**Carlsen-Anand 2013** Karsten Müller, 2014-07-31 Magnus Carlsen Becomes World Champion! It was the match that the chess world had been anticipating for several years. Norway's wunderkind, Magnus Carlsen had qualified as the official challenger for the world chess championship. He was facing the reigning world champion, Viswanathan Anand from India. Would Anand's enormous match experience and years at the top be enough to stop the young Norwegian grandmaster? Magnus was heavily favored, and he did not disappoint. With the help of German grandmaster Karsten Müller, you can follow as the drama of the match played out in Chennai, India. He has annotated every game, providing insight into the battle for the title. To complement the author's presentation, grandmaster Susan Polgar – the oldest of the famous Polgar sisters – shares her thoughts about the match in her foreword. She was there for the entire struggle providing coverage for the Indian organizers and media. Also included is a short history of the world chess championship, as well as color photos taken during the match. All in all, this is another fine book on the world chess championship by Karsten Müller.

**The Grandmaster** Brin-Jonathan Butler, 2019-11-12 "A bravura performance...An entertaining book" (Kirkus Reviews) about the dramatic 2016 World Chess Championship between Norway's Magnus Carlsen and Russia's Sergey Karjakin, which mirrored the world's geopolitical unrest and rekindled a global fascination with the sport. The first week of November 2016, hundreds of

people descended on New York City's South Street Seaport to watch the World Chess Championship between Norway's Magnus Carlsen and Russia's Sergey Karjakin. By the time it was over would be front-page news and thought by many the greatest finish in chess history. With both Carlsen and Karjakin just twenty-five years old, it was the first time the championship had been waged among those who grew up playing chess against computers. Originally from Crimea, Karjakin had recently repatriated to Russia under the direct assistance of Putin. Carlsen, meanwhile, had expressed admiration for Donald Trump, and the first move of the tournament he played was called a Trompowsky Attack. Then there was the Russian leader of the World Chess Federation being barred from attending due to US sanctions, and chess fanatic and Trump adviser Peter Thiel being called on to make the honorary first move in sudden death. That the tournament even required sudden death was a shock. Oddsmakers had given Carlsen, the defending champion, an eighty percent chance of winning. It would take everything he had to retain his title. Author Brin-Jonathan Butler was granted unique access to the two-and-half-week tournament and watched every move. The Grandmaster "is not the usual chronicle of a world-championship chess match....Butler offers insight into what it takes to become the best chess player on the planet...A vibrant and provocative look at chess and its metaphorical battle for territory and power" (Booklist).

**Chess Queens** Jennifer Shahade, 2022-03-03 'Like The Queen's Gambit, this isn't really about chess, but power' Sunday Times What does it take to make

it to the top of your game? As a chess champion, Jennifer Shahade has travelled the world playing major tournaments. At the top, she finds rivalry and friendship; sexism and feminism; ecstatic highs and excruciating losses. Chess Queens invites us behind the scenes of this ultra male-dominated sport. We meet today's elite, as well as the pioneering female players in history who fought against the odds to get to the top. An essential guide for all aspiring chess queens, Jennifer's story reveals what it takes to break through the glass ceiling. 'Jennifer Shahade is a brilliant, insightful thinker who never fails to entertain and engage' Maria Konnikova 'An astoundingly intimate, thoughtful and inspirational book by a person who has seen it all from the inside' Angela Saini

**Twitter and Tear Gas** Zeynep Tufekci, 2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews

with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

**Sultan Khan** Daniel King, 2020-04-08 Hardly anyone paid attention when Sultan Khan arrived in London on April 26, 1929. A humble servant from a village in the Punjab, Khan had little formal education and barely spoke English. He had learned the rules of Western chess only three years earlier, yet within a few months he created a sensation by becoming the British Empire champion. Sultan Khan was taken to England by Sir Umar Hayat Khan, an Indian nobleman and politician who used his servant's successes to promote his own interests in the turbulent years before India gained independence. Sultan Khan remained in Europe for the best part of five years, competing with the leading chess players of the era, including World Champion Alexander Alekhine and former World Champion Jose Raoul Capablanca. His unorthodox style often stunned his opponents, as Daniel King explains in his examination of the key games and tournaments in Khan's career. Daniel King has uncovered a wealth of new facts about Khan, as well as dozens of previously unknown games. For the first time he tells the full story of how Khan, a Muslim outsider, was received in

Europe, of his successes in the chess world and his return to obscurity after his departure for India in 1933.

**The Smartest Kids in the World** Amanda Ripley, 2014-07-29 Following three teenagers who chose to spend one school year living in Finland, South Korea, and Poland, a literary journalist recounts how attitudes, parenting, and rigorous teaching have revolutionized these countries' education results.

**The Psychology of Chess** Fernand Gobet, 2018-09-14 Do you need to be a genius to be good at chess? What does it take to become a Grandmaster? Can computer programmes beat human intuition in gameplay? The Psychology of Chess is an insightful overview of the roles of intelligence, expertise, and human intuition in playing this complex and ancient game. The book explores the idea of 'practice makes perfect', alongside accounts of why men perform better than women in international rankings, and why chess has become synonymous with extreme intelligence as well as madness. When artificial intelligence researchers are increasingly studying chess to develop machine learning, The Psychology of Chess shows us how much it has already taught us about the human mind.

**Understanding Digital Marketing** Damian Ryan, Calvin Jones, 2012-03-03 Digital marketing now represents 25% of the marketing spend in the UK and this is predicted to move to 50% or higher within the next three years. Understanding Digital Marketing looks at the world of digital marketing: how it got started, how it got to where it is today, and where the thought leaders in the industry believe it is headed in the future. This authoritative title demonstrates how to harness the power of digital media and use it to achieve the utmost success in business, now and in the future. Understanding Digital Marketing deals with every key topic in detail, including: search marketing, social media, Google, mobile marketing, affiliate marketing, e-mail marketing, customer engagement and digital marketing strategies. Essential reading for both practitioners and students alike, and including real-world examples of digital marketing successes and expert opinions, Understanding Digital Marketing provides you with tools to utilize the power of the internet to take your company wherever you want it to go.

**Technocreep** Thomas P. Keenan, 2014-09-13 "Technology is rapidly moving into our bodies," writes cyber expert Keenan, "and this book gives a chilling look ahead into where that road may lead us – on a one way trip to the total surrender of privacy and the commoditization of intimacy." Here is the definitive dissection of privacy-eroding and life-invading technologies, coming at you from governments, corporations, and the person next door. Take, for example, "Girls Around Me": a Russian-made iPhone App that allowed anyone

to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles. It combined this information in a way never intended by the original poster. Going to a Disney theme park? Your creepy new “MagicBand” will alert Minnie Mouse that you’re on the way and she’ll know your kid’s name when you approach her. Thinking about sending your DNA off to Ancestry.com for some “genetic genealogy”? Perhaps you should think again: your genetic information could be used against you. With security scares like the Heartbleed bug (which compromised even supposedly safe internet behemoths like Google and Yahoo!) becoming more commonplace, this book is a must-read for anybody who values their privacy in a wired world.

**The Collaborative Economy in Action: European Perspectives** Andrzej Klimczuk, Vida Česnuityte, Gabriela Avram, 2021-10-04 The book titled The Collaborative Economy in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy (short name: Sharing and Caring; [sharingandcaring.eu](http://sharingandcaring.eu)) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST ([www.cost.eu/actions/CA16121](http://www.cost.eu/actions/CA16121)). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological

implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio

Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the

reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

**Lisa** Jesse Kraai,2013-10 The chess pieces knew how they moved. They knew what they wanted too. It wasn't like school, where kids pretended they were masters of the teachers' game. The adults didn't know anything anyway. The real world was a big push to nothing. But Lisa escaped from all that. She found Igor Ivanov. He taught her how to play.

Ghost Work Mary L. Gray,Siddharth Suri,2019 A startling exposé of the invisible human workforce that powers the web--and how to bring it out of the shadows. Hidden beneath the surface of the internet, a new, stark reality is looming--one that cuts to the very heart of our endless debates about the impact of AI. Anthropologist Mary L. Gray and computer scientist Siddharth Suri unveil how the services we use from companies like Amazon, Google, Microsoft, and Uber can only function smoothly thanks to the judgment and experience of a vast human labor force that is kept deliberately concealed. The people who do 'ghost work' make the internet seem smart. They perform high-tech, on-demand piecework: flagging X-rated content, proofreading,

transcribing audio, confirming identities, captioning video, and much more. The shameful truth is that no labor laws protect them or even acknowledge their existence. They often earn less than legal minimums for traditional work, they have no health benefits, and they can be fired at any time for any reason, or for no reason at all. An estimated 8 percent of Americans have worked in this 'ghost economy,' and that number is growing every day. In this unprecedented investigation, Gray and Suri make the case that robots will never completely eliminate 'ghost work' and the unchecked quest for artificial intelligence could spark catastrophic work conditions if not stopped in its tracks. Ultimately, they show how this essential type of work can create opportunity--rather than misery--for those who do it.--Dust jacket.

**The Gamification of Learning and Instruction Fieldbook** Karl M.

Kapp, 2013-11-11 Following Karl Kapp's earlier book *The Gamification of Learning and Instruction*, this Fieldbook provides a step-by-step approach to implementing the concepts from the Gamification book with examples, tips, tricks, and worksheets to help a learning professional or faculty member put the ideas into practice. The Online Workbook, designed largely for students using the original book as a textbook, includes quizzes, worksheets and fill-in-the-blank areas that will help a student to better understand the ideas, concepts and elements of incorporating gamification into learning.

**Artificial Intelligence, China, Russia, and the Global Order** Air University

Air University Press, Nicholas D. Wright, 2019-10-19 Given the wide-ranging implications for global competition, domestic political systems and daily life, US policymakers must prepare for the impacts of new artificial intelligence (AI)-related technologies. Anticipating AI's impacts on the global order requires US policy makers' awareness of certain key aspects of the AI-related technologies--and how those technologies will interact with the rapidly changing global system of human societies. One area that has received little in-depth examination to date is how AI-related technologies could affect countries' domestic political systems--whether authoritarian, liberal democratic, or a hybrid of the two--and how they might impact global competition between different regimes. This work highlights several key areas where AI-related technologies have clear implications for globally integrated strategic planning and requirements.

*My 60 Memorable Games* Bobby Fischer, 1995 A collection of the 60 best games of Bobby Fischer, analyzed by himself. The games are reset by John Nunn into modern algebraic notation, providing an insight into the methods and thought processes of one of the greatest chess champions.

**The Next Step**, 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as exponential technologies--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Contributors include Aubrey D.N.J. de Grey, Jonathan Rossiter, Joseph A. Paradiso, Kevin Warwick, Huma Shah, Ramón López de Mántaras, Helen Papagiannis, Jay David Bolter, Maria Engberg, Robin Hanson, Stuart Russell, Darrell M. West, Francisco González, Chris Skinner, Steven Monroe Lipkin, S. Matthew Liao, James Giordano, Luciano Floridi, Seán Ó Héigeartaigh and Martin Rees.

**The Camp of the Saints - 2017** Jean Raspail, 2017-05-30 The Camp of the Saints (Le Camp des Saints) is a 1973 French novel by author and explorer Jean Raspail. The novel depicts a setting wherein Third World mass immigration to France and the West leads to the destruction of Western civilization. A new (2017) introduction by Leonard Payne provides a cultural analysis.

*The Signal and the Noise* Nate Silver, 2015-02-03 One of the more momentous books of the decade. –The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for

the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.
