Fabio Betioli Contel

The Financialization of the Brazilian Territory Fabio Betioli Contel,2020-02-20 The book analyzes the financialization of the Brazilian territory to identify its main actors, technical systems and processes. The work is divided into three parts, which correspond to the three main scales of analysis of the national financial system: 1. the global scale, which defines the relative position of Brazil in the international division of financial work, emphasizing the role of São Paulo as an international financial centre; 2 the national level, which demonstrates the recent development of the financial and banking system (after 1964), with emphasis on the location and regionalization of bank headquarters and branches, as well as the new electronic channels for the provision of banking services (ATMs, points-of-sales, mobile and Internet banking); and 3. the local scale, which shows how these new financial agents and technical systems affect the Brazilian urban population, emphasizing the indebtedness of the lower income classes, as well as the emergence of alternative ways of using finance, such as fintechs, credit cooperatives and community banks.

The book examines the existing legal agreements at the international, regional and national levels and their interaction in the substantive areas of confiscation, anti-money laundering and banking confidentiality laws. The work draws on the insights of criminologists to offer critical insight into the legislative frameworks designed to deal with banking secrecy and confiscation in offshore financial centres. The Global Findex Database 2017 Asli Demirguc-Kunt,Leora Klapper,Dorothe Singer,Saniya Ansar,2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.
