Statement of Active Loans and Financial Guarantees as of ... Export-Import Bank of the United States,

Using the Financial and Business Literature
Thomas Slavens, 2004-03-11 Description

Financial Derivatives ,

Stability in the Financial System Dimitris Papadimitriou, 1996-09-12 The S&L crisis of the 1990s has given many a reason to review the events which led to a (in many ways) similar banking crisis sixty years ago, and the subsequent legislation of the Emergency Banking Act, the Banking Act of 1933, the Banking Act of 1935, and other related legislation. The reconstituted financial structure produced the longest period of financial stability in the US history, lasting one-half of a century. The book has two goals: provide an understanding of the reasons the banking reforms enacted in the 1930s were so successful; and present a set of policy proposals which offer the institutional provisions for both the financing of the capital development of the economy, and a safe payments system.

Journal of the Senate Illinois. General Assembly. Senate, 1927

British University Observatories 1772–1939 Roger Hutchins, 2017-03-02 British University
Observatories fills a gap in the historiography of British astronomy by offering the histories of observatories identified as a group by their shared characteristics. The first full histories of the Oxford and Cambridge observatories are here central to an explanatory history of each of the

six that undertook research before World War II - Oxford, Dunsink, Cambridge, Durham, Glasgow and London. Each struggled to evolve in the middle ground between the royal observatories and those of the 'Grand Amateurs' in the nineteenth century. Fundamental issues are how and why astronomy came into the universities, how research was reconciled with teaching, lack of endowment, and response to the challenge of astrophysics. One organizing theme is the central importance of the individual professor-directors in determining the fortunes of these observatories, the community of assistants, and their role in institutional politics sometimes of the murkiest kind, patronage networks and discipline shaping coteries. The use of many primary sources illustrates personal motivations and experience. This book will intrigue anyone interested in the history of astronomy, of telescopes, of scientific institutions, and of the history of universities. The history of each individual observatory can easily be followed from foundation to 1939, or compared to experience elsewhere across the period. Astronomy is competitive and international, and the British experience is contextualised by comparison for the first time to those in Germany, France, Italy and the USA.
