Peer-to-Peer Lending with Chinese Characteristics: Development, Regulation and Outlook

Shanghai Finance Institute PtoP Research Group,2016-10-04 Literature on China's finance in the West has focused on financial repression in its highly regulated financial markets. However, fundamental changes in China's financial system are underway and China's peer-to-peer (P2P) lending is now the largest in the world. This book uses exclusive researches, interviews and surveys to bring readers a clear picture of the rapidly developing P2P lending industry in China. It is comprised of two parts. The first part is a comprehensive analysis of China's P2P lending industry. It outlines the factors behind the meteoric rise of P2P lending in China, and also the challenges its rapid rise has posed. The second part is a panoramic survey of China's P2P lending industry with study of typical cases, which could also provide reference to the analysis in the first part. Besides, it introduces the existing relevant regulations, regulators, likely upcoming regulatory measures as well as the diverse body of new

financial institutions appearing with the development of the industry, to analyse in-depth the current functioning of the industry in China and its lending practices through a large scale survey.

The International Handbook of Shipping Finance Manolis G. Kavussanos, Ilias D.

Visvikis, 2016-11-10 The International Handbook of Shipping Finance is a one-stop resource, offering comprehensive reference to theory and practice in the area of shipping finance. In the multibillion dollar international shipping industry, it is important to understand the various issues involved in the finance of the sector. This involves the identification and evaluation of the alternative sources of capital available for financing the ships, including the appraisal and budgeting of shipping investment projects; legal and insurance aspects of ship finance; the financial analysis and modelling of investment projects; mergers and acquisitions; and the commercial and market risk management issues involved. Edited by two leading academics in this area, and with contributions from 25 prominent market practitioners and academics over 16 chapters, this Handbook covers shipping finance and banking, maritime financial management and investments. As such, it includes: shipping markets; asset backed

finance; shipbuilding finance; debt finance; public and private equity and debt markets; structured finance; legal aspects and key clauses of ship mortgages; marine insurance; mechanisms for handling defaulted loans; investment appraisal and capital budgeting; financial analysis and investment modelling; business risk management and freight derivatives; and mergers and acquisitions. Thus, the Handbook offers a rigorous understanding of the different aspects of modern shipping finance and maritime financial management and investments, the various characteristics of the available products, the capital needs and requirements, and a clear view on the different financial management strategies through a series of practical examples and applications. Technical where appropriate, but grounded in market reality, this is a “must-have” reference for anyone involved in shipping finance, from bank practitioners and commodity trading houses, to shipbrokers, lawyers and insurance houses as well as to university students studying shipping finance. Table of Contents Preface by Editors Manolis Kavussanos, Professor, Director, MSc in International Shipping, Finance and Management, Athens University of Economics and Business, Greece Ilias Visvikis, Professor, Director Executive Education

Readers' Guide to Periodical Literature ,1922

Transatlantic Financial Regulation Peter O'Shea,2021-08-13 This book examines cooperation between the US and the EU on financial regulatory reform, notably at the outset and the first three years of the global financial crisis. It discusses the development of US-EU cooperation on financial regulation over the last few decades at several levels, including at heads of state level, markets regulator level and at international level, and progresses with a detailed examination of cooperation at the outset of the financial crisis. It looks at the nature of and motivation for intense US-EU cooperation on coordinating a response to the crisis and presents a compelling argument that a defacto alliance was formed, which served to benefit respective US and EU interests domestically and in the international financial system. Providing a new perspective on financial regulatory reform after the last financial crisis and the relationship of regulatory outcomes to international financial governance, this

volume will be of use to researchers interested in transatlantic relations, financial regulation, international relations, global governance, and the European Union, as well as professionals and policymakers working in foreign relations, financial markets, or banking policy.

Leave No One Behind Homi Kharas, John W. McArthur, Izumi Ohno, 2019-10-29 The ambitious 15-year agenda known as the Sustainable Development Goals, adopted in 2015 by all members of the United Nations, contains a pledge that “no one will be left behind.” This book aims to translate that bold global commitment into an action-oriented mindset, focused on supporting specific people in specific places who are facing specific problems. In this volume, experts from Japan, the United States, Canada, and other countries address a range of challenges faced by people across the globe, including women and girls, smallholder farmers, migrants, and those living in extreme poverty. These are many of the people whose lives are at the heart of the aspirations embedded in the 17 Sustainable Development Goals. They are the people most in need of such essentials as health care, quality education, decent work, affordable energy, and a clean environment. This book is the result of a

collaboration between the Japan International Cooperation Research Institute and the Global Economy and Development program at Brookings. It offers practical ideas for transforming “leave no one behind” from a slogan into effective actions which, if implemented, will make it possible to reach the Sustainable Development Goals by 2030. In addition to policymakers in the field of sustainable development, this book will be of interest to academics, activists, and leaders of international organizations and civil society groups who work every day to promote inclusive economic and social progress.

The Future of Microfinance Ira W. Lieberman,Paul DiLeo,Todd A. Watkins,Anna Kanze,2020-06-30

A major source of financing for the poor and no longer a niche industry Over the past four decades, microfinance—the provision of loans, savings, and insurance to small businesses and entrepreneurs shut out of traditional capital markets—has grown from a niche service in Bangladesh and a few other countries to a significant global source of financing. Some 200 million people globally now receive

support from microfinance institutions, with most of the recipients in the developing world. In the beginning, much of the microfinance industry was managed by non-governmental organizations, but today the majority of these institutions are commercial and regulated by governments, and they provide safe places for the poor to save, as well as offering much-needed capital and other financial services. Now out of infancy, the microfinance industry faces major challenges, including its ability to deal with mobile banking and other technology and concerns that some markets are now over-saturated with microfinance. How the industry deals with these and other challenges will determine whether it will continue to grow or will be subsumed within the larger global financial sector. This book is based on the results of a workshop at Lehigh University among thirty-four leaders in the industry. The editors, working with contributions from more than a dozen leading authorities in the field, tell the important story of how microfinance developed, how it has met the needs of hundreds of millions of people, and they address key questions about how it can continue to meet those needs in the future.

N. W. Ayer & Son's American Newspaper Annual and Directory ,1910

Global Strategies in Banking and Finance Dinçer, Hasan,2013-10-31 This book explores the concept of a global industry through case studies, emerging research, and interdisciplinary perspectives applicable to a variety of fields in banking and finance--Provided by publisher.

The German Tariff Controversy Heinrich Dietzel,1903

Global Financial Crime Donato Masciandaro,2017-07-05 The scope for financial crime has widened with the expansion and increased integration of financial markets. Money laundering, terrorism financing and tax crime have all changed in both nature and dimension. As new technologies reduce the importance of physical proximity to major onshore financial centres so a new generation of Offshore Financial Centres (OFCs) have emerged. This accessible volume provides a deeper analysis of the economic, institutional and political features of the OFCs, in order to design the optimal international regulatory policy. Using a multidisciplinary approach with an international level of expertise, the book evaluates international policies regarding offshore countries on the basis of a systematic analysis of their characteristics.

Solar Energy Update ,1979-10

Activism in Hard Times in Central and Eastern Europe Patrice C. McMahon,Paula M.

Pickering,Dorota Pietrzyk-Reeves,2024-06-07 Activism in Hard Times in Central and Eastern Europe elevates the voices of civic activists from Central and Eastern Europe (CEE) and analyzes a wealth of information to generate new insights into how activism in the region manages to be vibrant, diverse, and consequential. Because of these countries' unique historical trajectory, CEE activists have, in important ways, leap-frogged their counterparts in the West. Giving special attention to activists in Bosnia and Herzegovina (BiH), Hungary, Poland, Russia, and Ukraine, the book focuses on responses to the recent "hard times" – the shrinking of public space for civil society, democratic backsliding, polarization, and Russia's war in Ukraine. The contributors contend that CEE activists provide important lessons for others confronting similar challenges around the world. The book is well-suited for a variety of undergraduate and graduate courses, such as comparative politics, human rights, global governance, social movements, Central and East European politics, and contemporary world

politics. This timely and readable book, co-created by academics and activists and written in a conversational tone, will also be of interest to the interested public and practitioners. The book encourages readers to think differently about the role of civil society and activism, as well as about how new tools and polarizing dynamics affect activism in this region.

ISSE 2010 Securing Electronic Business Processes Norbert Pohlmann, Helmut Reimer, Wolfgang Schneider, 2011-01-17 This book presents the most interesting talks given at ISSE 2010 – the forum for the inter-disciplinary discussion of how to adequately secure electronic business processes. The topics include: - Identity and Security Management - Technical and Economical Aspects of Cloud Security - Security Services and Large Scale Public Applications - Smart Grid Security and Emerging Security Solutions - Privacy and Data Protection Adequate information security is one of the basic requirements of all electronic business processes. It is crucial for effective solutions that the possibilities offered by security technology can be integrated with the commercial requirements of the applications. The reader may expect state-of-the-art: best papers of the Conference ISSE 2010.

Investor Financing of Independent Film John W. Cones, 2023-10-12 This book explains how to comply with the federal and states securities regulations when seeking to raise money from private investors for the development, production and/or distribution of a feature or documentary film. Drawing from the experience and expertise of a securities and entertainment attorney who has worked with independent filmmakers for 30 plus years, this resource explores securities law compliance in order to help readers comply with the law and avoid criminal and civil liability, while successfully raising investor funds for their film projects. Readers will gain an understanding of why the securities laws apply to most investor financing transactions, what choices need to be made by the filmmaker, what information needs to be disclosed to prospective investors, how to comply with the SEC's policy regarding financial projections, what is the appropriate investment vehicle for various forms of investor financing, what limitations are imposed on the use of finders and how to handle the required federal and state notice filings. It is an essential resource for any film student taking a film finance course (or a production course with a film finance component), as well as any independent film producers,

entertainment/securities attorneys and film school instructors, who want to be informed about the legal and practical aspects of investor financing of independent films.

The Proportionality of State Intervention Sebastian Weißschnur,2021-08-31 This book outlines the connection between the principles of proportionality of state intervention and strategies made by the European Union. It describes underlining reasons for the occurrence of the global economic recession and available intervention options for governments to the EU markets.This book works out several possibilities EU countries use with the help of state intervention to actively intervene in the market economy. The author critically assesses the proportionality of interventions in the markets of EU members. With regard to the European economic recession, the book highlights the background of the global financial and external debt crisis. In this context, possible measures for growth promotion processes of the EU are also described.The book will appeal to lecturers and students of economics

disciplines worldwide, political advisors of EU member states and decision-makers of the European Central Bank; as well as, in principle, all interested readers who would like to learn more about fiscal policy in the European Union.
