Ancient Cities Charles Gates, 2013-04-15 Well illustrated with nearly 300 line drawings, maps and photographs, *Ancient Cities* surveys the cities of the ancient Near East, Egypt, and the Greek and Roman worlds from an archaeological perspective, and in their cultural and historical contexts. Covering a huge area geographically and chronologically, it brings to life the physical world of ancient city dwellers by concentrating on evidence recovered by archaeological excavations from the Mediterranean basin and south-west Asia. Examining both pre-Classical and Classical periods, this is an excellent introductory textbook for students of classical studies and archaeology alike.

Ancient Cities Charles Gates, Andrew Goldman, 2024-02-29 The third edition of *Ancient Cities* surveys the cities of the Ancient Near East, Egypt, and the Greek, Etruscan, and Roman worlds from the perspectives of archaeology and architectural history, bringing to life the physical world of ancient city dwellers by concentrating on archaeological evidence. Urban form is the focus: the physical appearance and overall plans of cities, their architecture and natural topography, and the cultural and historical contexts in which they flourished. Attention is also paid to non-urban features such as religious sanctuaries and burial grounds, places and institutions that were a familiar part of the city dweller's experience. Objects or artifacts that furnished everyday life are discussed, such as writing systems, pottery,

sculpture, wall paintings, mosaics, and coins. Ancient Cities is unusual in presenting this wide range of Old World cultures in such comprehensive detail, giving equal weight to the Preclassical and Classical periods, and in showing the links between these ancient cultures. In this new edition, in which Andrew Goldman has joined Charles Gates in updating the volume, readers and lecturers will be delighted to see a major revision of the chapters on Greek cities in South Italy and Sicily, the Etruscans, the development of the capital city, Rome, during the Republic as well as the Empire, and the end of the ancient city. This new edition includes several new and updated user-friendly features, such as: Clear and accessible language, assuming no previous background knowledge Lavishly illustrated, with almost 350 line drawings, maps, and photographs, including new contributions from Neslihan Yılmaz Tekman adding to her already acclaimed illustrations Suggestions for further reading for each chapter A companion website with images, study guides, and an interactive timeline. With its comprehensive presentation of ancient Mediterranean and Near Eastern cities, its rich collection of illustrations, and its companion website, Ancient Cities remains an essential textbook for university and high school students across a wide range of archaeology, ancient history, and ancient Near Eastern, Biblical, and Classical Studies courses.

The Ancient City Arjan Zuiderhoek, 2017 This book provides a survey of modern debates on Greek and Roman cities, and a sketch of the cities' chief

characteristics.

Ancient Maya Cities of the Eastern Lowlands Brett A. Houk, 2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities. It will become both a handbook and a source of ideas for other archaeologists for years to come.--George J. Bey III, coeditor of *Pottery Economics in Mesoamerica* Skillfully integrates the social histories of urban development.--Vernon L. Scarborough, author of *The Flow of Power: Ancient Water Systems and Landscapes* Any scholar interested in urban planning and the built environment will find this book engaging and useful.--Lisa J. Lucero, author of *Water and Ritual* For more than a century researchers have studied Maya ruins, and sites like Tikal, Palenque, Copán, and Chichén Itzá have shaped our understanding of the Maya. Yet cities of the eastern lowlands of Belize, an area that was home to a rich urban tradition that persisted and evolved for almost 2,000 years, are treated as peripheral to these great Classic period sites. The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult, but this oft-ignored area reveals much about Maya urbanism and culture. Using data collected from different sites throughout the lowlands, including the Vaca Plateau and the Belize River Valley, Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them. Considering the sites through the analytical lenses of the built environment

and ancient urban planning, Houk vividly reconstructs their political history, considers how they fit into the larger political landscape of the Classic Maya, and examines what they tell us about Maya city building.

Intercultural Urbanism Dean Saitta, 2020-07-23 Cities today are paradoxical. They are engines of innovation and opportunity, but they are also plagued by significant income inequality and segregation by ethnicity, race, and class. These inequalities and segregations are often reinforced by the urban built environment: the planning of space and the design of architecture. This condition threatens attainment of wider social and economic prosperity. In this innovative new study, Dean Saitta explores questions of urban sustainability by taking an intercultural, trans-historical approach to city planning. Saitta uses a largely untapped body of knowledge-the archaeology of cities in the ancient world-to generate ideas about how public space, housing, and civic architecture might be better designed to promote inclusion and community, while also making our cities more environmentally sustainable. By integrating this knowledge with knowledge generated by evolutionary studies and urban ethnography (including a detailed look at Denver, Colorado, one of America's most desirable and fastest growing 'destination cities' but one that is also experiencing significant spatial segregation and gentrification), Saitta's book offers an invaluable new perspective for urban studies scholars and urban planning professionals.

Ancient Cities Charles Gates Gates, 2021-04-30 This book surveys the cities of the Ancient Near East, Egypt, and the Greek and Roman worlds, with a focus on their physical appearance, on urban form, and on their cultural and historical contexts. Architecture is key: the buildings that marked ancient cities, streets, squares, and other spaces in between; the arrangement of these elements in a city plan; and their functions in ancient societies. Our aim is to see how buildings and objects made by people long gone help us understand the urban environments created and lived in by our distant ancestors in the Mediterranean basin and the Near East. Geographical conditions are also important; they are highlighted throughout. In addition, through most of the centuries treated here written records give invaluable information about people and their activities and concerns. The written sources are constantly called upon to illuminate ancient life. Archaeology as presented in this book is thus a discipline nourished by many specialties: art and architectural history, urbanism, anthropology, geography, history, philology and literary studies; Ancient Near Eastern studies; Biblical studies; Egyptology; and Greek and Roman studies. 502Pag

Ancient Literacies William A Johnson, Holt N Parker, 2009-02-05 Classicists

have been slow to take advantage of the important advances in the way that literacy is viewed in other disciplines (including in particular cognitive psychology, socio-linguistics, and socio-anthropology). On the other hand, historians of literacy continue to rely on outdated work by classicists (mostly from the 1960's and 1970's) and have little access to the current reexamination of the ancient evidence. This timely volume attempts to formulate new interesting ways of talking about the entire concept of literacy in the ancient world--literacy not in the sense of whether 10% or 30% of people in the ancient world could read or write, but in the sense of text-oriented events embedded in a particular socio-cultural context. The volume is intended as a forum in which selected leading scholars rethink from the ground up how students of classical antiquity might best approach the question of literacy in the past, and how that investigation might materially intersect with changes in the way that literacy is now viewed in other disciplines. The result will give readers new ways of thinking about specific elements of literacy in antiquity, such as the nature of personal libraries, or what it means to be a bookseller in antiquity; new constructionist questions, such as what constitutes reading communities and how they fashion themselves; new takes on the public sphere, such as how literacy intersects with commercialism, or with the use of public spaces, or with the construction of civic identity; new essentialist questions, such as what book and reading signify in antiquity, why literate cultures develop, or why

literate cultures matter. The book derives from a conference (a Semple Symposium held in Cincinnati in April 2006) and includes new work from the most outstanding scholars of literacy in antiquity (e.g., Simon Goldhill, Joseph Farrell, Peter White, and Rosalind Thomas).

World Christianity, Urbanization and Identity ,2021-02-09 World Christianity, Urbanization and Identity argues that urban centers, particularly the largest cities, do not only offer places for people to live, shop, and seek entertainment, but deeply shape people's ethics, behavior, sense of justice, and how they learn to become human. Given that religious participation and institutions are vital to individual and communal life, particularly in urban centers, this interdisciplinary volume seeks to provide insights into the interaction between urban change, religious formation, and practice and to understand how these shape individual and group identities in a world that is increasingly urban. World Christianity, Urbanization and Identity is part of the multi-volume series World Christianity and Public Religion. The series seeks to become a platform for intercultural and intergenerational dialogue, and to facilitate opportunities for interaction between scholars across the Global South and those in other parts of the

world.
