Leadership and Change Management in Fiat

Chrysler Automobiles Ricardo Escoda, 2018-09-19

Seminar paper from the year 2018 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, International School of Management, Campus Munich, language: English, abstract: Since market power has moved from enterprises to consumers, and global competition has increased substantially, managers in almost all industries need to face enormous performance challenges. To avoid red figures, they are forced to be more innovative in establishing and performing their competitive strategies. Long-term success will not be achieved solely through competitiveness but instead will depend on the ability to adapt to changes in a business' environment and develop a consistent leadership style.

The Role of Company Cultures in Mergers with Reference to Fiat Chrysler Automobiles André Euschen, 2018-03 Seminar paper from the year 2016 in the subject Business economics - Business Management, Corporate Governance, grade: 1,2, University Witten/Herdecke, language: English, abstract: In times of globalisation, mergers and acquisitions (M&A) are an important and common tool for companies in order to expand their operations as well as to face changing market conditions and increased competition. Over the past three decades, M&A have therefore become a truly global phenomenon: While in 1985 there were only 2,675 M&A transactions worth 347 billion USD, there were more than 46,000 global transactions,

worth more than 4.5 trillion USD in 2015. In comparison to 2014, the number of deals increased marginally by 2.7 percent in 2015, while the value of the transactions grew by 16 percent.

Nevertheless, and despite the increasing popularity of M&A transaction worldwide, several studies yield that mergers actually have a high rate of failure. Depending on whose research results one relies on, the failure of M&A-deals varies between 60 and 75 percent. In this context, it should however be distinguished between the failure of creating any business benefit (especially shareholder value) and the total failure of the merger (and a segregation afterwards, as e.g. Daimler-Chrysler did) which most likely will be a much lower percentage. As one recent study found out, culture has been identified to be the cause of 30 percent of failed integrations. These cultural differences between the merging companies become even more important in cross-border mergers where people from different cultural groups with different opinions, attitudes and values interact with each other. Although it is known that culture plays a key role in the integration process and therefore also for the success of the whole merger, it is often given relatively little attention to by the managers. After building a theoretical background on M&A and organizational culture, the paper will focus on the role of culture in a

Corporate Peace Mary Martin, 2020-02-01 A challenge to conventional wisdom, this eye-opening account explains how businesses can stabilise conflict and improve people's lives while still

pursuing the bottom line. Ours is an era of big companies, multinational brands and global business power, but also of seemingly unending conflict. Corporate Peace examines how corporations respond to the life-and-death business of war and peace. What happens when they come up against Mexican drug cartels, or the Ebola epidemic in Liberia? Through the experiences of behemoths such as Fiat, Veolia, BP and Unilever, Mary Martin shows how big business is increasingly critical in building a safer world, in the face of failed states, health pandemics, insurgencies and organised crime. Can companies do more than generate profits in the poorest and most fragile parts of the world? Should they also shoulder responsibilities neglected by government? Martin contends that corporations must move beyond simply 'doing no harm', or upholding human rights. They are becoming part of the solution, contributing expertise and investment to resolve complex issues of violence, authority and law. Corporate Peace offers an alternative account of business, challenging our assumptions about security and how companies function in an unstable world. It is an invitation to anyone interested in how society works: to rethink how multinationals can mobilise their power and influence for the common good.

Global Corporate Strategy - Honda Case Study

Alexander Berger, 2011-07-13 Research Paper

(undergraduate) from the year 2011 in the subject Business economics - Trade and Distribution, grade: 70, University of Sunderland, course: Global Corporate Strategy, language: English, abstract: The report is divided into four parts. The first part will analyse the current situation of Honda, which gives the reader insight in the current state of Honda's business. The second part will present different dichotomies and analyse how Honda has dealt with them in the past. In the third part, the differences between the western management model and the Japanese management will be analysed and then related to Honda's management concept. In addition, cultural influences based on Hofstede will be presented. The last part deals with corporate social responsibility and Corporate Governance focussing on Honda, Nissan, and Chrysler. Within the automobile industry, there exists a high intensity of rivalry. Automobile manufacturers are seeking for innovative strategies in order to be successful in the long-term. In addition, the highly debated topic "global warming" also puts pressure on the automobile manufacturers forcing them to develop new low emission cars and be more responsible for the society. The Honda Motor Company is a shining example for setting up flexible innovative strategies, which fit into a fast changing environment.

Raising the Corporate Umbrella Philip J.

Kitchen, Don E. Schultz, 2001-09-04 Corporate communications are now hugely important in the success of companies and organisations. Using cases and examples from companies such as The Body Shop, Texaco, Johnson & Johnson, BP Oil & British Airways the authors introduce the framework necessary to analyse corporate communications strategies and provide clear practical guidelines for successful implementation. A must for anyone involved in corporate communications, public relations or public affairs, especially those working in multi-national or global organisations.

Light and Heavy Vehicle Technology M J

Nunney, 2007-01-18 Light and Heavy Vehicle Technology, Fourth Edition, provides a complete text and reference to the design, construction and operation of the many and varied components of modern motor vehicles, including the knowledge needed to service and repair them. This book provides incomparable coverage of both cars and heavier vehicles, featuring over 1000 illustrations. This new edition has been brought fully up to date with modern practices and designs, whilst maintaining the information needed to deal with older vehicles. Two entirely new sections of the book provide a topical introduction to alternative power sources and fuels, and battery-electric, hybrid and fuel-cell vehicles. More information on the latest developments in fuel injection, diesel engines and

transmissions has also been added. An expanded list of technical abbreviations now contains over 200 entries – a useful resource for professional technicians in their day-to-day work. This book is an essential textbook for all students of automotive engineering, particularly on IMI / C&G 4000 series and BTEC courses and provides all the underpinning knowledge required for NVQs to level 3. By bridging the gap between basic and more advanced treatments of the subject, it also acts as a useful source of information for experienced technicians and technically minded motorists, and will help them to improve their knowledge and skills.

A 20 MILLION BILLION TRILLION DOLLAR LOSS

Sudhansu S. Tunga, 2014-06-02 The book deals with India's contemporary history of more than six decades since her independence in 1947 to the present day. It describes all the relevant events from economic, political, social and cultural perspectives. The world knows India to be an emerging economic giant because of her recent GDP growth. But, behind this robust growth, lies the real India which is poor, illiterate and backward, suffering from the evils of wide-spread corruption, nepotism and familocracy due to the wrong policies followed by Indian politicians since Nehru. The government made some half-hearted attempts for improving the people's lot, but there was not much success. This is why the narrative is called the story of downslide. And this downslide has resulted collectively in an inconceivably colossal loss.
