Your Money, Your Goals Consumer Financial Consumer Financial Protection Bureau, 2015-03-18 Welcome to the Consumer Financial Protection Bureau's *Your Money, Your Goals*: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is financial empowerment and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

Financial Therapy Bradley T. Klontz, Sonya L. Britt, Kristy L.

Archuleta, 2014-09-10 Money-related stress dates as far back as concepts of money itself. Formerly it may have waxed and waned in tune with the economy, but today more individuals are experiencing financial mental anguish and self-destructive behavior regardless of bull or bear markets, recessions or boom periods. From a fringe area of psychology, financial therapy has emerged to meet increasingly salient concerns. Financial Therapy is the first full-length guide to the field, bridging theory, practical methods, and a growing cross-disciplinary evidence base to create a framework for improving this crucial aspect of clients' lives. Its contributors identify money-based disorders such as compulsive buying, financial hoarding, and workaholism, and analyze typical early experiences and the resulting mental constructs (money scripts) that drive toxic relationships with money. Clearly relating financial stability to larger therapeutic goals, therapists from varied

perspectives offer practical tools for assessment and intervention, advise on cultural and ethical considerations, and provide instructive case studies. A diverse palette of research-based and practice-based models meets monetary mental health issues with well-known treatment approaches, among them: Cognitive-behavioral and solution-focused therapies. Collaborative relationship models. Experiential approaches. Psychodynamic financial therapy. Feminist and humanistic approaches. Stages of change and motivational interviewing in financial therapy. A text that serves to introduce and define the field as well as plan for its future, Financial Therapy is an important investment for professionals in psychotherapy and counseling, family therapy, financial planning, and social policy.
