Only Fish Fall From the Sky Leif Parsons,2015-05-05 A dreamworld where it rains fish instead of water, people dance through dinner, and children sleep with tigers--welcome to the imagination of author/artist Leif Parsons, whose detailed dreamscapes make ONLY FISH FALL FROM THE SKY a charming bedtime book sure to fascinate preschoolers and young readers. A boy wakes from a marvelous dream to find the world is not quite as he left it--raindrops are falling from the sky, instead of fish, when everyone knows that only fish fall from the sky! But is he asleep or awake? Kids can decide for themselves which world they prefer as they pore over the imaginative dreamscapes of author/illustrator Leif Parson's delightful alternate world. Movement infuses every inch of Parsons' elaborate illustrations, enticing young readers to linger over each spread to discover such kid-friendly surprises as kangaroos jumping double-dutch, a giant nose poking out of a city window, or a squirrel taking meticulous notes.

It's Raining Frogs and Fishes Jerry Dennis,2013-11-22 It's Raining Frogs and Fishes is a generously illustrated inquiry into wonders of the sky: Why is the sky blue? Where do meteors originate? What causes rainbows, mirages, and the colors of the sunset? Why do some birds and insects migrate, and how do they navigate over hundreds or thousands of miles to do it? How have civilizations throughout history viewed the aurora borealis, tornadoes, eclipses, and the bizarre but well documented cases of fish, reptiles, snails, and even snakes that have rained to earth? Author Jerry Dennis and illustrator Glenn Wolff approach such questions with curiosity and wit, and suggest ways to observe first-hand extraordinary weather, astronomical anomalies, and odd and interesting wildlife of the skies. This updated edition of the national bestseller is a spellbinding look into the natural world's most fascinating and baffling phenomena, with illustrated explanations of rainbows, meteors, sunsets, hurricanes, the northern lights, bird and insect flight, and dozens of other curiosities. Subjects are arranged by season, and each is discussed in a concise and entertaining style that blends the most recent scientific findings with historical anecdotes, personal observations, and examples of the lore and superstitions that have always surrounded phenomena of the skies. PRAISE: “Amusing and illuminating...This writer-artist team shines a bright and lovely light on nature.” —Los Angeles Times “Charming, informative, humorous, and scholarly... embraces wind and weather, the sun, the moon and stars, the seasons of the year and the effect of these things on the denizens of this planet. It is a delight.” —Nelson Bryant, columnist for The New York Times Vastly entertaining, valuable... Makes natural history so much fun the reader is sucked from paragraph to paragraph, page to page, chapter to chapter.” —St. Louis Post-Dispatch This delightful look at nature...is a cornucopia of fact and lore. Wit, humor, wonder, and reverence spice and season the vignettes herein. It's Raining Frogs and Fishes reminds adults — especially in this hectic, fast-paced, just-do-it world — that it is more than OK, it is desirable, to be child-like and to look up at the heavens and ask why. —Toledo Blade

It's Raining Fish and Spiders Bill Evans,2012-05-22 One of the things Bill Evans enjoys the most is talking to young people about weather. Middle-schoolers in particular, Evans says, are deeply interested in the natural world and in weather. It's Raining Fish and Spiders covers everything, from tornadoes and hurricanes to lightning and the different kinds of snowflakes. Evans addresses weather myths and facts, from Can it really rain fish? to Will opening a window save my house during a tornado? Evans also tells his most exciting personal weather stories: flying with the Hurricane Hunters, riding pell-mell through Tornado Alley with storm chasers, and visiting the coldest place on Earth. The book includes simple weather experiments that can be performed at home without expensive equipment. Extensively researched, fact-filled, and packed with charts, tables, illustrations, and amazing photographs, It's Raining Fish and Spiders is an entertaining and educational addition to the library of anyone interested in weather, science, and the natural world. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Unidentified Colin Dickey,2021-07-20 America's favorite cultural historian and author of Ghostland takes a thought-provoking and deliciously unsettling (Publisher's Weekly) tour of the country's most persistent unexplained phenomena In a world where rational, scientific explanations are more available than ever, belief in the unprovable and irrational--in fringe--is on the rise: from Atlantis to aliens, from Flat Earth to the Loch Ness monster, the list goes on. It seems the more our maps of the known world get filled in, the more we crave mysterious locations full of strange creatures. Enter Colin Dickey, Cultural Historian and Tour Guide of the Weird. With the same curiosity and insight that made Ghostland a hit with readers and critics, Colin looks at what all fringe beliefs have in common, explaining that today's Illuminati is yesterday's Flat Earth: the attempt to find meaning in a world stripped of wonder. Dickey visits the wacky sites of America's wildest fringe beliefs--from the famed Mount Shasta where the ancient race (or extra-terrestrials, or possibly both, depending on who you ask) called Lemurians are said to roam, to the museum containing the last remaining evidence of the great Kentucky Meat Shower--investigating how these theories come about, why they take hold, and why as Americans we keep inventing and re-inventing them decade after decade. The Unidentified is Colin Dickey at his best: curious, wry, brilliant in his analysis, yet eminently readable.

**Fishbowl** Bradley Somer,2015-08-04 A goldfish named Ian is falling from the 27th-floor balcony on which his fishbowl sits. He's longed for adventure, so when the opportunity arises, he escapes from his bowl, clears the balcony railing and finds himself airborne. Plummeting toward the street below, Ian witnesses the lives of the Seville on Roxy residents. There's the handsome grad student, his girlfriend, and the other woman; the construction worker who feels trapped by a secret; the building's super who feels invisible and alone; the pregnant woman on bed rest who craves a forbidden ice cream sandwich; the shut-in for whom dirty talk, and quiche, are a way of life; and home-schooled Herman, a boy who thinks he can travel through time. Though they share time and space, they have something even more important in common: each faces a decision that will affect the course of their lives. Within the walls of the Seville are stories of love, new life, and death, of facing the ugly truth of who one has been and the beautiful truth of who one can become. Sometimes taking a risk is the only way to move forward with our lives. As Ian the goldfish knows, An entire life devoted to a fishbowl will make one die an old fish with not one adventure had. Bradley Somer's Fishbowl is at turns funny and heartbreaking and you will, no doubt, fall in love with his unforgettable characters.

**The Falling Sky** Davi Kopenawa,Bruce Albert,2023-01-31 The 10th anniversary edition A Guardian Best Book about Deforestation A New Scientist Best Book of the Year A Taipei Times Best Book of the Year “A perfectly grounded account of what it is like to live an indigenous life in communion with one’s personal spirits. We are losing worlds upon worlds.” —Louise Erdrich, New York Times Book Review “The Yanomami of the Amazon, like all the indigenous peoples of the Americas and Australia, have experienced the end of what was once their world. Yet they have survived and somehow succeeded in making sense of a wounded existence. They have a lot to teach us.” —Amitav Ghosh, The Guardian “A literary treasure...a must for anyone who wants to understand more of the diverse beauty and wonder of existence.” —New Scientist A now classic account of the life and thought of Davi Kopenawa, shaman and spokesman for the Yanomami, The Falling Sky paints an unforgettable picture of an indigenous culture living in harmony with the Amazon forest and its creatures, and its devastating encounter with the global mining industry. In richly evocative language, Kopenawa recounts his initiation as a shaman and first experience of outsiders: missionaries, cattle ranchers, government officials, and gold prospectors seeking to extract the riches of

the Amazon. A coming-of-age story entwined with a rare first-person articulation of shamanic philosophy, this impassioned plea to respect indigenous peoples' rights is a powerful rebuke to the accelerating depredation of the Amazon and other natural treasures threatened by climate change and development.

In *Vesper Flights*, Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk’s poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds’ nests, and the unexpected guidance and comfort we find when watching wildlife.

Now with a new introduction by the author. Here we meet 15-year-old runaway Kafka Tamura and the elderly Nakata, who is drawn to Kafka for reasons that he cannot fathom. Reading Murakami ... is a striking experience in consciousness expansion.” —The Chicago Tribune

*From the Stars in the Sky to the Fish in the Sea* Kai Cheng Thom,Kai Yun Ching,2017-10-16 In the magical time between night and day, when both the sun and the moon are in the sky, a child is born in a little blue house on a hill. And Miu Lan is not just any child, but one who can change into any shape they can imagine. The only problem is they can't decide what to be: A boy or a girl? A bird or a fish? A flower or a shooting star? At school, though, they must endure inquisitive looks and difficult questions from the other children, and they have trouble finding friends who will accept them for who they are. But they find comfort in the loving arms of their mother, who always offers them the same loving refrain: whatever you dream of / i believe you can be / from the stars in the sky to the fish in the sea. In this captivating, beautifully imagined picture book about gender, identity, and the acceptance of the differences between us, Miu Lan faces many questions about who they are and who they may be. But one thing's for sure: no matter what this child becomes, their mother will love them just the same. Kai Cheng Thom is a writer, performance artist, and psychotherapist in Toronto. Her first poetry book, *a Place Called No Homeland*, was published in 2017. Kai Yun Ching is a community-based organizer, educator, and illustrator in Montreal. Heir to the Sky Amanda Sun,2016 As heir to a kingdom of floating continents, Kali has spent her life bound by limits: by her duties as a member of the royal family, by a forced betrothal to the son of a nobleman, and by the edge of the only world she's ever known a small island hovering above a monster-ridden earth, long since uninhabited by humans. When Kali falls off the edge of her kingdom and miraculously survives, she is shocked to discover there are still humans on the earth. Determined to get home, Kali entrusts a rugged monster-hunter named Griffin to guide her across a world overrun by chimera, storm dragons, basilisks and other terrifying creatures. But the more time she spends on earth, the more dark truths she begins to uncover about her home in the sky, and the more resolute she is to start burning for herself.--Page [4] of cover.

*438 Days* Jonathan Franklin,2015-11-17 The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history. For fourteen months, Alvarenga survived constant shark attacks. He learned to catch fish with his bare hands. He built a fish net from a pair of empty plastic bottles. Taking apart the outboard motor, he fashioned a huge fishhook. Using fish vertebrae as needles, he stitched together his own clothes. Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues, search and rescue officials, the medical team that saved his life and the remote islanders who nursed him back to health, this is an epic tale of survival. Print run 75,000.

**When I Fell From the Sky** Juliane Koepcke,2012-03-22 On Christmas Eve 1971, the packed LANSA flight 508 from Lima to Pucallpa was struck by lightning and went down in dense jungle hundreds of miles from civilization. Of its 93 passengers, only one survived. Juliane Koepcke, the seventeen-year-old child of famous German zoologists. She'd been thrown from the plane two miles above the forest canopy, but had sustained only a broken collarbone and a cut on her leg. With incredible courage, instinct and ingenuity, she survived three weeks in the green hell of the Amazon - using the skills she'd learned in assisting her parents on their research trips into the jungle - before coming across a loggers hut, and, with it, safety. Now she tells her fascinating story for the first time, and in doing so tells us about her 'Gerald Durrell' childhood - with a menagerie of wild, exotic and sometimes dangerous pets - about how she learned to survive at her parents ecological station deep in the rainforest and about her present-day commitment to this wildlife as a biologist and dedicated environmentalist.

*Big Fish* Daniel Wallace,2012-01-01 When his attempts to get to know his dying father fail, William Bloom makes up stories that recreate his father's life in heroic proportions.

**The Book of the Damned** Charles Fort,2020-09-28 Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day

it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you--Taken from Good Reads website.
