*Players Making Decisions* Zack Hiwiler,2015-12-09 Game designers today are expected to have an arsenal of multi-disciplinary skills at their disposal in the fields of art and design, computer programming, psychology, economics, composition, education, mythology—and the list goes on. How do you distill a vast universe down to a few salient points? *Players Making Decisions* brings together the wide range of topics that are most often taught in modern game design courses and focuses on the core concepts that will be useful for students for years to come. A common theme to many of these concepts is the art and craft of creating games in which players are engaged by making meaningful decisions. It is the decision to move right or left, to pass versus shoot, or to develop one's own strategy that makes the game enjoyable to the player. As a game designer, you are never entirely certain of who your audience will be, but you can enter their world and offer a state of focus and concentration on a task that is intrinsically rewarding. This detailed and easy-to-follow guide to game design is for both digital and analog game designers alike and some of its features include: A clear introduction to the discipline of game design, how game development teams work, and the game development process Full details on prototyping and playtesting, from paper prototypes to intellectual property protection issues A detailed discussion of cognitive biases and human decision making as it pertains to games Thorough coverage of key game elements, with practical discussions of game mechanics, dynamics, and aesthetics Practical coverage of using simulation tools to decode the magic of game balance A full section on the game design business, and how to create a sustainable lifestyle within it

*Become an Idea Machine* Claudia Azula Altucher,2014-12-27 HOW DO I TRANSFORM MY LIFE? The answer is simple: come up with ten ideas a day. It doesn't matter if they are good or bad the key is to exercise your 'idea muscle', to keep it toned, and in great shape. People say ideas are cheap and execution is everything but that is NOT true. Execution is a consequence, a subset of good, brilliant idea. And good ideas require daily work. Ideas may be easy if we are only coming up with one or two but if you open this book to any of the pages and try to produce more than three, you will feel a burn, scratch your head, and you will be sweating, and working hard. There is a turning point when you reach idea number 6 for the day, you still have four to go, and your mind muscle is getting a workout. By the time you list those last ideas to make it to ten you will see for yourself what sweating the idea muscle means. As you practice the daily idea generation you become an idea machine. When we become idea machines we are flooded with lots of bad ideas but also with some that are very good. This happens by the sheer force of the number, because we are coming up with 3,650 ideas per year (at ten a day). When you are inspired by an extraordinary idea, all of your thoughts break their chains, you go beyond limitations and your capacity to act expands in every direction. Forces and abilities you did not know you had come to the surface, and you realize you are capable of doing great things. As you practice with the suggested prompts in this book your ideas will get better, you will be a source of great insight for others, people will find you magnetic, and they will want to hang out with you because you have so much to offer. When you practice every day your life will transform, in no more than 180 days, because it has no other evolutionary choice. Life changes for the better when we become the source of positive, insightful, and helpful ideas. Don't believe a word I say. Instead, challenge yourself to try it for the 180 days and see your life transform, in magical ways, in front of your very eyes.
