The Story of Me a Black Nurse Diane

Jones,2011-03-10 This narrative is about the personal struggles of being a Black Woman and being a Black Professional in a society that is still bound with racial and gender bias. Her stories navigate you through the career of a young woman who has hopes, dreams, needs, a purpose and aspirations but she faces constant opposition to fulfilling and attaining these basic human requirements. Like so many people of color before

her, she achieves a certain measure of success but the measure of success is minor compared to what she must do to achieve it. It is a reflection of the despair she was feeling when she wrote it but does not fully reveal the appreciation, compassion and love that she has for mankind. It is time for a change!

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Economic Impacts of Intelligent Transportation Systems E Bekiaris, Y J Nakanishi, 2004-07-24 There are unique complexities associated with the economic valuation of Intelligent Transportation Systems (ITS) and telematics. Traditional methods of quantitative analysis may not be appropriate in accurately and reliably assessing the economic impacts of these technologies. Although advanced transportation and related technologies are being planned and deployed at an increasingly rapid pace, many of the technologies are still relatively new, and their use may not be widespread. Much of the initial information and statistics gathered have been anecdotal and have focused more on benefits rather than costs. Therefore, difficulties arise due to the lack of historical data and 'lessons learned' from which to draw upon. In addition, compared with traditional transportation infrastructure, ITS technologies have different life cycles, cost structures, and a number of interrelated elements.

This book addresses these concerns and proposes new economic assessment techniques as well as modifications to existing ones. Included are case studies from a multitude of North American, European, and Asian nations and major metropolitan areas covering a wide range of ITS technologies including freeway management, electronic toll collection, advanced driver assistance systems, and traveller information systems.

Finding Meaning in Life, at Midlife and Beyond David Guttman, 2008-09-30 Having been mentored by Viktor E. Frankl, the founder of logotherapy, Emeritus Professor David Guttman authored this

book so general readers may understand this approach to finding meaning in life at the point when most of us begin deeply wondering over that question, at midlife and beyond. Especially in this day and age of multiple demands on our time and seemingly non-stop obligations, we too often find that it is only when the dust settles, after a work day or work week, or even after retirement, when we begin to wonder: What is the meaning of life? The purpose? This book is a new millennium venture into those questions and their answers using logotherapy, written by a sage understudy who recalls Frankl, with his logotherapy, as the epitome of his theory even at 80 years old, wise and witty, exuding an energy, enthusiasm and youthful spirit that belied his years by decades. Aging does not diminish our power, our energy, and our quest for life, but reshapes it with new understandings, goals, and needs. But, says Guttman, we live in a technical and machine-based world now, in which there is a danger of losing our souls. Here, readers find a new, creative perspective on aging and a fresh spiritual outlook. This book will be of interest not only to general readers, especially those at midlife and beyond, but also to their families, friends, and students or professionals in the helping professions. This unique work provides knowledge to find meaning in life derived from the fields of philosophy, psychology, religion and gerontology, with case illustrations and vignettes to give readers both intellectual pleasure and practical guidance.
