Rock Retirement Roger Whitney, 2017-10-03 "A guide for planning that rich season of life, based not just on money, but also on how to create meaningful relationships, memories, and legacy." —Dan Miller, author of 48 Days to the Work You Love Rock Retirement offers inspirational advice on how to enjoy the journey to retirement to its fullest. Traditional retirement advice usually boils down to saving more, sacrificing more, and settling for less. This approach makes people dependent on systems outside their control, such as the market, economy, and investment returns. The result: people lose power over determining their life. What sets Rock Retirement apart is its holistic approach to helping people take back control and act intentionally towards the life they want. It addresses the fears, hopes, and dreams that people have about retirement, goes way beyond the numbers, and shows them how to balance living well today and tomorrow. "Too many books think retirement is just about finances. Instead, retirement is about looking at life in full and working out what it is you want to do and then turning to finances to make it happen. That's exactly the focus of the practical and helpful guide." —Andrew Scott, coauthor of The 100-Year Life "Roger Whitney lays out a plan for today's modern retiree. If you are exhausted with being fed that retirement is the end game of life, then Roger's book is a must-read!" —Darryl W. Lyons, author of 18 to 80 "If you're dreaming of a retirement free of worry, chaos and confusion, Rock Retirement will give you the clarity, a solid plan and fresh inspiration to help you get where you want to go." —Jevonnah "Lady J" Ellison, author of Love Letters for Leading Ladies

Occupational Therapy Practice Guidelines for Older Adults with Low Vision Jennifer Kaldenberg,Stacy Smallfield,2013 The U.S. population is aging, and occupational therapy practitioners working with older adults must have the skills to address multiple health issues, including vision loss. Although typical aging does not cause low vision, four major causes of vision impairment are directly related to the aging process: (1) age-related macular degeneration (AMD), (2) diabetic retinopathy, (3) glaucoma, and (4) cataracts. Instances of these impairments are expected to double by the year 2050, making low vision a significant public health issue. This Practice Guideline includes occupational therapy assessment and intervention guidelines for older adults who have visual acuity impairments, visual field impairments, or both as a result of a low vision diagnosis. Screening, referral, and evaluation are covered for clients for central visual field impairments, such as AMD and cataract; peripheral field impairments, such as glaucoma, hemianopsia, and quadrantanopsia; and mixed visual field loss, such as diabetic retinopathy. This work can help occupational therapists and occupational therapy assistants, as well as individuals

who manage, reimburse, or set policy regarding occupational therapy services, understand the contribution of occupational therapy to treating older adults with low vision. Appendixes include selected diagnostic and billing codes and evidence tables.
