians. Hubien (1975,1977) did the same in recent articles and other modern logicians with interest in the history of their field of knowledge, or students of the history of logic with knowledge of modern achievements in this field, could be mentioned. For example, Trentman (1977:41) in his recent edition of Vincent Ferrer's *Tractatus de Suppositionibus*, 'Treatise on suppositions', elucidates Ferrer's theory of natural supposition with the aid of modern logic and points out that in some respects, for example, in the theory of irltensionality, modern theories have been developed with little more success. In the Middle Ages, semantics and logic were entirely interwoven. For, in the opinion of medieval philosophers, thought is enacted in language. This very same language consists of meaningful entities and those entities form propositions that may be used as premisses in argument. In their opinion, language and thought were both related to reality in a natural way (cf. De Rijk, 1977:233). This is also evident from Marsilius' works (cf., e.g., p. 54, n. 11-23). The semantical presuppositions oT the propositions that may be used in arguments, are analysed. This, indeed, is one of the contributions to logic by medieval logicians (cf. Moody, 1975:385).

Identity, Nation, Discourse Claire Taylor,2009-01-14 This volume explores women's literary and cultural production in Latin America, and suggests how such works engage with discourses of identity, nationhood, and gender.

Including contributions by several prominent Latin American scholars themselves, it seeks to provide a vital insight into the analysis and reception of the works in a local context, and foster debate between Latin American and metropolitan academics. The book is divided into two sections: Women and Nationhood, and Models and Genres. The first section comprises six chapters which examines women's responses to, and attempts to carve out space within, national discourses in a Latin American context. Spanning the nineteenth century to the present day, the chapters offer an insight into the ways in which Latin American women have constructed themselves as modern subjects of the nation, and made use of the ambiguous spaces created by modernization and national discourses. The section starts firstly with a focus on the Southern Cone, covering Chile and Argentina, and then moves geographically northward, to Colombia and Bolivia. The second section, Models and Genres, consists of six chapters that examine how women writers engage with, and critically re-work, existing literary discourses and paradigms. Considering phenomena such as detective fiction, fairy-tales, and classical mythological figures, the chapters illustrate how these genres and models—frequently coded as masculine—are given new inflections, both as a result of their deployment by women, and as a result of their re-working in a Latin American context.

*Mezcal* Emma Janzen,2017-07-14 NOMINATED FOR THE 2018 JAMES BEARD FOUNDATION AWARD IN BEVERAGES! Emma Janzen is your guide to the bartender's best kept secret, the spirit everyone has been missing out on and it's called Mezcal. See what sets this cousin of tequila apart from the rest of the pack. Produced in Mexico for centuries but little known elsewhere until recent years, mezcal has captured the imagination of spirits enthusiasts with its astonishing complexities. And while big liquor is beginning to jump aboard the bandwagon, most mezcal is still artisanal in nature, produced using small-batch techniques handed down for generations, often with agave plants harvested in the wild. Join author Emma Janzen through Mezcal as she presents an engaging primer on all things related to the spirit; its long history, the craft of distilling it, and a thorough guide to many of the most common agaves used in production and how they shape the resulting spirit. In addition, top mezcal bars across the United States and Mexico contribute a selection of nearly fifty cocktails that accentuate its distinguishing qualities. Beautifully produced and authoritatively written, Mezcal is the definitive guide to exploring and unraveling the mysteries of this extraordinary handcrafted spirit. **Mobility in Process Calculi and Natural Computing** Bogdan Aman,Gabriel Ciobanu,2011-11-03 The design of formal calculi in which fundamental concepts underlying interactive systems can be described and studied has been a

central theme of theoretical computer science in recent decades, while membrane computing, a rule-based formalism inspired by biological cells, is a more recent field that belongs to the general area of natural computing. This is the first book to establish a link between these two research directions while treating mobility as the central topic. In the first chapter the authors offer a formal description of mobility in process calculi, noting the entities that move: links ( $\pi$ -calculus), ambients (ambient calculi) and branes (brane calculi). In the second chapter they study mobility in the framework of natural computing. The authors define several systems of mobile membranes in which the movement inside a spatial structure is provided by rules inspired by endocytosis and exocytosis. They study their computational power in comparison with the classical notion of Turing computability and their efficiency in algorithmically solving hard problems in polynomial time. The final chapter deals with encodings, establishing links between process calculi and membrane computing so that researchers can share techniques between these fields. The book is suitable for computer scientists working in concurrency and in biologically inspired formalisms, and also for mathematically inclined scientists interested in formalizing moving agents and biological phenomena. The text is supported with examples and exercises, so it can also be used for courses on these topics.
