Decision Support Systems Daniel Power, 2004-12-21 Decision Support Systems: Frequently Asked Questions is the authoritative reference guide to computerized Decision Support Systems. Author Dan Power has spent almost 30 years building, studying and teaching others about computerized Decision Support Systems. Dr. Power is first and foremost a Decision Support evangelist and generalist. From his vantage point as editor of DSSResources.COM, he tracks a broad range of contemporary DSS topics. In this DSS FAQ, Dr. Power answers 83 frequently asked questions about computerized decision support systems. The FAQ covers a broad range of contemporary topics and the questions are organized into 8 chapters. DSS FAQ helps readers understand questions like: What is a DSS? What kind of DSS does Mr. X need? Does data modeling differ for a Data-Driven DSS? Is a Data Warehouse a DSS? Is tax preparation software an example of a DSS? What do I need to know about Data Warehousing/OLAP? What is a cost estimation DSS? What is a Spreadsheet-based DSS? Decision Support Systems: Frequently Asked Questions is a useful resource for IT specialists, students, professors and managers. It organizes important Ask Dan! questions (with answers) published in DSS News from 2000 through 2004.

Metroethnecity, Naming and Mocknolect John C. Maher, 2021-05-15 Language is a social space, an aesthetic, a form of play and communication, a geographical reference, a jouissance, a producer of numerous social and personal identities. This book takes up salient issues of sociolinguistics with a specific focus on Japan: language and gender (the

married name controversy), language and the 'portable' identities being fashioned around traditional, essentialist notions of ethnicity (metroethnicity) endangerment, slang, taboo and discriminatory language in Japanese especially regarding minorities, place-names from indigenous languages, the fellowship and parody of children's songs, and the diversity of nicknames among children and young people. This books gives radical and new perspectives on the sociolinguistics of Japanese.

Second Language Listening John Flowerdew, Lindsay Miller, 2005-02-07 As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing. Second Language Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. Second Language Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

The Japan Weekly Mail ,1870

The Making of Urban Japan André Sorensen,2005-08-19 During the twentieth century, Japan was transformed from a poor, primarily rural country into one of the world's largest industrial powers and most highly urbanised countries. Interestingly, while Japanese governments and planners borrowed carefully from the planning ideas and methods of many other countries, Japanese urban planning, urban governance and cities developed very differently from those of other developed countries. Japan's distinctive patterns of urbanisation are partly a product of the highly developed urban system, urban traditions and material culture of the pre-modern period, which remained influential until well after the Pacific War. A second key influence has been the dominance of central government in urban affairs, and its consistent prioritisation of economic growth over the public welfare or urban quality of life. André Sorensen examines Japan's urban trajectory from the mid-nineteenth century to the present, paying particular attention to the weak development of Japanese civil society, local governments, and land development and planning regulations.

Pragmatic Competence Naoko Taguchi, 2009-09-04 In the disciplines of applied linguistics and second language acquisition (SLA), the study of pragmatic competence has been driven by several fundamental questions: What does it mean to become pragmatically competent in a second language (L2)? How can we examine pragmatic competence to make inference of its development among L2 learners? In what ways do research findings inform teaching and assessment of pragmatic competence? This book explores these key

issues in Japanese as a second/foreign language. The book has three sections. The first section offers a general overview and historical sketch of the study of Japanese pragmatics and its influence on Japanese pedagogy and curriculum. The overview chapter is followed by eight empirical findings, each dealing with phenomena that are significant in Japanese pragmatics. They target selected features of Japanese pragmatics and investigate the learners' use of them as an indicator of their pragmatic competence. The target pragmatic features are wide-ranging, among them honorifics, speech style, sentence final particles, speech acts of various types, and indirect expressions. Each study explicitly prompts the connection between pragmalinguistics (linguistic forms available to perform language functions) and sociopragmatics (norms that determine appropriate use of the forms) in Japanese. By documenting the understanding and use of them among learners of Japanese spanning multiple levels and time durations, this book offers insight about the nature and development of pragmatic competence, as well as implications for the learning and teaching of Japanese pragmatics. The last section presents a critical reflection on the eight empirical papers and prompts a discussion of the practice of Japanese pragmatics research.

Multilingual Japan John C. Maher, Kyōko Yashiro, 1995 This book presents a new outlook on the language situation in Japan and provides a sociolinguistic profile of the language situation of the older mother tongues. It presents issues such as bilingual families and 'returnee' language maintenance and rejects the stereotyping of Japan as a 'linguistically homogeneous nation with a difficult language'.
