Summary of a Forum on Spectrum Management Policy Reform National Research Council,Computer Science and Telecommunications Board,Committee on Wireless Technology Prospects and Policy Options,2004-06-17 In 2003, the Department of Commerce's Spectrum Policy Initiative was established with the objective of promoting a more efficient and beneficial use of the spectrum. As part of that Initiative, a series of public forums about spectrum management policy was held. The Computer Science and Telecommunications Board was asked to organize one of these forums, a public forum to gather the views of a variety of government and private sector stakeholders about the impact of spectrum policy on their activities. This report presents a summary of those views. Among those included are those representing national defense, homeland security, aviation, science, public safety, amateur radio, cellular voice and data, and terrestrial broadcast uses of the spectrum. Although prepared by the NRC, the report does not present NRC findings or recommendations. A broader study of spectrum policy, including findings and recommendations, will be issued in early 2005.

Giants Peter Phillips,2018-08-28 A look at the top 300 most powerful players in world capitalism, who are at the controls of our economic future. Who holds the purse strings to the majority of the world's wealth? There is a new global elite at the controls of our economic future, and here former Project Censored director and media monitoring sociologist Peter Phillips unveils for the general reader just who these players are. The book includes such power players as Mark Zuckerberg, Bill Gates, Jeff Bezos, Jamie Dimon, and Warren Buffett. As the number of men with as much wealth as half the world fell from sixty-two to just eight between January 2016 and January 2017, according to Oxfam International, fewer than 200 super-connected asset managers at only 17 asset management firms—each with well over a trillion dollars in assets under management—now represent the financial core of the world's transnational capitalist class. Members of the global power elite are the management—the facilitators—of world capitalism, the firewall protecting the capital investment, growth, and debt collection that keeps the status quo from changing. Each chapter in *Giants* identifies by name the members of this international club of multi-millionaires, their 17 global financial companies—and including NGOs such as the Group of Thirty and the Trilateral Commission—and their transnational military protectors, so the reader, for the first time anywhere, can identify who constitutes this network of influence, where the wealth is concentrated, how it suppresses social movements, and how it can be redistributed for maximum systemic change.

Executive Coaching for Results Brian O Underhill,2007-11-01 The field of executive coaching is growing at an astonishing rate. Corporations are increasingly turning to coaching as an intervention, as it offers leaders and managers both on-the-job learning and built-in follow-up. But how can you make the best use of coaching within your organization? *Executive Coaching for Results* helps this critical leadership development method come of age. This is not a “how-to-coach book”—there are already plenty of those—but rather a comprehensive guide on how to strategically use coaching to maximize development of talent and link the impact of coaching to bottom-line results. Underhill, McAnally, and Koriath draw on their rigorous original research (through Executive Development Associates) with Fortune 1000 and Global 500 companies such as Disney, IBM, UBS, Unilever and many others, and combine that with their years of industry experience to advance the state of the art. *Executive Coaching for Results* includes topics such as: Integrating coaching into your organization's overall leadership development strategy Locating and screening coaches worldwide Developing an internal coaching program Deciding which coaching assessments and instruments are appropriate to your situation Measuring the impact and ROI of coaching Following up after coaching Throughout, the authors provide numerous examples from major organizations such as Dell, Johnson and Johnson, Intel, and Wal-Mart. Offering practical learning, best practices, and illuminating case studies, this is the first definitive guide to the effective use of executive coaching in the corporate environment.

The State of American Policing David J. Thomas,2018-11-09 Written by a veteran police officer turned college professor, this modern-day study of American policing covers hot-button issues including police use of deadly force against and bias toward minorities. Grounded in research of historical and current events, this text examines police practices and the psychological impact that those practices have on minority communities. Author David J. Thomas, a retired police officer and associate professor of criminal justice, looks at and beyond historical perspectives to address many of today's most controversial issues central to minority communities. Topics covered include the repeated failure to convict officers for fatally shooting unarmed subjects, the rise of heated debates between the Black Lives Matter and Blue Lives Matter movements, the militarization of police agencies, and police response to protests by NFL players. The text also offers insight into the psychology of race, police culture, implicit bias, and the decision to use deadly force. Thomas additionally examines possible solutions to these problems. College students, researchers, academics, and readers interested in politics will find this work informative and thought-provoking.
