Germany and the Second World War Horst Boog, Gerhard Krebs, Detlef Vogel, 2006-05-04 By the spring of 1943, after the defeat at Stalingrad, the writing was on the wall. But while commanders close to the troops on Germany's various fronts were beginning to read it, those at the top were resolutely looking the other way. This seventh volume in the magisterial 10-volume series from the Militärgeschichtliches Forschungsamt [Research Institute for Military History] shows both Germany and her Japanese ally on the defensive, from 1943 into early 1945. It looks in depth at the strategic air war over the Reich and the mounting toll taken in the Battles of the Ruhr, Hamburg, and Berlin, and at the Battle of the Radar Sets so central to them all. The collapse of the Luftwaffe in its retaliatory role led to hopes being pinned on the revolutionary V-weapons, whose dramatic but ultimately fruitless achievements are chronicled. The Luftwaffe's weakness in defence is seen during the Normandy invasion, Operation Overlord, an account of the planning, preparation and execution of which form the central part of this volume together with the landings in the south of France, the setback suffered at Arnhem, and the German counter-offensive in the Ardennes. The final part follows the fortunes of Germany's ally fighting in the Pacific, Burma, Thailand, and China, with American forces capturing islands ever closer to Japan's homeland, and culminates in her capitulation and the creation of a new postwar order in the Far East. The struggle between internal factions in the Japanese high command and imperial court is studied in detail, and highlights an interesting contrast with the intolerance of all dissent that typified the Nazi power structure. Based on meticulous research by MGFA's team of historians at Potsdam, this analysis of events is illustrated by a wealth of tables and maps covering aspects ranging from Germany's radar defence system and the targets of RAF Bomber Command and the US 8th Air Force, through the break-out from the Normandy beachhead, to the battles for Iwo Jima and Okinawa.

Germany and the Second World War Horst Boog, 1990 This is the second in the comprehensive ten-volume *Germany and the Second World War*. The five volumes so far published in German take the story to the end of 1941, and have achieved international acclaim as a major contribution to historical study. Under the auspices of the Militärgeschichtliches Forschungsamt (Research Institute for Military History), a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War. This volume surveys the first year of the war deliberately begun by Nazi Germany. The authors examine the train of interconnected political and military events, and set military operations against the background of Hitler's war policy and general aims, both immediate and long term. The authors show that the conflict took a course quite different from that which Hitler had intended, but nevertheless resulted in a series of conquests for the Third Reich.

Ethics in Youth Sport Stephen Harvey,Richard Light,2012 The influence of professional, adult sport on youth sport is now a global concern. Children are involved in high-stakes competitive sport at national and international levels at an increasingly young age. In addition, the use of sport as a medium for positive youth development by governments and within the community has fuelled ambitious targets for young people's participation in sport at all levels. In this important study of ethical issues in and around youth sport, leading international experts argue for the development of strong ethical codes for the conduct of youth sport and for effective policy and pedagogical applications to ensure that the positive benefits of sport are optimized and the negative aspects diminished. At the heart of the discussion are the prevailing standards and expectations of youth sport in developed societies, typically consisting of the development of motor competence, the development of a safe and healthy lifestyle and competitive style, and the development of a positive self-image and good relationship skills. The book examines the recommendations emerging from the 'Panathlon Declaration' and the debates that have followed, and covers a wide range of key ethical issues, including: emotional and physical abuse aggression and violence doping and cheating values and norms teaching and coaching integrity management. Ethics in Youth Sport is focused on the application of ethical policy and pedagogies and is grounded in practice. It assumes no prior ethical training on the part of the reader and is essential reading for all students, researchers, policy makers and professionals working with children and young people in sport across school, community and professional settings.

359th Fighter Group Jack H Smith,2012-10-20 Nicknamed the 'Unicorns', the 359th FG was one of the last groups to arrive in the UK for service in the ETO with the Eighth Air Force. First seeing action on 13 December 1943, the group initially flew bomber escort sweeps in P-47s, before converting to the ubiquitous P-51 in March/April 1944. Throughout its time in the ETO, the 359th was credited with the destruction of 351 enemy aircraft destroyed between December 1943 and May 1945. The exploits of all 12 aces created by the group are detailed, along with the most significant missions flown. This book also discusses the various markings worn by the group's three squadrons, the 368th, 369th and 370th FSs

Bob Crow: Socialist, leader, fighter Gregor Gall,2017-03-11 Bob Crow was the most high-profile and militant union leader of his generation. This biography focuses on his leadership of the RMT union, examining and exposing a number of popular myths created about him by political opponents. Using the schema of his personal characteristics (including his public persona), his politics and the power of his members, it explains how and why he was able to punch above his weight in industrial relations and on the political stage, helping the small RMT union become as influential as many of its much larger counterparts. As RMT leader, Crow oversaw a rise in membership and promoted a more assertive and successful bargaining approach. While he failed to unite all socialists into one new party, he established himself as the leading popular critic of neo-liberalism, 'New' Labour and the age of austerity.

Foreign Fighters in Ukraine Kacper Rekawek,2022-12-30 Foreign Fighters in Ukraine is the first comprehensive academic study taking an in-depth look at foreigners who have chosen to fight in the conflict in Ukraine. While there has been considerable focus in policy, security and academic circles on the threat from returning jihadists – so-called returnee foreign terrorist fighters – the same danger from right-wing, but not essentially terrorist, extremists and others has been largely overlooked. As Westerners rushed to join the nascent Caliphate in Syria/Iraq, others simultaneously traveled to another foreign war on what many would call Europe's doorstep: the Russo-Ukrainian war. This book unmask this largely unknown group of fighters as the author dives into the fighters' ideological and social backgrounds, their motivations for joining the conflict, their travails on the way there and their battle record in Eastern Ukraine. To a large extent based on interviews with the fighters themselves, it is a study on how and why men risk their lives while fighting a foreign war – and attract the attention of security services at home upon their return. Particularly, given the Russian invasion of Ukraine in February 2022 and the growing interest in far-right violence worldwide, the book evaluates whether these returnees constitute another security threat to the West. This volume will be of interest to all those researching small wars, terrorism, peace and conflict studies and right-wing extremism.

One-dot Theory Described, Explained, Inferred, Justified, and Applied Peter Kien-hong Yu,2011-12-22 The ancient Chinese scholars are fond of applying the Yin and Yang diagram to correlate almost everything. This book continues that tradition and uses the model to study other non-"dialectical" theories and models. The major finding qua contribution in this publication is to point out that the four diagrams are equivalent to the BaGua or BaGuaTu (BG), a set of eight ancient China symbolic notations/gossip. Another finding is that dialectical/crab and frog motion remark is just the opposite of a non-dialectical/crab and frog motion (usually deductive, linear, or cause and effect) remark, or, at best, they must meet half-way. The two major tasks of this book are to, first, apply the author's one-dot theory, which is

shored up by the crab and frog motion model, to convert other theories and models as well as studies and, second, apply his theory and model to reinvent some well-known western-derived theories and models and studies, such as game theory. The attempt is to narrow down the gap between the East and the West scholarship/XueShu, broadly defined, making the book of interest to Eastern and Western philosophers and scholars alike.

German Fighter Aircraft in World War I Mark C. Wilkins,2019-11-19 This fully illustrated volume explores German military aviation during WWI through archival photographs and authentically detailed replicas. Fighter aircraft were developed during World War I at an unprecedented rate, as nascent air forces sought to achieve and maintain air supremacy. German manufacturers innovated at top speed, while constantly scrutinizing the development of new enemy aircraft. The Germans also utilized the concept of modular engineering, which allowed them to disassembled or reassembled their aircraft quickly in the field. The pinnacle of their aeronautical innovations was the iconic Fokker D VII—the only aircraft specifically mentioned in the Treaty of Versailles, which forbade Germany from building it after the war. German Fighter Aircraft in World War I explores how German fighter aircraft were developed during the war, the advancements and trials that made the Fokker D VII possible, and the different makes and types of aircraft. Using unpublished images including photographs of surviving aircraft, archive images, and models and replicas, this volume shows details of aircraft that were kept top secret during the war. Extensively illustrated with 140 photos and ten color profiles, this is will be essential reading for all WWI aviation enthusiasts and modelers.
