**Brutes In Suits** John Pettegrew,2007-07-16 "[A] vivid, massively researched history of 'hyper-masculine' sensibility . . . An instructive and provocative view of men's dark side." —Peter Filene, *Men and Masculinities* Are men truly predisposed to violence and aggression? Is it the biological fate of males to struggle for domination over women and vie against one another endlessly? These and related queries have long vexed philosophers, social scientists, and other students of human behavior. In *Brutes in Suits*, historian John Pettegrew examines theoretical writings and cultural traditions in the United States to find that, Darwinian arguments to the contrary, masculine aggression can be interpreted as a modern strategy for taking power. Drawing ideas from varied and at times seemingly contradictory sources, Pettegrew argues that traditionally held beliefs about masculinity developed largely through language and cultural habit—and that these same tools can be employed to break through the myth that brutishness is an inherently male trait. A major re-synthesis of late nineteenth- and early twentieth-century manhood, *Brutes in Suits* develops ambitious lines of research into the social science of sexual difference and professional history's celebration of rugged individualism; the hunting-and-killing genre of popular men's literature; that master text of

hypermasculinity: college football; military culture, war making, and finding pleasure in killing; and patriarchy, sexual jealousy, and the law. This timely assessment of the evolution of masculine culture will be welcomed and debated by social and intellectual historians for years to come. “Pettegrew’s book remains rigorous and passionate in its narration of the historic appeal as well as the immediate dangers of de-evolutionary masculinity.” —American Historical Review

**Still a Hollow Hope** Anthony D Cooling, 2022-09-29 The U.S. Supreme Court increasingly matters in American political life when those across the political spectrum look at the Court for relief from policies they oppose and as another venue for advancing their own policy agendas. However, the evidence is mounting, to include this book in a big way, that courts are more of a sideshow to the culture war. While court decisions, especially Supreme Court decisions, do have importance, the decisions emanating from the Court reflect social, cultural, and political change that occurred long prior to their decision ever being made. This book tests how much political and social change has been made primarily through Gerald Rosenberg’s framework from his seminal work, *The Hollow Hope: Can Courts Bring About Social Change*, but it also utilizes Daniel Elazar’s Political Culture Theory to explain state level variations in political and social change. The findings indicate that while courts are not powerless institutions, reformers will not have success unless supported by the public and the elected branches, and most specifically, that preexisting state culture is a determining factor in the amount of change courts make. In short, federalism still matters.

**Paving Paradise** Craig Pittman, Matthew Waite, 2010-05-25 Florida possesses more wetlands than any other state except Alaska, yet since 1990 more than 84,000 acres have been lost to development despite presidential pledges to protect them. How and why the state's wetlands are continuing to disappear is the subject of Paving Paradise. Journalists Craig Pittman and Matthew Waite spent nearly four years investigating the political expedience, corruption, and negligence on the part of federal and state agencies that led to a failure to enforce regulations on developers. They traveled throughout the state, interviewed hundreds of people, dug through thousands of documents, and analyzed satellite imagery to identify former wetlands that were now houses, stores, and parking lots. Exposing the unseen environmental consequences of rampant sprawl, Pittman and Waite explain how wetland protection creates the illusion of environmental protection while doing little to stem the tide of destruction.
