**Kids to the Rescue!** Maribeth Boelts,Darwin Boelts,2003 This simple first aid book helps kids think wisely in an emergency. Well illustrated and easy to understand, it describes accident situations that children are likely to find themselves in. The paramedic/teacher author team provides step-by-step directions for handling such common problems as cuts, bloody noses, stings, electric shock and burns. One of our most popular children's books, Kids to the Rescue! opens with a note for parents, explaining how children can practice the first aid techniques. It concludes with a first aid quiz and instructions on calling 9-1-1 and other emergency numbers. The back cover has an index so kids can easily find the page of instructions they need. Expanded and revised to cover HIV-safety.

Every parent would do anything to keep their children away from all harms and injuries. You might try to be like a protective shield for your child all the time, but sometimes it becomes impossible for you to guard your kids against the odds. Your little champions cannot afford to stay in one place. Children are naturally intrigued by every object they come across. It's their intrinsic ability to explore everything. The curiosity that dwells inside them makes them kind of restless (we've all been kids so it's understandable). No matter how many times you forbid your kids from doing dangerous activities or touching harmful things, they simply won't stop doing it. You can't keep an eye on your kids all day, can you? Once they're out of your sight, they might up end up in some danger. What would you do if your baby (God forbid) or someone else's baby starts choking after having ingested a coin? What would you do to save that baby? Do you think you're prepared to cope with that emergency? If not, then you need not worry. This book is all you need to keep your baby safe in any emergency. This book is a complete guide for you that can help you manage any emergency situation that you and your baby might face. Calling for emergency help is certainly the first thing to do, but you can't wait for help and stand there and do nothing. After reading this book, you'll be equipped with different techniques and maneuvers that are simple, yet effective, and can prove to be the difference between your baby's safety and danger. We don't mean to startle you, but being prepared is always better than being sorry. So take a deep breath here and start with us on your journey to become an even better mother/father to your children.

**Verbal First Aid** Judith Simon Prager,Judith Acosta,2010-06-01 Words as Medicine What to say to your children to get them through the bumps, bruises, and crises of childhood. Falling off a bike, having a bad dream, getting stitches...sometimes a kiss isn't enough to make it all better. But what you say to your child in those first moments of pain or fear could make all the difference. Using techniques the authors have taught to doctors, nurses, and first responders, Verbal First Aid(tm) explains how words can be used to promote healing from burns, bruises, nightmares, asthma attacks, and more. It provides scripts and tips on how to short-circuit traumatic memories, sometimes just by speaking a sentence or two. This revolutionary book gives parents the responses they need to immediately stabilize their children's emotions. And these methods will build a foundation of confidence and inner strength that will help kids heal at the deepest level, and weather whatever hardships and difficulties they encounter throughout life.

**World Report on Child Injury Prevention** M. M. Peden,2008 Child injuries are largely absent from child survival initiatives presently on the global agenda. Through this report, the World Health Organization, the United Nations Children's Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities. It should be seen as a complement to the UN Secretary-General's study on violence against children released in late 2006 (that report addressed violence-related or intentional injuries). Both reports suggest that child injury and violence prevention programs need to be integrated into child survival and other broad strategies focused on improving the lives of children. Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort. These results make a case for increasing investments in human resources and institutional capacities. Implementing proven interventions could save more than a thousand children's lives a day.--p. vii.
